The Englishwoman 's Review, which published from 1866 to 1910, participated in and recorded a great change in the range of possibilities open to women. The ideal of the magazine was the idea of the emerging emancipated middle-class woman: economic independence from men, choice of occupation, participation in the male enterprises of commerce and government, access to higher education, admittance to the male professions, particularly medicine, and, of course, the power of suffrage equal to that of men. First published in 1885, this thirty-seventh volume contains issues from 1905. With an

informative introduction by Janet Horowitz Murray and Myra Stark, and an index compiled by Anna Clark, this set is an invaluable resource to those studying nineteenth and early twentieth-century feminism and the women ' s movement in Britain.

The year 2008 marks the four hundredth anniversary of the first publication of King Lear, and for four

centuries the play has remained a consummate bibliographical mystery. Winner of the 2007 Jay L. Halio prize for best manuscript in Shakespeare studies, Shakespeare in Shorthand demonstrates that many textual anomalies derive from the play's transcription in Elizabethan shorthand. The shorthand system of John Willis, Stenographie (1602), shows a high correlation with the unusual textual features found in the first quarto of Lear (1608). The patterns of variants in the quarto conform to Willis' rules regarding the reduction of diphthongs and digraphs and the omission of aspirated, doubled, or unsounded letters. In the past two decades the textual interrelation of quarto and folio (1623) Lear has proven one of the most contested issues in Shakespearean studies, and an examination of Stenographie reveals that some of these textual differences result not from authorial revision, but from transmission in abbreviated writing. Bibliographical evidence also indicates that some textual omissions from the folio version are neither authorial nor theatrical, but derive from the printing house.
