Ulysses chronicles the peripatetic appointments and encounters of Leopold Bloom in Dublin in the course of an ordinary day, 16 June 1904. Ulysses is the Latinised name of Odysseus, the hero of Homer's epic poem *Odyssey*, and the novel establishes a series of parallels between the poem and the novel, with structural correspondences between the characters and experiences of Leopold Bloom and Odysseus, Molly Bloom and Penelope, and Stephen Dedalus and Telemachus, in addition to events and themes of the early twentieth century context of modernism, Dublin, and Ireland's relationship to Britain. The novel imitates registers of centuries of English literature and is highly allusive. Ulysses' stream-of-consciousness technique, careful structuring, and experimental prose — full of puns, parodies, and allusions — as well as its rich characterisation and broad humour, made the book a highly regarded novel in the modernist pantheon. Joyce fans worldwide now celebrate 16 June as Bloomsday.

Secrets the Jesuits don't want Christians to know Out of Europe, a voice is heard from the secular world that documents historically the same information told by ex-priests. The author exposes the Vatican's involvement in world politics, intrigues, and the fomenting of wars throughout history. It appears, beyond any doubt, that the Roman Catholic institution is not a Christian church and never was. The poor Roman Catholic people have been betrayed by her and are facing spiritual disaster. Paris shows that Rome is responsible for the two great world wars. Author Edmond Paris explains why he wrote this book... "The public is practically unaware of the overwhelming responsibility carried by the Vatican and its Jesuits in the start of the two world wars -- a situation which may be explained in part by the gigantic finances at the disposition of the Vatican and its Jesuits, giving them power in so many spheres, especially since the last conflict." "In fact, the part they took in those tragic events has hardly been mentioned until the present time, except by apologists eager to disguise it. It is with the aim of rectifying this and establishing the true facts that we present in this and other books the political activity of the Vatican during the contemporary -- activity which mutually concerns the Jesuits." "This study is based on irrefutable archive documents, publications from well-known political personalities, diplomats, ambassadors and eminent writers, most of whom are Catholics, even attested by the imprimatur."

Beyond the Light Barrier is the autobiographical story of Elizabeth Klarer, a South African woman and Akon, an astrophysicist from Meton, a planet of Proxima Centuri that, at a distance of about 4.3 light years, is our nearest stellar neighbor. Elizabeth was taken in his spaceship to Meton, where she lived with him and his family for four months and where she bore his child. Her life on Meton is fascinatingly described. Akon brought Elizabeth back to Earth after the birth of their son, and continued to visit her thereafter. Akon explained how his spaceship's light-propulsion technology operated, and how it allowed him and his people to travel across vast interstellar distances. This technology is explained in detail in the book. Elizabeth was given a standing ovation at the 11th International Congress of UFO Research Groups at Weisbaden in 1975, and her speech as guest of honor was applauded by scientists of twenty-two nations. Light Technology Publishing is proud to bring you the long-awaited American edition in both hard copy and electronic format of Beyond the Light Barrier, which was first published in English in 1980

Living on a damaged planet challenges who we are and where we live. This timely anthology calls on twenty eminent humanists and scientists to revitalize curiosity, observation, and transdisciplinary conversation about life on earth. As human-induced environmental change threatens multispecies livability, Arts of Living on a Damaged Planet puts forward a bold proposal: entangled histories, situated narratives, and thick descriptions offer urgent " arts of living. " Included are essays by scholars in anthropology, ecology, science studies, art, literature, and bioinformatics who posit critical and creative tools for collaborative survival in a more-than-human Anthropocene. The essays are organized around two key figures that also serve as the publication ' s two openings: Ghosts, or landscapes haunted by the violences of modernity; and Monsters, or interspecies and intraspecies sociality. Ghosts and Monsters are tentacular, windy, and arboreal arts that invite readers to

encounter ants, lichen, rocks, electrons, flying foxes, salmon, chestnut trees, mud volcanoes, border zones, graves, radioactive waste—in short, the wonders and terrors of an unintended epoch.
