"This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics" (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we're starting to realize it's not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we're at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We're drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can't seem to live without. "When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences." -SF Gate "Freinkel's smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics." -Publishers Weekly "A compulsively interesting story. Buy it (with cash)." -Bill McKibben, author of *The End of Nature* "What a great read--rigorous, smart, inspiring, and as seductive as plastic itself." -Karim Rashid, designer

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and, to a much lesser extent, Afrikaans, but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools, which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students, not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

English is used in diplomatic contexts worldwide, including in situations where none of the interlocutors are native-speakers. This ground-breaking volume brings together the perspectives of researchers and practitioners to discuss the needs of those

using and learning English for Diplomatic Purposes. Chapter authors use concepts from sociolinguistics, World Englishes, Peace Linguistics and English as a Lingua Franca. Combined with this theoretical background is a pragmatic understanding of the work of diplomacy and the realities of communication, as well as exercises designed to help students, teachers and practicing diplomats reflect on, and develop, their language use. This book represents an important first step in the opening-up of English for Diplomatic Purposes as a distinct field of study and learning, and as such will be required reading for those working and studying in this area.

Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

"The Gift of the Magi" is a short story by O. Henry first published in 1905. The story tells of a young husband and wife and how they deal with the challenge of buying secret Christmas gifts for each other with very little money. As a sentimental story with a moral lesson about gift-giving, it has been popular for adaptation, especially for presentation at Christmas time.

*Assessing English Language Proficiency in U.S. K-12 Schools* offers comprehensive background information about the generation of standards-based, English language proficiency (ELP) assessments used in U.S. K-12 school settings. The chapters in this book address a variety of key issues involved in the development and use of those assessments: defining an ELP construct driven by new academic content and ELP standards, using technology for K-12 ELP assessments, addressing the needs of various English learner (EL) students taking the assessments, connecting assessment with teaching and learning, and substantiating validity claims. Each chapter also contains suggestions for future research that will contribute to the next generation of K-12 ELP assessments and improve policies and practices in the use of the assessments. This book is intended to be a useful resource for researchers, graduate students, test developers, practitioners, and policymakers who are interested in learning more about large-scale, standards-based ELP assessments for K-12 EL students.

Educating dual language learners (DLLs) and English learners (ELs) effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs "who account for more than 9 percent of enrollment in grades K-12 in U.S. schools" are struggling to meet the requirements for academic success, and their prospects for success in postsecondary education and in the

---

workforce are jeopardized as a result. Promoting the Educational Success of Children and Youth Learning English: Promising Futures examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

Life of Pi is a masterful and utterly original novel that is at once the story of a young castaway who faces immeasurable hardships on the high seas, and a meditation on religion, faith, art and life that is as witty as it is profound. Using the threads of all of our best stories, Yann Martel has woven a glorious spiritual adventure that makes us question what it means to be alive, and to believe.
