This book examines the increasing territorialisation of party competition and the relaxation of unitarian rule through devolution, presenting a long-term analysis of electoral developments in the United Kingdom since the end of the Second World War. Subsequently, the book looks into the undermining of the traditional majoritarian

mode of British government as a result. It analyzes the significant role of these long-term developments and their detrimental effect on the parliament's ability to resolve issues like the Scottish Independence Referendum or the UK's vote to leave the European Union, and it addresses their underlying causes. The author additionally reconnects these electoral developments to the changing nature of devolution and shows how the deepening of devolution accelerates the negative electoral consequences for the British system of government. Finally, the book shows why the British Labour Party is turning more and more into a long-term minority party as a result of these developments. The book is a must-read for scholars, students and policy-makers, interested in a better understanding of comparative

politics and devolution in general, as well as in the more specific case of the United Kingdom's electoral system.

The EU is a supranational organization, whose reach and influence extends well beyond its member states, especially to the many states that have signed various forms of association agreement with it. This book asks whether qualifying states who have eschewed EU membership experience negative effects on their legal and political self-governing abilities, or whether they manage their independence with few such effects. It explores the idea that the closer the affiliation a non-member state has with the EU, the more susceptible to hegemony the relationship appears to be. In addition, the book provides an overview of the total range of agreements the EU has with non-member states. This text will be of key interest to scholars and students of in EU/European studies, Scandinavian studies, European and comparative politics, international relations, and democratization studies.

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

The Beijing-Islamabad axis plays a central role in Asia's geopolitics, from India's rise to the prospects for a post-American Afghanistan, from the threat of nuclear terrorism to the continent's new map of mines, ports and pipelines. China is Pakistan's great economic hope and its most trusted military partner; Pakistan is the battleground for China's encounters with Islamic militancy and the heart of its efforts to counter-balance the emerging US-India partnership. For decades, each country has been the other's only 'all-weather' friend. Yet the relationship is still little understood. The wildest claims about it are widely believed, while many of its most dramatic developments are hidden from the public eye. This book sets out the recent history of Sino-Pakistani ties and their ramifications for the West, for India, for

Afghanistan, and for Asia as a whole. It tells the stories behind some of its most sensitive aspects, including Beijing's support for Pakistan's nuclear program, China's dealings with the Taliban, and the Chinese military's planning for crises in Pakistan. It describes a relationship increasingly shaped by Pakistan's internal strife, and the dilemmas China faces between the need for regional stability and the imperative for strategic competition with India and the USA.

The rise of India and China as two major economic and political actors in both regional and global politics necessitates an analysis of not only

their bilateral ties but also the significance of their regional and global pursuits. This book looks at the nuances and politics that the two countries attach to multilateral institutions and examines how they receive, react to and approach each other's presence and upsurge. The driving theme of this book is to highlight the enduring and emerging complexities in India-China relations, which are multi-layered and polygonal in nature, and both a result and reflection of a multipolar world order. The book argues that coexistence between India and China in this multipolar world order is possible, but that it is limited to a medium-term perspective, given the constraints of identity complexities and global aspirations these two rising powers are pursuing. It goes on to discuss how their search for energy resources, quest to uphold their own identity as developing powers, and engagement in balance-of-power politics to exert authority on each other's presence, are some elements that guide their non-cooperative relationship. By explaining the foreign policy approaches of Asia's two major powers towards the growing Asian and global multilateralism, and highlighting the policies they carry towards each other, the book is a useful contribution to students and scholars of Asian Politics, Foreign Policy and International Relations.

In 1974, India shocked the world by detonating a nuclear device. In the diplomatic controversy that ensued, the Canadian government expressed outrage that India had extracted plutonium from a Canadian reactor donated only for peaceful purposes. In the aftermath, relations between the two nations cooled considerably. As *Conflicting Visions* reveals, Canada and

India's relationship was turbulent long before the first bomb blast. Canada's expectations of how the former British colony would behave following its independence in 1947 led to a series of misperceptions and miscommunications that strained bilateral relations for decades.

This research monograph is the first authoritative work on the office of the Welsh Language Commissioner and the associated Welsh language regulatory and statutory regime. In setting the Commissioner in context – in Wales, the UK and internationally – the work draws upon a rich variety of source material arising from fieldwork conducted in a number of jurisdictions. The research data includes, for example, an extensive series of documents obtained under a number of Freedom of Information applications, in-depth interviews with key actors from pertinent legislatures, governments, regulatory offices, interest groups and civic society. The linguistic coverage of source material includes English and Welsh, as well as, where relevant, Irish, German, Catalan, Spanish, French and Basque, in a publication which is multi-disciplinary in approach, engaging with the scholarly and professional literature in language policy and planning, socio-legal studies and the politics of language.

This fascinating three-thousand-year history of the census traces the making of the modern survey and explores its political power in the age of big data and surveillance. In April 2020, the United States will embark on what has been called "the largest peacetime mobilization in American history": the decennial population census. It is part of a tradition of counting people that goes back at least three millennia and now spans the globe. In *The Sum of the People*, data scientist Andrew Whitby traces the remarkable history of the census, from ancient China and the Roman Empire, through revolutionary America and Nazi-occupied Europe, to the steps of the Supreme Court. Marvels of

democracy, instruments of exclusion, and, at worst, tools of tyranny and genocide, censuses have always profoundly shaped the societies we've built. Today, as we struggle to resist the creep of mass surveillance, the traditional census -- direct and transparent -- may offer the seeds of an alternative.

