[Buying And Selling A Business](#) Cengage Learning

If you want to start a business but don't know where to start, don't worry you are not alone. In fact, given the new economic reality of our time, more people than ever before have found the "job" they thought was waiting for them doesn't exist. Others have come to the conclusion that they would rather create work they love, constructed to fit with their own life goals. No matter what the motivation is to be your own boss, you can start today. There is no limit when it comes to achieving success, and as an entrepreneur it is important that you never stop climbing the ladder. In order to help you crack the code of entrepreneurship, Larry W. Brooks has put together a combination of 6 keys that will unlock your success as an entrepreneur.

A comprehensive introduction to the economics of local economic development. The approach is people centered and recognizes contributions from other social sciences.

Core Collection Hodder Education

Organizations today need to continually implement new strategies that increase the sustainability and competitiveness of a business. By sharing experiences in a collaborative environment where the collective experience of its membership can lead to the design and implementation of new technology and product improvement, a company can differentiate itself to successfully compete in the business realm. Strategic Collaborative Innovations in Organizational Systems is a collection of research on the methods and applications of collaborative strategies in advancing the efficiency and effectiveness of a firm. Highlighting a range of topics including organizational design, productivity strategies, and workforce diversity, this book is ideally designed for academicians, business managers, entrepreneurs, human resources managers, researchers, graduate students, and scholars seeking current research on business and competitive strategies within a collaborative and organizational context.

In *Conducting Research Interviews*, Catherine Cassell guides you through conceptualizing the interview, preparing for the research interview, conducting the interview, examples, conclusions and next steps. Ideal for Business and Management students reading for a Master's degree, each book in the series may also serve as reference books for doctoral students and faculty members interested in the method. Part of SAGE's Mastering Business Research Methods Series, conceived and edited by Bill Lee, Mark N. K. Saunders and Vadake K. Narayanan and designed to support researchers by providing in-depth and practical guidance on using a chosen method of data collection or analysis. Watch the editors introduce the Mastering Business Research Methods series.

[Sustaining Entrepreneurship and Economic Growth](#)

Entrepreneurship and Business Management Globalization has fueled the growth of entrepreneurship. Starting a new venture involves risk taking as well as capital investment. This book delves into all the varied aspects of entrepreneurship. The impact of economic policies, finances, opportunity and capacity are some of the topics covered in this text. It will prove beneficial to students, scholars, professionals, aspiring entrepreneurs, etc. *Entrepreneurship Strategy* Dana K. Keller and Mary Lou Casadevall-Keller provide readers with a highly accessible introduction to the fundamental concepts of research methods in *The Tao of Research: A Path to Validity*. This brief, engaging book approaches the topic of research through an exploration of the issues that threaten validity in the process of knowledge generation. Key Features Examines the propositional, ethical, structural, functional, and technical restrictions researchers face Focuses on understanding how these restrictions influence research methods and results Makes concepts more accessible through discussions that follow the experiences of three "guides"—a high school principal, a statewide director of public health, and a sociology professor at a small liberal arts college. *The Tao of Research: A Path to Validity* serves as either a main or supplemental text for courses such as *Introduction to Research Methods*, *Social Research Methods*, and *Applied Research Methods*.

[Entrepreneur Code](#) SAGE

For many the dream of owning their own business remains just that. Even if you have a great idea, the work and money involved in building a business from the ground up can prove too daunting. What few aspiring entrepreneurs realise is that buying an already existing business can be far easier, sometimes possible with little or no money at all, and can be just as satisfying a route to self-sufficiency. In easy-to-follow language, *Buying and Selling a Business* takes you through the entire process, from identifying your

target business and assembling the right team to help you, to valuation, agreeing terms and finding the necessary finance. Just as importantly, Haigh helps you ensure your deal is the right deal for you, offering advice on running the business you buy and implementing proper exit strategies from the start. With valuable appendices containing typical documentation, and how to read them, Jo Haigh's book is a one-stop resource to closing the deal and transforming your life.

[Economic and Management Sciences. Grade 8](#) SAGE

The Founder's Dilemmas examines how early decisions by entrepreneurs can make or break a startup and its team. Drawing on a decade of research, including quantitative data on almost ten thousand founders as well as inside stories of founders like Evan Williams of Twitter and Tim Westergren of Pandora, Noam Wasserman reveals the common pitfalls founders face and how to avoid them.

[The Illusions of Entrepreneurship](#) Washington : Library of Congress, Processing Department, Subject Cataloging Division

Phrases such as 'corporate culture', 'market culture' and the 'knowledge economy', have now become familiar clarion calls in the world of work. They are calls that have echoed through organizations and markets. Clearly something is happening to the ways markets and organizations are being represented and intervened in and this signals a need to reassess their very constitution. In particular, the once clean divide that placed the economy, dealt with mainly by economists, on one side, and culture, addressed chiefly by those in anthropology, sociology and the other 'cultural sciences', on the other, can no longer hold. This volume presents the work of an international group of academics from a range of disciplines including sociology, media and cultural studies, social anthropology and geography, all of whom are involved not only in thinking 'culture' into the economy but thinking culture and economy together.

