This book is the first  
detailed discussion of the

---

impact of the First World War on English theology. Assessing the close relationships between English and German theologians before the First World War, Chapman then explores developments throughout the war. A series of case studies make use of a large amount of unpublished material, showing how some theologians sought to maintain relationships with their German colleagues, while others, especially	from a more Anglo-Catholic perspective, used the war as an opportunity to distance themselves from the liberal theology which was beginning to dominate the universities before the war. The increasing animosity between Britain and Germany meant that relations were never healed. English theology became increasingly insular, dividing between a more home-grown variety of liberalism and an ascendant Anglo-	Catholicism. Consequently, this book offers useful insights into the development of theology in the twentieth century and will be of keen interest to scholars and students of the history of theology. English theology and Germany in the First World War Routledge Before the First World War, the British Admiralty conceived a plan to win rapid victory in the event of war with Germany-economic warfare on an unprecedented scale. This secret strategy
--	--	---

---

called for the state to exploit Britain's effective monopolies in banking, communications, and shipping-the essential infrastructure underpinning global trade-to create a controlled implosion of the world economic system. In this revisionist account, Nicholas Lambert shows in lively detail how naval planners persuaded the British political leadership that systematic disruption of the global economy could bring about German military paralysis. After the outbreak of hostilities, the government	shied away from full implementation upon realizing the extent of likely collateral damage-political, social, economic, and diplomatic-to both Britain and neutral countries. Woodrow Wilson in particular bristled at British restrictions on trade. A new, less disruptive approach to economic coercion was hastily improvised. The result was the blockade, ostensibly intended to starve Germany. It proved largely ineffective because of the massive political influence of economic interests on national	ambitions and the continued interdependencies of all countries upon the smooth functioning of the global trading system. Lambert's interpretation entirely overturns the conventional understanding of British strategy in the early part of the First World War and underscores the importance in any analysis of strategic policy of understanding Clausewitz's "political conditions of war." <u>Sir Charles Wood's Indian Policy, 1853-66</u> Routledge Tolerant AlliesCanada and the United States,

14th Congress, 1st Session-48th Congress, 2nd Session and Special Session UMMPress

Much has been written on Education Acts, yet we have abused and neglected them. The history of educational legislation has been written off as ‘ Acts and facts ’ , and the conventional approach to writing about them has been concerned with politics, and especially with the men responsible for them.

On the centenary of the 1918 Education Act and Education (Scotland) Act, and the thirtieth anniversary of the 1988 Education Reform Act, we can rightly compare them alongside the other two agenda-setting master-Acts of the 20th century, those of 1902 and 1944. These latter Acts, themselves landmarks of legislation, have each attracted several significant articles that have been published in

the British Journal of Educational Studies. Between them, these provide a detailed commentary on the key legislation that has framed the development of UK education that is also open to critique and challenge. The anniversaries of these key Education Acts are also starting points for broader discussion of continuities, changes and contestation in legislation involving the regime of power,

---

control and regulation of the smell of excrement education. This can also include consideration of the international context and the relationship between educational and other social legislation and reform.

### Calendar of State Papers

Bloomsbury Publishing  
When encountering unfamiliar environments in India and the Philippines, the British and the Americans wrote extensively about the first taste of mango and meat spiced with cumin,

and coconut oil, the feel of humidity and rough cloth against skin, the sound of bells and insects, and the appearance of dark-skinned natives and lepers. So too did the colonial subjects they encountered perceive the agents of empire through their senses and their skins. Empire of course involved economics, geopolitics, violence, a desire for order and greatness, a craving for excitement and

adventure. It also involved an encounter between authorities and subjects, an everyday process of social interaction, political negotiation, policing, schooling, and healing. While these all concerned what people thought about each other, perceptions of others, as Andrew Rotter shows, were also formed through seeing, hearing, touching, smelling, and tasting. In this book, Rotter offers a sensory history of the British in India from the formal imposition of their

---

rule to its end (1857-1947) and the Americans in the Philippines from annexation to independence (1898-1946). The British and the Americans saw themselves as the civilizers of what they judged backward societies, and they believed that a vital part of the civilizing process was to properly prioritize the senses and to ensure them against offense or affront. Societies that looked shabby, were

noisy and smelly, felt wrong, and consumed unwholesome food in unmannerly ways were unfit for self-government. It was the duty of allegedly more sensorily advanced Anglo-Americans to educate them before formally withdrawing their power. Indians and Filipinos had different ideas of what constituted sensory civilization and to some extent resisted imperial efforts to impose their own versions. What eventually emerged were

compromises between these nations' sensory regimes. A fascinating and original comparative work, *Empires of the Senses* offers new perspectives on imperial history.