This volume examines how various forms of governance have emerged in South Asia after colonialism, and the developmental and conflict-related challenges the region faces. Drawing from the contexts of India, Sri Lanka and Nepal, it highlights the degree of institutionalization of democracy. The book further points to the manner in which shortcomings in governmental arrangements intersect with the prevalence of conflict at the national as well as sub-national levels. It showcases that democratic and more authoritarian cultures have influenced developmental successes and failures, and reveals how (external) interventions and policy reforms in the name of development have led to diverse outcomes in different South Asian countries.

Human endeavours in space over the past six decades have reached a stage that just about every facet of human life today has some complement of space capability contributing to it, encompassing the entire spectrum from telecommunications, navigation, weather forecasting, remote sensing, broadcasting and disaster management. Space exploration actually owes its origins to matters military, with civil applications coming about as a by-product. Capability building in space thereafter has witnessed frenzied progress, in the spheres of both the military and the civil/commercial. With an ever increasing number of countries joining the space bandwagon, space is getting congested and

competitive. International legislation on space, though well meaning, is largely viewed to be inadequate to address the concerns of equitable access to space and more alarmingly, is reticent on the issue of militarisation and weaponisation. The Indian presence in the global space order is rather significant. Ranking sixth globally in terms of space budget and technological capability, India is capable of going beyond its calling. Its multi-dimensional space programme spans almost the entire spectrum from space launch to satellite construction and their employment in a large array of development-centric applications, and in recent years, in missions beyond the Earth. The Mangalyaan mission to Mars currently underway symbolises India's indigenous technological prowess and is a harbinger of its capability of cementing its status as a responsible space player at the global level. India, thus, stands today, technologically robust and self-reliant – well poised in the global space order to look beyond its domestic charter and address the concerns of the international global community. Space legislation, situational awareness and international cooperation in space security are some of the geostrategic options analysed in this book, which could facilitate Indian positioning in the global space order.

This edited volume addresses the main lessons and legacies of the 1962 Cuban Missile Crisis from a global perspective. Despite the discoveries of recent research, there is still much more to be revealed about the handling of nuclear weapons before and during the Cuban Missile Crisis (CMC). Featuring contributions from a number of eminent international scholars of nuclear history, intelligence, espionage,

political science and Cold War studies, *An International History of the Cuban Missile Crisis* reviews and reflects on one of the critical moments of the Cold War, focussing on three key areas. First, the volume highlights the importance of memory as an essential foundation of historical understanding and demonstrates how events that rely only on historical records can provide misleading accounts. This focus on memory extends the scope of the existing literature by exploring hitherto neglected aspects of the CMC, including an analysis of the operational aspects of Bomber Command activity, explored through recollections of the aircrews that challenge accounts based on official records. The editors then go on to explore aspects of intelligence whose achievements and failings have increasingly been recognised to be of central importance to the origins, dynamics and outcomes of the missile crisis. Studies of hitherto neglected organisations such as the US Defense Intelligence Agency (DIA) and the British Joint Intelligence Committee (JIC) both extend our understanding of British and American intelligence machinery in this period and enrich our understanding of key episodes and assessments in the missile crisis. Finally, the book explores the risk of nuclear war and looks at how close we came to nuclear conflict. The risk of inadvertent use of nuclear weapons is evaluated and a new proposed framework for the analysis of nuclear risk put forward. This volume will be of much interest to students of intelligence studies, international history, foreign policy, security studies and IR in general.

Adaptive Governance of Disaster Disha Publications

In *Human Rights and Participatory Politics in Southeast Asia*, Catherine Renshaw recounts an extraordinary period of human rights institution-building in Southeast Asia. She begins her account in 2007, when the ten members of the Association of Southeast Asian Nations (ASEAN) signed the ASEAN charter,

committing members for the first time to principles of human rights, democracy, and the rule of law. In 2009, the ASEAN Intergovernmental Commission on Human Rights was established with a mandate to uphold internationally recognized human rights standards. In 2013, the ASEAN Human Rights Declaration was adopted as a framework for human rights cooperation in the region and a mechanism for ASEAN community building. Renshaw explains why these developments emerged when they did and assesses the impact of these institutions in the first decade of their existence. In her examination of ASEAN, Renshaw asks how human rights can be implemented in and between states that are politically diverse—Vietnam and Laos are Communist; Brunei Darussalam is an Islamic sultanate; Myanmar is in transition from a military dictatorship; the Philippines and Indonesia are established multiparty democracies; while the remaining members are less easily defined. Renshaw cautions that ASEAN is limited in its ability to shape the practices of its members because it lacks a preponderance of democratic states. However, she concludes that, in the absence of a global legalized human rights order, the most significant practical advancements in the promotion of human rights have emerged from regional institutions such as the ASEAN.
