An easy-to-teach course for pupils aged 10-14.  
**English Zone 2: Teacher's Book**  
Anchor  
"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities.  
Using a cognitive

behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to

---

move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18

lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's

website.

*Basic English for Nerds: English for Beginners, Basic English Guide, English Workbook, Learn English, Homeschool English*

"O'Reilly Media, Inc."

English Zone:

Audio CD 5

English Zone is a four-skills, six-level primary series that offers stimulating and diverse language learning

experiences. As they further their fluency in English, students engage in stimulating activities that link to school curriculum areas such as mathematics, social science, natural science, health, art, drama, and language arts. Special cross-curricular Zones in each unit offer content-based readings and task-based activities related to these subject areas. The series also directly addresses the importance of building literacy by presenting self-contained, high-

interest stories at each level.

Students are also introduced to a different set of characters who present language in real-life situations in meaningful and interesting ways. English Zone's comprehensive Teacher's Guide provides additional support material, techniques and activities for catering to multiple intelligences, as well as language support and strategies for building all four skills. The opportunity to apply English

---

skills to the range of experiences and activities students encounter in the school curriculum ensures that their language learning will assume a special richness.