Theology at War and Peace  
Oxford University Press  
Based on new and existing research by a world-class scholar, this is the first book in twenty years to examine the dynamics of the entire American-West European relationship since 1945. The relationship between the United States and Western Europe has

---

<p>always been crucial and recent events dictate that it is becoming ever more so. In this important new work, Geir Lundestad analyses the balance between the cooperation and conflict which has characterized this relationship in the post-war period. He examines talk of transatlantic drift, and the strain now apparent between the USA and the nation states of Western Europe. In the concluding section, Lundestad offers a topical view of the future of transatlantic interaction. Throughout the work Lundestad's much cited 'empire by invitation' thesis</p>	<p>is both put into practice and extended in time and scope. This book is essential reading for anyone interested in one of the most important and enduring international relationships of the last sixty years. Regulating Information Asymmetry in the Residential Real Estate Market Dundurn "These primary source documents comprise the largest part of this volume. They are organized into seven categories: American civilian documents, American military documents, MAGIC</p>	<p>diplomatic summaries, Japanese government and military documents and diary entries, Japanese surrender documents, the United States Strategic Bombing Survey Summary Report and Interrogations of Japanese Officials, and Statements of Japanese Officials on World War II compiled by the Military Intelligence Section of the United States Army."--BOOK JACKET. <u>Preserved in the State Paper Department of Her Majesty's Public Record Office</u> Tolerant AlliesCanada and the United States, 1963-1968</p>

Following on from the first volume, this unique book is the only collection of native analyses of the status of legislation in 30 European jurisdictions plus the EU. Each chapter, written by a national authority in the legislative field, presents and critically assesses: - the national constitutional environment and its connection with EU law; - the nature and types of legislation; - the legislative process; - the drafting process; - jurisprudence conventions; - the training of drafters. The book opens with a comparative chapter on the these six themes,

and concludes with an analysis of trends and best practices in Europe. Legislation in Europe is a necessary addition to law and policy libraries, law-making institutions and agencies, and an invaluable tool for constitutional and drafting academics and practitioners. Accessions List, Indonesia Manchester University Press Worlds of Women is a groundbreaking exploration of the "first wave" of the international women's

movement, from its late nineteenth-century origins through the Second World War. Making extensive use of archives in the United States, England, the Netherlands, Germany, and France, Leila Rupp examines the histories and accomplishments of three major transnational women's organizations to tell the story of women's struggle to construct a feminist international collective identity. She

---

addresses questions central to the study of women's history--how can women across the world forge bonds, sometimes even through conflict, despite their differences?--and questions central to world history--is internationalism viable and how can its history be written? Rupp focuses on three major organizations that were technically open to all women: the broadly based and cautious

International Council of Women, founded in 1888; the feminist International Alliance of Women, originally called the International Woman Suffrage Alliance, founded in 1904; and the vanguard Women's International League for Peace and Freedom, which grew out of the International Congress of Women that met at The Hague in 1915. The histories of these organizations, and their stories of

cooperation and competition, shed new light on the international women's movement. They also help us to understand the different but connected story of the second wave of international feminism that emerged from the ashes of World War II. English Reports in Law and Equity Cornell University Press  
Air power for warfighting is a story that's been told many times. Air power for peacekeeping and UN

---

enforcement is a story that desperately needs to be told. For the first-time, this volume covers the fascinating range of aerial peace functions. In rich detail it describes: aircraft transporting vital supplies to UN peacekeepers and massive amounts of humanitarian aid to war-affected populations; aircraft serving as the 'eyes in sky' to keep watch for the world organization; and combat aircraft enforcing the peace. Rich poignant case

studies illuminate the past and present use of UN air power, pointing the way for the future. This book impressively fills the large gap in the current literature on peace operations, on the United Nations and on air power generally.