[Subject Headings Used in the Dictionary Catalogs of the Library of Congress \[from 1897 Through June 1964\]](#) Springer

Academic research on developed countries has scientifically evaluated the role of entrepreneurship on economic growth, market expansion, commercializing innovation, and reducing unemployment. In this research, regions or industries with higher rates of entrepreneurship show higher levels of innovation and economic growth. The literature on entrepreneurship and innovation has largely ignored developing countries, despite the positive results from new venture investments in India, China, and elsewhere. This volume bridges this gap by bringing together research by scholars in Germany and India, whose analysis of entrepreneurship, innovation, and economic development in their respective countries reveals commonalities. Covering such timely issues as R&D and labor policies and including case examples from the chemical, biotech, and IT industries, the authors offer insight into the entrepreneurial process. The volume concludes with a discussion of the global implications for entrepreneurship research and policy.

[African Entrepreneurship](#) FT Press

Faced with chaotic environments, it is not possible to make totally efficient forecasts, especially when it is necessary to analyze events with multiple variables and micro, small, and medium enterprises (MSMEs) constantly face events that escape the laws of the market. The handling that has been given to the crisis caused by the coronavirus has been trial and error, and the economic, social, and environmental results remain to be seen. The markets and the world are chaotic. With the markets in chaos due to the COVID-19 pandemic, it is important to look at the methods used in these environments to promote business success. *The Handbook of Research on Management Techniques and Sustainability Strategies for Handling Disruptive Situations in Corporate Settings* elaborates on the skills, techniques, and tools that are more useful for these environments and identifies what makes companies that work well in organizational chaos and in chaotic economic environments perform better than companies that are well organized. Covering topics such as strategic management, multidimensional chaos approach, and the global unstable market, this book is essential for managers, executives, academicians, policymakers, entrepreneurs, researchers, undergraduate and graduate business students, and any person interested in state-of-the-art business issues.

In this engaging and practical book, authors Lisa K. Gundry and Jill R. Kickul uniquely approach entrepreneurship across the life cycle of business growth—offering entrepreneurial strategies for the emerging venture, for the growing venture, and for sustaining growth in the established venture. Written from the point of view of the founder or the entrepreneurial team, the book offers powerful and practical tools to increase a venture's potential for success and growth.

[Local Economic Development](#) Springer Science & Business Media

European private equity investment reached €47 billion in 2005, up 27% from 2004. Funds raised for private equity were €72 billion, up 250% on the previous year, both figures being all time highs. Raising Venture Capital Finance in Europe provides business owners, entrepreneurs and investors alike with a step-by-step approach to exploiting this market and funding new projects effectively. Written by Keith Arundale, an advisor and commentator on the European and US VC and private equity industry for over 20 years, the guide blends business experience with practical approaches to enable the reader to maximize the opportunities available. The book includes a series of real-life case studies from venture capitalists and entrepreneurs from around Europe, each with practical tips for successful venture capital finance raising. With forewords from Sir Paul Judge (Chairman, Enterprise Education Trust) and Patrick Sheehan (Chairman, Venture Capital Committee, European Private Equity and Venture Capital Association) the book begins with a brief introduction to the field, including an analysis of current trends and issues in the industry, and goes on to provide a detailed framework for an objective assessment of each business opportunity. The book looks at sources of finance and private equity, shows how to write a successful business plan, details the entire investment process, and considers the tax and legal issues involved. A particular feature of the book is that it looks at the topic from both sides - showing what the venture capitalist is looking for as well as detailing how an entrepreneur or business owner can make proposals attractive to those investors. This means that the reader will be able to minimize time wasted on unnecessary activities and therefore develop investment approaches which are succinct, relevant, and give every chance of success.

We also expect that the future Workshop will be as successful and stimulating, as indicated by the contributions presented in this volume.

[Willing's Press Guide](#) Piatkus

The #1 international bestselling author of *The Gray Rhino* offers a bold new framework for understanding and re-shaping our relationship with risk and uncertainty to live more productive and successful lives. What drives a sixty-four-year-old woman to hurl herself over Niagara Falls in a barrel? Why do we often create bigger risks than the risks we try to avoid? Why are corporate boards newly worried about risky personal behavior by CEOs? Why are some nations quicker than others to recognize and manage

risks like pandemics, technological change, and climate crisis? The answers define each person, organization, and society as distinctively as a fingerprint. Understanding the often-surprising origins of these risk fingerprints can open your eyes, inspire new habits, catalyze innovation and creativity, improve teamwork, and provide a beacon in a world that seems suddenly more uncertain than ever. How you see risk and what you do about it depend on your personality and experiences. How you make these cost-benefit calculations depend on your culture, your values, the people in the room, and even unexpected things like what you've eaten recently, the temperature, the music playing, or the fragrance in the air. Being alert to these often-unconscious influences will help you to seize opportunity and avoid danger. *You Are What You Risk* is a clarion call for an entirely new conversation about our relationship with risk and uncertainty. In this ground-breaking, accessible and eminently timely book, Michele Wucker examines why it's so important to understand your risk fingerprint and how to make your risk relationship work better in business, life, and the world. Drawing on compelling risk stories around the world and weaving in economics, anthropology, sociology, and psychology research, Wucker bridges the divide between professional and lay risk conversations. She challenges stereotypes about risk attitudes, re-frames how gender and risk are related, and shines new light on generational differences. She shows how the new science of "risk personality" is re-shaping business and finance, how healthy risk ecosystems support economies and societies, and why embracing risk empathy can resolve conflicts. Wucker shares insights, practical tools, and proven strategies that will help you to understand what makes you who you are –and, in turn, to make better choices, both big and small.
