Too often, innovative individuals and teams come up with new-business ideas only to hit the proverbial wall, become discouraged, and fail to follow through. How can you get more traction with your ideas and see them through to fruition? As with so many things in life, half the battle is knowing what questions to ask. In this book, serial entrepreneur and business professor Jim Price illustrates a simple, yet powerful framework known as the Launch Lens. Price's method leads innovators through a structured process to clearly define and communicate their concept, distinguish the good ideas from the not-so-good, and lay the cornerstones of the startup planning process. The Launch Lens is comprised of twenty critical questions or Focal Points, organized according the classic new-business planning categories: problem, solution, market, business model, marketing and sales, finance, capital, and team. The book leads

readers through explanations of how to address each question, illustrated by useful examples, tips, and red flags. Already in active use by thousands of innovators - ranging from aspiring entrepreneurs to early-stage startup teams and venture investors, from incubators and accelerators to intrapreneurs within established corporations and non-profits - The Launch Lens can help you bring your new-business concepts into clear focus.

As part of a way of redefining how people undertake, this book is written with the whole purpose that the reader can understand some of the fundamental notions about the economy and entrepreneurship. This writing is a well-structured guide that tries to instill in the reader the habit of a good entrepreneur, to help him in the future, to develop potential ideas; this is achieved by giving a better concept about entrepreneurship ideas, such as startup methodologies or the creation of a business model. -From the author-. I dare say that whoever reads this work seeks to redirect his lifestyle, although I am afraid to tell him that it will not be possible unless the change is in his person, a person forges dreams but is unlikely to execute them, that is why You must have the will power to make a significant change, it is necessary to leave the comfort zone to which we have become so accustomed, a life of luxury does not come by itself, reaching financial freedom is synonymous with effort, work and will . Positivism is a powerful tool, adversities can hit hard, but knowing how to face them are the key to success in a nutshell. Creativity will also play a very important role in achieving "successful entrepreneurship", not all are born as creative geniuses, despite the fact that this influences one way or another; we can develop creativity to find market ideas with high potential. We must know how to recognize what we are good at and what we are not so good at, in order to find the ideal market that suits us and which we can take advantage of. When you make a first approach to the subject of entrepreneurship, you get the impression that it is a very recent and current phenomenon, a phenomenon of the 21st century, but in reality, entrepreneurship has existed throughout the history of humanity. In fact, the fact that today we can enjoy comforts because of technological development or inventions is because at a certain moment the invention was transformed into a marketable product through the entrepreneurial activity of a person who saw that, from his product, a profit was born. So we can say that the foundations of entrepreneurship are more than grounded, it is not a new "fashion" typical of the 2000s, history has been in charge of shaping it, which allowed all the concepts and ideas covered by entrepreneurship to be well reflected and that they can be considered fixed concepts that will be invariant over the years. It cannot be said that capturing all these concepts in this work

has been a titanic task, however, behind the scenes there was a whole process, from research to writing, this work promises, among other things, to clarify what entrepreneurship is from a new point of view, the questions, which will develop in the reader a new perception of ideas. Courtney Price Answers the Most Asked Questions from Entrepreneurs SBPD Publications
Taboo Business Questions is a business book unlike any other you've ever read. It will challenge you. It will help you process business ideas. It will allow you access to a community of great minds with a

wide variety of viewpoints. Simply put; it will help you answer questions you didn't even know you had so your business can thrive. I specifically wrote this book for entrepreneurs, small business owners, and business leaders, probably just like you. It started out with this crazy idea. An idea that small business owners had these certain questions they needed answered. But, didn't know how to (or didn't want to) ask. I believe that when a question can be phrased just right, the answer becomes obvious. So, I've set out to help you and many others get your answers. Throughout my time consulting, I've noticed that business owners are of a different breed. Maybe you've noticed this, too! They work these crazy hours, take on stress like it's no big deal, and never want to let it be known that they don't know something in their business. This is exactly why I wrote Taboo Business Questions. I recognized that business owners' egos get in the way from allowing them to ask the tough questions necessary to grow their business. Avoiding these questions tends to hurt a business's growth. So, I took seven taboo business topics and reformatted them into Taboo Business Questions. The whole goal with this book is to create a safe place where business owners can find a process to answering challenging questions about their business and keep their egos intact. I formatted each answer in the form of a process. I didn't want the book to be a "formulas and spreadsheets" type of business book. Everyone has a unique business. I didn't want the book to be filled with case studies on businesses from the 60s and 70s by an armchair quarterback. What good is that going to do? Business owners today need tools they can use and a process they can follow. Part of this process is accessing and participating in the forum I created on my website. It goes hand-in-hand with the whole premise of the book. With this forum, collaboration can happen organically among business owners, entrepreneurs, and other business savvy individuals with anonymity. I hope you enjoy the process!
