This book conducts a  
detailed examination  
of the current form of  
the Hong Kong  
residential property  
regulatory system: the

2013 Residential  
Properties (Firsthand  
Sales) Ordinance  
(Cap 621). The author  
sheds light on how the  
new legislation  
promotes a number of  
values including  
information  
symmetry, consumer  
protection, the free  
market and business  
efficacy. It provides a  
detailed account of  
how the regulatory  
mechanism has  
evolved over the past  
three decades to catch  
unconscionable sales  
tactics (such as  
selective information  
and/or  
misrepresentation of  
location, size,  
completion date and  
past transactions) and  
monitor sales  
practices in order in  
order to protect the  
interests of  
stakeholders in this  
ever-changing first-  
hand residential

property market. This  
book breaks down this  
complicated subject  
matter by focusing a  
number of chapters  
each on a specific  
attribute of the  
residential property  
on sale. It then  
examines the various  
channels through  
which the information  
is communicated to  
the prospective buyer  
and discusses  
misrepresentation of  
the key information in  
sales of residential  
properties as criminal  
liability. The tension  
between consumer's  
rights on one hand  
and the pursuit of free  
market principles on  
the other is but one  
example of the  
conflicting values  
thoroughly discussed  
in the book, others  
include superstition

A History of Frozen Earth in Russian and Soviet Science Springer Nature The Internet brings opportunity and peril for media freedom and freedom of expression. It enables new forms of publication and extends the reach of traditional publishers, but its power increases the potential damage of harmful speech

and invites state regulation and censorship as well as manipulation by private and commercial interests. In jurisdictions around the world, courts, lawmakers and regulators grapple with these contradictions and challenges in different ways with different goals in mind. The media law reforms they are adopting or considering contain crucial lessons for those forming their own responses or who seek to understand how technology is driving such rapid change in how information and opinion are distributed or

restricted. In this book, many of the world's leading authorities examine the emerging landscape of reform in nations with variable political and legal contexts. They analyse developments particularly through the prisms of defamation and media regulation, but also explore the impact of technology on privacy law and national security. Whether as jurists, lawmakers, legal practitioners or scholars, they are at the front lines of a story of epic change in how and why the Internet is changing the

nature and raising the stakes of 21st century communication and expression. *Law and Policy Perspectives* Routledge  
This book reviews the techniques, mechanisms and architectures of the way disputes are processed in England and Wales. Adopting a comparative approach, it evaluates the current state of the main different types of dispute resolution systems, including business, consumer, personal injury, family, property, employment and claims against the state. It provides a holistic overview of the whole system and suggests both systemic and detailed reforms. Examining

dispute resolution pathways from users' perspectives, the book highlights options such as ombudsmen, regulators, tribunals and courts as well as mediation and other ADR and ODR approaches. It maps numerous sectoral developments to see if learning might be spread to other sectors. Several recurrent themes arise, including the diversification in the use of techniques; adoption of digital, online and artificial technology; cost and funding constraints; the emergence of new intermediaries; the need to focus accessibility arrangements for people and businesses that need help with their problems; and identifying effective ways for achieving

behavioural change. This timely study analyses the shift from adversarial legalism to softer means of resolving social problems, and points to a major opportunity to devise an imaginative and holistic strategic vision for the jurisdiction. **Automating the US Air Force Fighter Pilot in Air-to-Air Combat, 1950 – 1980** Routledge

The Making of Modern English Theology Brill Academic Pub This book examines

the increasing territorialisation of party competition and the relaxation of unitarian rule through devolution, presenting a long-term analysis of electoral developments in the United Kingdom since the end of the Second World War. Subsequently, the book looks into the undermining of the traditional majoritarian mode of British government as a result. It analyzes the significant role of these long-term developments and their detrimental effect on the parliament 's ability to resolve issues like the Scottish Independence Referendum or the

---

UK ' s vote to leave the European Union, and it addresses their underlying causes. The author additionally reconnects these electoral developments to the changing nature of devolution and shows how the deepening of devolution accelerates the negative electoral consequences for the British system of government. Finally, the book shows why the British Labour Party is turning more and more into a long-term minority party as a result of these developments. The book is a must-read for scholars, students and policy-makers, interested in a better

understanding of comparative politics and devolution in general, as well as in the more specific case of the United Kingdom ' s electoral system.

