In *Reading in the Wild*, reading expert Donalyn Miller continues the conversation that began in her bestselling book, *The Book Whisperer*. While *The Book Whisperer* revealed the secrets of getting students to love reading, *Reading in the Wild*, written with reading teacher Susan Kelley, describes how to truly instill lifelong "wild" reading habits in our students. Based, in part, on survey responses from adult readers as well as students, *Reading in the Wild* offers solid advice and strategies on how to develop, encourage, and assess five key reading habits that cultivate a lifelong love of reading. Also included are strategies, lesson plans, management tools, and comprehensive lists of

recommended books. Copublished with Editorial Projects in Education, publisher of *Education Week* and *Teacher* magazine, *Reading in the Wild* is packed with ideas for helping students build capacity for a lifetime of "wild" reading. "When the thrill of choice reading starts to fade, it's time to grab *Reading in the Wild*. This treasure trove of resources and management techniques will enhance and improve existing classroom systems and structures." —Cris Tovani, secondary teacher, Cherry Creek School District, Colorado, consultant, and author of *Do I Really Have to Teach Reading?* "With *Reading in the Wild*, Donalyn Miller gives educators another important book.

She reminds us that creating lifelong readers goes far beyond the first step of putting good books into kids' hands." —Franki Sibberson, third-grade teacher, Dublin City Schools, Dublin, Ohio, and author of *Beyond Leveled Books* "Reading in the Wild, along with the now legendary *The Book Whisperer*, constitutes the complete guide to creating a stimulating literature program that also gets students excited about pleasure reading, the kind of reading that best prepares students for understanding demanding academic texts. In other words, Donalyn Miller has solved one of the central problems in language education." —Stephen Krashen, professor emeritus, University of Southern California

The fifth edition of this critically acclaimed approach to curriculum planning continues to receive accolades for its balanced presentation, pertinent case studies, and advice from practicing educators. It skillfully interweaves the themes of

multicultural education, constructivism, and education reform. The author documents the latest trends, such as e-learning, blended learning and flipped learning, the controversial Common Core State Standards, and the impact of technology in our schools, including the BYOD (bring your own device) movement, digital citizenship, and technological literacy. This well-researched text spotlights ways to involve parents, students, and

teachers in the curriculum-planning process and engages the reader in critical thinking and analysis about curriculum planning and education reform.

These new model core teaching standards outline what all teachers across all content and grade levels should know and be able to do to be effective in today's learning contexts. They are a revision of the 1992 model standards, in response to the need for a new vision of teaching to meet the needs of

next generation learners. This document incorporates changes from a public feedback period in July 2010.

The Leader in Me Pearson
Scott Foresman

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that

programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits,

that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Give your students a foundation of algebra for math success – now and in the future! Algebra is not something to be feared, but something to be embraced with a sense of wonder. Planting the Seeds of Algebra, 3-5, introduces algebra as an accessible way of seeing the world that is necessary to our students' futures. Students and teachers

must become friendly with algebraic foundations, as they have increasingly become the gateway to careers in the STEM fields. Monica Neagoy empowers teachers with theoretical and practical ways to introduce Algebra to 3-5 grade students, making vital connections to concepts they will encounter in middle school and beyond. You'll discover Four explorations to help you weave key algebraic ideas into everyday mathematics

Step-by-step lessons from real classrooms that will guide you in teaching concepts and in establishing their relevance and applicability. New teaching methods that break down difficult algebraic concepts and build a critical foundation for higher math. Awaken new awareness and change attitudes by sowing the seeds for a vibrant, useful, and rich experience with mathematics. "While reading this book I

experienced the sense of wonder and aha moments alongside the students themselves. This book will move your faculty to new depths of understanding about mathematics and will instill the passion to explore a myriad of algebraic concepts." — Bob Weiman, Director St. Stephen's & St. Agnes School "She's done it again! Monica Neagoy has authored another book that deftly presents important foundations of algebra while celebrating

mathematics through carefully crafted explorations, all of which include student and teacher vignettes and comments about the mathematics they have learned and are teaching. Wow.
