The definitive reference work on World Englishes—fully revised, expanded, and updated. The Handbook of World Englishes is a collection of articles on the cross-cultural and transnational linguistic convergence and change of the English language. Now in its second edition, this Handbook brings together multiple theoretical, contextual, and ideological perspectives, and offers new interpretations of the changing identities of world Englishes (WE) speakers and examines the current state of the English language across the world. Thematically integrated contributions from leading scholars and researchers explore the expansion, modification, and adaptation of English in various settings and discuss the role of English in local, regional, and global contexts. This highly regarded text has been fully updated throughout the new edition to reflect the current conditions, contexts, and functions of major varieties of English across the world. Significant revisions to topics—such as an overview of the varieties of modern world Englishes and the First Diaspora in Wales and Ireland—reflect expanded scholarship in the field and new directions of research. Each chapter from the first edition has been updated in content and citations, while 11 new chapters cover subjects including world Englishes testing and Postcolonial theory, as well as world Englishes in South America, Russia, Africa, China, Southeast Asia, the United States, and Canada. Examines both traditional and contemporary perspectives on World Englishes. Written by international authors, experts in their respective fields. Emphasizes the historical development of the English language through a series of diasporas. Highlights research into a wide range of sociolinguistic contexts and processes including code switching, newly established WE varieties, and new data on Chinese and Russian Englishes. Explores future directions in WE research, development, and application. The Handbook of World Englishes is an essential resource for academics, researchers, practitioners, and advanced students in fields including applied linguistics, language teaching, the history of the English language, world literatures, and related social and language sciences.

With the “discursive turn” has come a distrust – a complete rejection by some – of theories that seek deeper reasons for surface phenomena. Rong Chen argues that this distrust, with its accompanying overemphasis on specificity and fluidity of linguistic meaning and social values, is unwarranted and unhelpful. Drawing on insights from social theories and various strands of pragmatics, he proposes a motivation model of pragmatics (MMP), contending that language use can be adequately, coherently, and elegantly studied via the motivation behind it in its varied and dynamic contexts. The model, with its well-laid out components, is then applied to (im)politeness research, cross-cultural pragmatics, diachronic pragmatics, discourse and genre analysis,

conversation analysis, identity construction, and the study of metaphor, sarcasm, parody, and lying. MMP is thus a framework aimed at accounting for fluidity with stable notions, specificity with general principles, and differences with similar underlying factors. As such, the book should appeal to students of pragmatics, (im)politeness, conversation analysis, sociolinguistics, applied linguistics, communication, sociology, and psychology.

Stories are shared by millions of people online every day. They post and re-post interactions as they re-tell and respond to large-scale mediated events. These stories are important as they can bring people together, or polarise them in opposing groups. Narratives Online explores this new genre - the shared story - and uses carefully chosen case-studies to illustrate the complex processes of sharing as they are shaped by four international social media contexts: Wikipedia, Facebook, Twitter and YouTube. Building on discourse analytic research, Ruth Page develops a new framework - 'Mediated Narrative Analysis' - to address the large scale, multimodal nature of online narratives, helping researchers interpret the micro- and macro-level politics that are played out in computer-mediated communication.

This volume is dedicated to the concept and several applications of Dominant Language Constellations (DLC), by which it advances understanding of current multilingualism through addition of a novel perspective from which to view contemporary language use and acquisition. The term Dominant Language Constellation denotes the set of a person's or group's most expedient languages, functioning as an entire unit and enabling an individual or group to meet their needs in a multilingual environment. The volume presents pioneering contributions that employ DLC as the lens for analysing a wide array of issues. These include multilingual syntactic development, cross-linguistic interaction and multilingual production in formal and informal educational contexts, as well as linguistic profiles of multilingual groups used in elementary school and higher education. Other DLC issues include discussions of how identity, emotions and attitudes operate in various minority and majority contexts. Because the DLC concept does not assume any inherent hierarchy of languages it can serve as a framework public policy in multilingual countries/communities faced with challenging policy determinations regarding choice of languages for use in education settings and more widely in social institutions and the economy. Some chapters develop and extend the DLC concept, others adapt and apply it to a variety of contexts, both global and local. Many chapters feature educational and social settings across large parts of the world— Africa, Australia, Europe, North America (Canada and the USA) and Southeast Asia. The volume can serve as supplementary reading for courses on multilingualism, sociolinguistics, language policy and planning, educational linguistics, Second and Third Language Acquisition.