This book will provide all the necessary materials to study FinTech Law in Indian Context. Fintech is composed up of financial breakthroughs like DeFi, ecommerce, peer-to-peer lending, and virtual currencies, as well as tech like AI, blockchain, IoT, and machine learning. Fintech Law Springer "The fielding of automated flight

controls and weapons systems in fighter aircraft from 1950 to 1980 challenged the significance ascribed to several of the pilots' historical skillsets, such as superb hand-eye coordination--required for aggressive stick-and-rudder maneuvering--and perfect eyesight and crack marksmanship--required for long-range visual detection and destruction of the enemy. Highly automated systems would, proponents argued, simplify the pilot's tasks while increasing his lethality in the air,

thereby opening fighter aviation to broader segments of the population. However, these new systems often required new, unique skills, which the pilots struggled to identify and develop. Moreover, the challenges that accompanied these technologies were not restricted to individual fighter cockpits, but rather extended across the pilots' tactical formations, altering the social norms that had governed the fighter pilot profession since its establishment. In the end, the skills that made a fighter pilot great in 1980

---

bore little resemblance to those of even thirty years prior, despite the precepts embedded within the "myth of the fighter pilot." As such, this history illuminates the rich interaction between human and machine that often accompanies automation in the workplace. It is broadly applicable to other enterprises confronting increased automation, from remotely piloted aviation to Google cars. It should appeal to those interested in the history of technology and

automation, as well as the general population of military aviation enthusiasts." --Provided by publisher.

An Introduction Taylor & Francis The rise of India and China as two major economic and political actors in

both regional and global politics necessitates an analysis of not only their bilateral ties but also the significance of their regional and global pursuits. This book looks at the nuances and politics that the two countries attach to multilateral institutions and examines how they receive, react to and approach each other ' s presence and upsurge. The driving theme of this book is to highlight the enduring and emerging complexities in India-China relations, which are multi-layered and polygonal in nature, and both a result and reflection of a

multipolar world order. The book argues that coexistence between India and China in this multipolar world order is possible, but that it is limited to a medium-term perspective, given the constraints of identity complexities and global aspirations these two rising powers are pursuing. It goes on to discuss how their search for energy resources, quest to uphold their own identity as developing powers, and engagement in balance-of-power politics to exert authority on each other ' s presence, are some elements that guide their non-cooperative

---

relationship. By explaining the foreign policy approaches of Asia's two major powers towards the growing Asian and global multilateralism, and highlighting the policies they carry towards each other, the book is a useful contribution to students and scholars of Asian Politics, Foreign Policy and International Relations.

The Devolution Gambit Naval Institute Press China and its neighbours face a series of water security issues, in which international law plays a vital role. Paramount to both policymakers and researchers in the field of water law, the current status of transboundary water cooperation schemes and how these operate in China is of global

significance. Grounded in international experience, this comprehensive volume provides readers with an up-to-date overview of current international transboundary water resource sharing policies and practices, including detailed case studies at both domestic and international levels. The authors discuss existing international laws, treaties, and principles that may stimulate transboundary water cooperation and dialogue, and then analyse a number of

---

international experiences with treaties in North America, Eastern Europe, and Central Asia. They take stock of China ' s water resource issues, legal practices and options, examine case studies of China ' s southern shared rivers, and explore some innovative approaches to cooperative management of shared waters within China. This book deals with child soldiers ' involvement in crimes under international law. Child soldiers are often victims of grave human rights abuses, and yet, in some cases, they also participate actively in inflicting violence upon others. Nonetheless, the international discourse on child soldiers often tends to ignore the latter dimension of children ' s involvement in armed conflict and instead focuses exclusively on their role as victims.

