"Remarkable...Ekirch has emptied night's pockets, and laid the contents out before us." —Arthur Krystal, *The New Yorker*
Bringing light to the shadows of history through a "rich weave of citation and archival evidence" (*Publishers Weekly*), scholar A. Roger Ekirch illuminates the aspects of life most often overlooked by other historians—those that unfold at night. In this "triumph of social history" (*Mail on Sunday*), Ekirch's "enthraling anthropology" (*Harper's*) exposes the nightlife that spawned a distinct culture and a refuge from daily life. Fear of crime, of fire, and of the supernatural; the importance of moonlight; the increased incidence of sickness and death at night; evening

gatherings to spin wool and stories; masqued balls; inns, taverns, and brothels; the strategies of thieves, assassins, and conspirators; the protective uses of incantations, meditations, and prayers; the nature of our predecessors' sleep and dreams—Ekirch reveals all these and more in his "monumental study" (*The Nation*) of sociocultural history, "maintaining throughout an infectious sense of wonder" (*Booklist*).

At seventeen, Angela returns to the place where she was raised—a stunning island town that lies at the border of Canada and Minnesota—where she finds that an eager

developer is planning a hydroelectric dam that will leave sacred land flooded and abandoned. A Wagner Matinee Ballantine Books Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational

structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

New York : Modern Library, [c1922, 1931 printing]

Powerful D.C. politicians are being removed from office by something other than elections - execution-style killings for which FBI Special Agent Nick Nettles is under pressure to find answers and suspects. That's when a weapons smuggling investigation drops Nick in the middle of an international scheme to expand gun distribution, block tighter U.S. gun laws and manipulate the public conversation on Second Amendment rights. For Nick, a lawman and gun-control advocate, uncovering the truth is personal - and could destroy his career and rock the nation, from the heights of government and industry to every citizen. But he isn't alone - someone else has bought into the high-stakes game and is going all-in to run guns off the table. Who will win when Death calls? **THE STOUT STICK** is a work of fiction.

However, its central argument

we see as no less outrageous than those being presented by the gun manufacturers and their lobbies, or the so-called "public servants" who pander to those manufacturers and lobbies for campaign contributions. No less outrageous, either, than the attitudes of that small, but vocal, portion of the electorate that sees even reasonable limitations to gun ownership as assaults on the Constitution and their perceived "God-given rights."

From the celebrated bestselling author of *The House on Mango Street* and winner of the 2019 PEN/Nabokov Award for Achievement in International Literature. In this collection of her finest and best-known short essays, Natalia Ginzburg explores both the mundane details and inescapable catastrophes of personal life with the grace and wit that have assured her rightful place in the pantheon of classic mid-century authors. Whether she writes of the loss of a friend, Cesare Pavese; or what is inexpugnable of World War II; or the Abruzzi, where she

and her first husband lived in forced residence under Fascist rule; or the importance of silence in our society; or her vocation as a writer; or even a pair of worn-out shoes, Ginzburg brings to her reflections the wisdom of a survivor and the spare, wry, and poetically resonant style her readers have come to recognize. "A glowing light of modern Italian literature . . . Ginzburg's magic is the utter simplicity of her prose, suddenly illuminated by one word that makes a lightning streak of a plain phrase. . . . As direct and clean as if it were carved in stone, it yet speaks thoughts of the heart." — *The New York Times Book Review*
I Never Had It Made Barrons Educational Series
Winesburg, Ohio (1919) is Sherwood Anderson's masterpiece, a cycle of short stories concerning life in a small Ohio town at the end of the nineteenth century. At the centre is George Willard, a young reporter who becomes the confidant of the town's 'grotesques' - solitary figures unable to communicate with others. George is their conduit for expression and solace from loneliness, but he has his own longings which eventually draw him away from home to seek a career in the city. He carries with him the dreams and unuttered words of remarkable characters such as Wing Biddlebaum, the disgraced former teacher, and the story-telling Doctor Parcival. This new edition corrects errors in

earlier editions and takes into account major criticism and textual scholarship of the last several decades.

Strengthening Forensic Science in the United States Simon and Schuster First published in 1959, this pair of meditations by the revered civil-rights leader Martin Luther King, Jr. contains the theological roots of his political and social philosophy of nonviolent activism. Eloquent and passionate, reasoned and sensitive. " AT THE first National Conference on Christian Education of the United Church of Christ, held at Purdue University in the summer of 1958, Martin Luther King presented two notable devotional addresses. Moved by the dear and persuasive quality of his words, many of the 3000 delegates to the conference urged that the meditations be

made available in book form. They wanted the book for their own libraries and they were eager to share Dr. King's vital messages with fellow Christians of other denominations. "In the resolute struggle of American Negroes to achieve complete acceptance as citizens and neighbors the author is recognized as a leader of extraordinary resourcefulness, valor, and skill. His concern for justice and brotherhood and the nonviolent methods that he advocated and uses, are based on a serious commitment to the Christian faith. "As his meditations in this book suggest, Dr. King regards meditation and action as indivisible functions of the religious life. When we think seriously in the presence of the Most High, when in sincerity we "go up to the mountain of the Lord," the sure event is that "he will teach us of his ways, and we will walk in his paths" (Isaiah 2: 3). "

The Measure of a Man Under the Eye of the Clock
Big Brother gets up close and personal. Do you know about RFID (Radio Frequency Identification)? Well, you should, because in just a few short years, this explosive new technology could tell marketers, criminals, and government snoops

everything about you. Welcome to the world of spychips, where tiny computer chips smaller than a grain of sand will trace everyday objects and even people keeping tabs on everything you own and everywhere you go. In this startling, eye-opening book, you'll learn how powerful corporations are planning a future where: Strangers will be able to scan the contents of your purse or briefcase from across a room. Stores will change prices as you approach squeezing extra profits out of bargain shoppers and the poor. The contents of your refrigerator and medicine cabinet will be remotely monitored. Floors, doorways, ceiling tiles, and even picture frames will spy on you leaving virtually no place to hide. microchip implants will track your every move and even broadcast your conversations remotely or electroshock you if you step out of line. This is no conspiracy theory. Hundreds of millions of dollars have already been invested in what global corporations and the government are calling "the hottest new technology since the bar code." Unless we stop it now, RFID could strip away our last shreds of privacy and usher in a nightmare world of

total surveillance?to keep us all on Big Brother's very short leash. What critics are saying about Spychips, the book: Spychips "make[s] a stunningly powerful argument against plans for RFID being mapped out by government agencies, retail and manufacturing companies." ?Evan Schuman, CIO Insight "The privacy movement needs a book. I nominate Spychips." ?Marc Rotenberg, EPIC "Brilliantly written; so scary and depressing I want to put it down, so full of fascinating vignettes and facts that I can't put it down." ?Author Claire Wolfe Spychips "makes a very persuasive case that some of America's biggest companies want to embed tracking technology into virtually everything we own, and then study our usage patterns 24 hours a day. It's a truly creepy book and well worth reading." ?Hiawatha Bray, Boston Globe "You REALLY want to read this book." ?Laissez Faire South of Broad Simon and Schuster Literary Nonfiction. Ewa Hryniewicz-Yarbrough arrived in the United States from Poland in 1984, bringing memories of life under a totalitarian regime, where the personal was always political. In essay after essay in OBJECTS OF AFFECTION, her remarkable debut, Hryniewicz-Yarbrough shows the immigrant's double perspective, exploring a "bi-polar"

world of displacement and rootlessness, geography and memory, individual and family history, always with an acute awareness of losses and gains that accompany adaptation to a new language and culture and the creation of a new identity.
