In North America, you really care about only two search engines: Google and Bing. Yes, there's Yahoo! too, but Yahoo! gets search results from Bing, so if you're in the Bing index, you're in Yahoo!, too. And most sites that provide a search function get their results from one of these two systems. Those two systems are responsible for about 99 percent of all searches people carry out at

search engines, with the rest carried out at tiny sites such as Ask.com.

Search Engine Optimization For Dummies by Peter Kent ...

Most modern engines have a dual overhead cam (DOHC) valvetrain which means that the intake and exhaust valves have their own camshafts. The advantage of having separate camshafts is that each cam can be placed very close to the valve, allowing the cam's lobes to either work directly on the valves or through a very small rocker arm.
