Canadian Book Review Annual Simon and Schuster

Science is undergoing an identity crisis! A renown psychologist and biologist diagnoses our age of wishful, magical thinking and blasts out a clarion call for a return to reason and the search for objective knowledge and truth. Fans of Matt Ridley and Nicholas Wade will adore this trenchant meditation and call to action. Science is in trouble. Real questions in desperate need of answers—especially those surrounding ethnicity, gender, climate change, and almost anything related to ' health and safety ' —are swiftly buckling to the fiery societal demands of what ought to be rather than what is. These foregone conclusions may be comforting, but each capitulation to modernity ' s whims threatens the integrity of scientific inquiry. Can true, fact-based discovery be redeemed? In *Science in an Age of Unreason*, legendary professor of psychology and biology, John Staddon, unveils the identity crisis afflicting today ' s scientific community, and provides an actionable path to recovery. With intellectual depth and literary flair, Staddon answers pressing questions, including: Is science, especially the science of evolution, a religion? Can ethics be derived from science at all? How sound is social science, particularly surrounding today ' s most controversial topics? How can passions be separated from facts? Informed by decades of expertise, *Science in an Age of Unreason* is a clarion call to rebirth academia as a beacon of reason and truth in a society demanding its unconditional submission.

Environmental Science Chartwell

Describes educational uses for the Internet, tells how to navigate the Internet, and surveys resources in the areas of art, music, drama, foreign languages, math, science, social studies, and geography.

From the critically acclaimed author of *THIS BOOK IS GAY*, James Dawson, now writing as Juno Dawson From the critically acclaimed author of *THIS BOOK IS GAY*, James Dawson, now writing as Juno Dawson. We all have a mind, so we all need to take care of our mental health as much as we

need to take care of our physical health. And the first step is being able to talk about our mental health. Juno Dawson leads the way with this frank, factual and funny book, with added information and support from clinical psychologist Dr Olivia Hewitt. Covering topics from anxiety and depression to addiction, self-harm and personality disorders, Juno and Olivia talk clearly and supportively about a range of issues facing young people's mental health - whether fleeting or long-term - and how to manage them. With real-life stories from young people around the world and witty illustrations from Gemma Correll.

It prepares you for the world of work by showing how the skills you learn at university today can be used in your career choice of tomorrow.

Simon & Schuster Super Crossword Puzzle Dictionary And Reference Book Merrill Publishing Company

Updated with the latest data from the field, *Environmental Science: Systems and Solutions*, Fifth Edition explains the concepts and teaches the skills needed to understand multi-faceted, and often very complex environmental issues. The authors present the arguments, rebuttals, evidence, and counterevidence from many sides of the debate. The Fifth Edition includes new Science in Action boxes which feature cutting-edge case studies and essays, contributed by subject matter experts, that highlight recent and ongoing research within environmental science. With an "Earth as a system" approach the text continues to emphasize Earth's intricate web of interactions among the biosphere, atmosphere, hydrosphere, and lithosphere, and how we are central components in these four spheres. This flexible, unbiased approach highlights: 1. how matter cycles over time through Earth's systems 2. the importance of the input-throughput-output processes that describe the global environment 3. how human activities and consumption modify Earth's systems 4. and the scientific, economic, and policy solutions to environmental problems