While it might seem as though the discourse is therefore beneficial for child soldiers as it protects them from blame and responsibility, it is important to realize that the so-called passive victim narrative entails various adverse consequences, which can hinder the successful reintegration of child soldiers into their families, communities and societies. This book aims to address this dilemma. First, the available options for dealing with child soldiers ' participation in crimes under

---

international law, such as transitional justice and criminal justice, and their shortcomings are analyzed in depth. Subsequently a new approach is developed towards achieving accountability in a child-adequate way, which is called restorative transitional justice. This book is in the first place aimed at researchers with an interest in child soldiers, children and armed conflict, as well as international criminal law, transitional justice, juvenile justice, restorative justice, children ' s rights,

and international human rights law. Secondly, professionals working on issues of transitional justice, juvenile justice, international criminal law, children ' s rights, and the reintegration of child soldiers will also find the subject matter of great relevance to their practice. John Wiley & Sons  
The Making of Modern English Theology is the first historical account of theology ' s modern institutional origins in the United Kingdom. Having avoided the revolutionary upheaval experienced by continental institutions and free from any constitutional separation of church and state, English theologians were granted a relative freedom to develop their discipline in a fashion distinctive from other

---

European and North American institutions. This book explores how Oxford theology, from the beginnings of the Tractarian movement until the end of the Second World War, both influenced and responded to the reform of the university. Neither becoming unbendingly confessional nor reduced to the secular study of religion, the Oxford faculty instead emerged as an important ecumenical body, rooted in the life and practice of the English churches, whilst still being

located in the heart of a globally influential research university as a department of the humanities. This is an institutional history of reaction and radicalism, animosity and imagination, and explores the complex and shifting interactions between church, nation, and academy that have defined theological life in England since the early nineteenth century.

The Beijing-Islamabad axis

plays a central role in Asia's geopolitics, from India's rise to the prospects for a post-American Afghanistan, from the threat of nuclear terrorism to the continent's new map of mines, ports and pipelines. China is Pakistan's great economic hope and its most trusted military partner; Pakistan is the battleground for China's encounters with Islamic militancy and the heart of its efforts to counter-balance the emerging US-India partnership. For decades, each country has been the other's only 'all-

weather' friend. Yet the relationship is still little understood. The wildest claims about it are widely believed, while many of its most dramatic developments are hidden from the public eye. This book sets out the recent history of Sino-Pakistani ties and their ramifications for the West, for India, for Afghanistan, and for Asia as a whole. It tells the stories behind some of its most sensitive aspects, including Beijing's support for Pakistan's nuclear program, China's dealings

with the Taliban, and the Chinese military's planning for crises in Pakistan. It describes a relationship increasingly shaped by Pakistan's internal strife, and the dilemmas China faces between the need for regional stability and the imperative for strategic competition with India and the USA. governance, as well as the theoretical orientations that have so far dominated the literature (networks, multilateralism, regimes, and so on). Revaluations in Rhetoric and Composition American Bar Association  
Economies of Writing advances scholarship on political economies of writing and writing instruction, considering them in terms of course subject, pedagogy, technology, and social practice. Taking the "economic" as a necessary point of departure and contention for the field, the collection

---

insists that writing concerns are inevitably participants in political markets in their consideration of forms of valuation, production, and circulation of knowledge with labor and with capital. Approaching the economic as plural, contingent, and political, chapters explore complex forces shaping the production and valuation of literacies, languages, identities, and institutions and consider their implications for composition

scholarship, teaching, administration, and public rhetorics. Chapters engage a range of issues, including knowledge transfer, cyberpublics, graduate writing courses, and internationalized web domains. Economies of Writing challenges dominant ideologies of writing, writing skills, writing assessment, language, writing technology, and public rhetoric by revealing the complex and shifting valuations of writing practices as they circulate

within and across different economies. The volume is a significant contribution to rhetoric and composition 's understanding of and ways to address its seemingly perennial unease about its own work.
