A Year of PR: A Collection from an Educational Service Center is unlike any

other public relations book for schools. It offers a year ' s worth of press releases involving real schools, their students, faculty, and administrators, and covers a plethora of topics—from general operations and building upgrades to fund-raising and human interest features—all of which aim to inspire principals and superintendents to write and share their own positive public relations. With so much media coverage these days focusing on school violence, troubled youth, and funding issues, the general public may not be aware of all the good things happening within their local schools ' walls: Students are working hard to surpass academic goals, perform athletic feats, embrace new technology, and help others—making the world a better place. Take a page from A Year of PR and highlight your own school district with a smart press release plan.

Let the community know what your students are up to. Shine a light on teachers who go the extra mile, community leaders who get involved with the schools, and interesting people who have a positive impact on the district. By keeping people informed, you improve relations between schools and communities and keep residents invested in their district. Moreover, a good public relations strategy presents an opportunity to show stakeholders the positive impact that faculty, staff, administrators, board members, and most importantly, students make in our communities.

Envision Math Common Core Reteaching and Practice Workbook, Grade 4 Carson-Dellosa Publishing
This book highlights new developments in the teaching and learning of algebraic thinking with 5- to 12-year-olds. Based on empirical findings gathered in several countries on five continents, it provides a wealth of best practices for teaching early

algebra. Building on the work of the ICME-13 (International Congress on Mathematical Education) Topic Study Group 10 on Early Algebra, well-known authors such as Luis Radford, John Mason, Maria Blanton, Deborah Schifter, and Max Stephens, as well as younger scholars from Asia, Europe, South Africa, the Americas, Australia and New Zealand, present novel theoretical perspectives and their latest findings. The book is divided into three parts that focus on (i) epistemological/mathematical aspects of algebraic thinking, (ii) learning, and (iii) teaching and teacher development. Some of the main threads running through the book are the various ways in which structures can express themselves in children's developing algebraic thinking, the roles of generalization and natural language, and the emergence of

symbolism. Presenting vital new data from international contexts, the book provides additional support for the position that essential ways of thinking algebraically need to be intentionally fostered in instruction from the earliest grades. Go Math!: Units of measure Pearson Scott Foresman
