While private, for-profit businesses have typically been the most experienced with entrepreneurship, the study of public sector business models is coming to the forefront of entrepreneurial discussions. This shift has allowed researchers and practitioners to expand on their knowledge of positive business choices and paved the way for more profitable business empires. Public Sector Entrepreneurship and the Integration of Innovative Business Models is a comprehensive source of academic research that discusses the latest entrepreneurial strategies, achievements, and challenges in public sector contexts. Highlighting relevant topics such as public management, crowdsourcing, municipal cooperation, and public sector marketing, this is an ideal resource for managers, practitioners, researchers, and professionals interested in learning more about public sector business ideals, and how these models are shaping positive entrepreneurial communities around the world. Entrepreneurship & Business Management OUP Oxford Developed especially for the TVET student at N6 level, Succeed in Entrepreneurship and Business Management N6 provides students with the necessary theoretical knowledge to write their exams and the practical application to enter the workplace confidently.

Public sector entrepreneurship refers to innovative public policy initiatives that generate greater economic prosperity. These initiatives can transform a status quo economic environment into one that is more conducive to economic units engaging in creative and innovative activities in the face of uncertainty. Public Sector Entrepreneurship traces the historical development of the concepts of private and public sector entrepreneurship and their connection to the separate notions of risk and uncertainty. Based on a formal conceptualization of these notions, the book illustrates throughout public sector entrepreneurship in practice using examples from U.S. technology and innovation policy.

Technology policy-policy to enhance the application of new knowledge, learned through science, to some known problem-and innovation policy-policy to enhance the commercialization of a technology-are quintessential examples of the public sector recognizing and exploiting opportunities to bring about change and efficiency. Using this concept of public sector entrepreneurship as the lens to view the Bayh-Dole Act of 1980, the Stevenson-Wydler Act of 1980, the R&E Tax Credit of 1981, Small Business Innovation Development Act of 1982, the National Cooperative Research Act of 1984, and the Omnibus Trade and Competitiveness Act of 1988 affords us the ability to find elements of commonality among these policies and to discuss their impact on the U.S. economy from the perspective of entrepreneurial action.

Critics have praised either "Hamlet" or "King Lear" as the greatest of Shakespeare's "mature" tragedies. Ernst Honigmann, in the most significant edition of the play for a generation, asks: why not "Othello"? This edition sheds new light on the text of the play as we have come to know it, and on our knowledge of its early history.

This is the updated edition of a medical handbook that deals with basic paediatric and childhood conditions. The book deals with these issues in an accessible, clear, and concise manner. The South African Government's focus on the provision of primary health care makes this text particularly valuable as it deals with paediatric issues related to primary health. Due to a shortage of doctors, nursing staff are expected to provide necessary services. This book equips nurses with the skills to deal with the required procedures. The book is therefore aimed primarily at nurses and, being written by paediatricians, is medically sound. It has been overviewed for relevance to nurses. It presents theory in an interactive fashion, to ensure that training takes place for nurses who are required to take on more and more responsibilities in primary health care facilities.

"A good balance between theory and practice . . . it definitely fills a void in the [lack of] texts in the area and the change literature in general . . . a good fit for my graduate class on 'Managing

Organizational Change." —Anthony F. Buono, McCallum Graduate School of Business, Bentley College "Like Gareth Morgan's Images of Organization, this book is a superb blend of theory and practicality. It demystifies chaos and paradox, and it encourages the understanding of organizational dynamics from multiple perspectives. It is refreshing to read a book that presents diverse theories and interventions so even-handedly." —Andrea Markowitz, Ph.D., President, OB&D, Inc. Learning to Change: A Guide for Organizational Change Agents provides a comprehensive overview of organizational change theories and practices developed by both U.S. and European change theorists. The authors compare and contrast five fundamentally different ways of thinking about change: yellow print thinking, blue print thinking, red print thinking, green print thinking and white print thinking. They also discuss in detail the steps change agents take, such as diagnosis, change strategy, the intervention plan, and interventions. In addition, they explore the attributes of a successful change agent and provide advice for career and professional development. The book includes case studies that describe multiple approaches to organizational change issues. This book will appeal to both the practitioner and academic audiences. It can be used as a text in graduate courses in change management and will also be a useful reference for consultants and managers. Features: Discusses the abilities, attitudes, and styles of successful change agents Describes five fundamentally different ways of thinking about change Presents a state-of-the-art overview of change management insights, methods, and instruments Summarizes an extensive amount of organizational change literature Supplies readers with useful insights and courses of action that will allow them to design and implement change professionally Learning to Change became a bestseller upon its initial publication in the Netherlands. The color-model on change is very popular among thousands of managers and change consultants and presents a new approach to change processes and a new language for change.

Max Boisot was one of the most original thinkers in management and organization studies. An independent scholar with an independent, enquiring, and innovative mind, his work ranged over a number of different areas from early attempts to understand contemporary developments in China to the role of information in organizations, and later the management of Big Science. Yet, as this book shows, there was a central strand that ran through these apparently diverse areas, which was the attempt to understand the relationship between knowledge and information, and its organization — in firms, organizations, and societies — by means of the model Boisot developed, the 'I-Space'. Knowledge, Organization, and Management brings together key examples of Max Boisot's work into a single volume, setting these alongside original, extended commentaries and reflections by his academic collaborators. Structured under five core sections, it covers the main areas in which he forged new understandings: analyses of the Chinese system; organizational complexity; the strategic management of knowledge; knowledge in Big Science; and innovations in education. A further section includes six reflective essays by Boisot's collaborators. The book will be invaluable to organization and management scholars, students, and intellectually curious practitioners.

Hunt convincingly demonstrates that competition is not about dividing up limited resources but about creating more resources and thus competition is pro-society. This truly interdisciplinary book successfully develops a general theory of competition which is rich in explanatory breadth and depth. Consequently, executives and entrepreneurs, management consultants, public makers, and scholars and students in economics, law, political science, and business should read and study this book. —Robert F. Lusch, University of Oklahoma This book develops a new theory of competition. This theory — labeled "resource-advantage theory" — stems from no single research tradition, but draws on several different traditions in economics, management, marketing, and sociology. In this ground-breaking volume, Shelby Hunt articulates R-A theory, uses the theory to explain and predict economic phenomena, and shows how

(and why) it explains and predicts such phenomena. A stunning collection of cutting-edge essays which brings together the leading scholars in visual research. Clearly structured, and written in an engaging and accessible style throughout, this invigorating work will be the must have text for teachers and students of the visual across the arts, humanities and social sciences. - Elaine Campbell, Reader in Criminology, Newcastle University This is a book about research that takes the challenge of the internet seriously, that rises above disciplinary difference and points to new directions for social research. - Rob Walker, Emeritus Professor, University of East Anglia This innovative book examines and introduces cutting edge visual methods in social research. It explores the development of visual methodology as a field of interdisciplinary and post-disciplinary practice spanning scholarly and applied concerns. Positioned at the innovative edge of theory and practice in contemporary visual research, Pink's engaging book goes beyond the methods, ideas and fields of practice outlined in existing texts and handbooks. This book examines: -How new theoretical and methodological engagements are developing and emerging in research practice; -the impact new approaches are having on the types of knowledge visual research produces and critiques; -the ways visual research intersects with new media; -and the implications for social and cultural research, scholarship and intervention. This book will be essential reading for any student or researcher thinking of using visual methods in their own research. Sarah Pink is Professor of Social Sciences at Loughborough University.
