A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities.

As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. The Financial Valuation Group (FVG) in Tampa, Florida. The Complete Lean Enterprise epubli This book comes out at a very opportune time when the sector is struggling with sanitation marketing that is considered an organic next step for rural communities that have been declared open defecation free. Besides, this publication comes in to address the gaps that face the peri-urban spaces that are facing population explosion and require innovative ways of dealing with

mostly non-sewered sanitation services. This guide/manual was developed as part of a training package to support business development skills training for local sanitation entrepreneurs in Kenya. Financial and technical support was provided by the United States Agency for International Development (USAID) under the Kenya integrated water and sanitation (KIWASH) project. KIWASH was a five year (2015-2020) project implemented by the Development Alternatives Incorporation (DAI) across nine counties.

One of the key goals of KIWASH was to help trigger and activate demand for low cost affordable sanitation technologies in rural and low income communities. The overall objective of this manual is to equip sanitation specialists and public resource persons with the basic concepts and tools, to facilitate entrepreneurship and financial literacy training for start-up sanitation entrepreneurs in rural communities. Specifically, this manual is designed to help participants:

---

of successful entrepreneurs; 2) Learn and practice essential marketing techniques for sanitation products and services; 3) Develop money management competencies necessary to succeed as a small-scale entrepreneur; 4) Build necessary leadership and management skills to grow successful sanitation enterprises.