Studies in Communist Affairs Taylor & Francis  
A Europe Made of Money is a new history of the making of the European Monetary System (EMS), based on extensive archive research. Emmanuel Mourlon-Druol highlights two long-term processes in the monetary

and economic negotiations in the decade leading up to the founding of the EMS in 1979. The first is a transnational learning process involving a powerful, networked European monetary elite that shaped a habit of cooperation among technocrats. The second stresses the importance of the European Council, which held regular meetings between heads of government beginning in 1974, giving EEC legitimacy to monetary initiatives that had previously involved semisecret and bilateral negotiations. The

---

interaction of these two features changed the EMS from a fairly trivial piece of administrative business to a tremendously important political agreement. The inception of the EMS was greeted as one of the landmark achievements of regional cooperation, a major leap forward in the creation of a unified Europe. Yet Mourlon-Druol's account stresses that the EMS is much more than a success story of financial cooperation. The technical suggestions made by its architects reveal how state elites conceptualized the larger project of integration.

And their monetary policy became a marker for the conception of European identity. The unveiling of the EMS, Mourlon-Druol concludes, represented the convergence of material interests and symbolic, identity-based concerns. The Hong Kong Experience Princeton University Press Tolerant Allies draws extensively on recently declassified Canadian and American sources to explore the most important political, economic, and military elements in the bilateral

relationship during the 1960s. Greg Donaghy challenges the prevailing view that relations during this turbulent decade were primarily marked by mutual hostility, the product of growing Canadian nationalism and differences over the war in Vietnam. Instead Donaghy argues that through the Autopact and the GATT, Canada and the United States crafted a new economic partnership that tied the two countries together more tightly than ever

---

before. Donaghy argues that economic integration was offset to some extent by diverging views on Western political and military strategy. As Pearson's government pursued distinct foreign and defence policies, American policy-makers acknowledged that Canadian objectives legitimately differed from their own and adjusted their policies accordingly. For its part, Ottawa rarely moved without weighing the impact its initiatives might have on

Washington. As a result, Canada and the United States found ways to accommodate each other's interests without seriously impairing bilateral cooperation. 1866-1869; 1900 OUP Oxford

The image of the scrum – a beleaguered politician surrounded by jockeying reporters – is central to our perception of Ottawa. The modern scrum began with the arrival of television, but even

in Sir John A. Macdonald's day, a century earlier, reporters in the parliamentary press gallery had waited outside the prime minister's office, pen in hand, hoping for a quote for the next edition. The scrum represents the test of wills, the contest of wits, and the battle for control that have characterized the relationship between Canadian prime ministers and

---

journalists for more than 125 years. Scrum Wars chronicles this relationship. It is an anecdotal as well as analytical account, showing how earlier prime ministers like Sir John A. Macdonald and Sir Wilfrid Laurier were able to exercise control over what was written about their administrators, while more recent leaders like John Diefenbaker, Joe Clark, John Turner, and Brian Mulroney	often found themselves at the mercy of intense media scrutiny and comment. Tolerant Allies Columbia University Press English for Mathematics is written to fulfill students' needs to learn English as a preparatory for job communication. This book is designed to provide an opportunity to develop students' English skills more communicatively and	meaningfully. It consists of twenty eight units. Each unit presents reading, writing, and speaking section. Reading section consists of prereading, reading comprehension and vocabulary exercises related to the topic of the text. In writing section, some structures and sentence patterns are completed with guided writing exercises. Meanwhile, in speaking section, students are provided
--	--	---

---

with models and examples followed by practical activities which are presented in various ways. In addition, students are also equipped with listening comprehension skill which is presented in a separate textbook. The materials have been arranged and graded in accordance with their language levels. Above of all, to improve the quality of this textbook, criticism and suggestions for

better editions are highly appreciated
