These 26 episodes of McDonald Tales re-examine the early days of the McDonald family in the Oak Creek valley of the Southern Missouri Ozarks with an eye toward better understanding the strong commitment the family had to “The Homeplace” over more than a century and how the land was accumulated and consolidated into the farm that was the subject of “Back to the Homeplace,” the first novel of The Homeplace Saga. Daniel McDonald married Jane Truesdale, a strong and independent woman, and the stories here are told from their perspective and that of their son, William, the grandfather of Mildred (McDonald) Bevins who created the “Back to the Homeplace” novel’s infamous ‘video will.’ We examine their little family closely and share how they related to extended family members as well as members of their community. Along the way, these episodes in their lives add depth to the overall Homeplace Saga series of family saga, historical fiction stories.

The idea of teachers Learning through Teaching (LTT) – when presented to a naïve bystander – appears as an oxymoron. Are we not supposed to learn before we teach? After all, under the usual circumstances, learning is the task for those who are being taught, not of those who teach. However, this book is about the learning of teachers, not the learning of students. It is an ancient wisdom that the best way to “truly learn” something is to teach it to others. Nevertheless, once a teacher has taught a particular topic or concept and, consequently, “truly learned” it, what is left for this teacher to learn? As evident in this book, the experience of teaching presents teachers with an exciting opportunity for learning throughout their entire career. This means acquiring a “better” understanding of what is being taught, and, moreover, learning a variety of new things. What these new things may be and how they are learned is addressed in the collection of chapters in this volume. LTT is acknowledged by multiple researchers and mathematics educators. In the first chapter, Leikin and Zazkis review literature that recognizes this phenomenon and stress that only a small number of studies attend systematically to LTT processes. The authors in this volume purposefully analyze the teaching of mathematics as a source for teachers’ own learning.

Mathematics teachers often struggle to motivate their students. One way to cultivate and maintain student interest is for teachers to incorporate popular media into their methodology. Organized on the subject strands of the Common Core, this book explores math concepts featured in contemporary films and television shows and offers numerous examples high school math teachers can use to design lessons using pop culture references. Outlines for lessons are provided along with background stories and historical references.

TESOL Teacher Education in a Transnational World critically examines theories and practices in contemporary TESOL teacher education to shed new light on the intersection of transnationalism and language teacher education. It emphasizes the scholarship of transnational mobility of language teachers, and showcases critical research from diverse contexts. The book fills a critical research gap by more fully examining the theory and practice of teacher education in a changing time when national identities and cross-border mobilities continue to figure prominently in scholarly discussions. Through a diverse set of epistemological, historical and theoretical perspectives along with methodological innovations, contributors of this volume not only index the dynamism of the scholarship of teacher education, but they also offer new forums for lively pedagogical debates. Featuring contributions from diverse educational and geographical contexts, including Europe, Asia, North America, and Latin America, the book moves the existing scholarship forward to more fully examine TESOL teacher education in relation to transnationalism. This book will be of great interest to academics, scholars, post-graduate students, teacher educators, policymakers, curriculum specialists, administrators, and other stakeholders interested in language teacher education, TESOL and applied linguistics

[Vincible: a. capable of being overcome or subdued; conquered.] Book One: Greye Every story contains faces on the fringes. Those on the outside looking in. Observers who seem to have no power or influence. They’re just along for the ride. Or are they? They’re people like Greye. And Anna. And Sydney and Nika. All friends, all people who go to Borah High with Airel. Airel used to be one of them, trapped in the uncomplaining backdrop. But there’s something different about Airel Cross now, and people like Greye are beginning to notice. It’s undeniable, like a clouded sunrise, and it’s no use concealing the inevitable. These four girls, Greye and Nika, Anna and Sydney; each have a story to tell. They are The Vincibles, and their time is short. For Greye, the end comes first...

This book examines evidence-based practices that facilitate effective teaching to ensure optimum educational achievement for school-age students. It identifies key strategies with extensive research evidence that confirms their effectiveness in improving student outcomes. The book offers guidelines for teachers to use in distinguishing between strategies that are evidence-based and those with little or no supporting evidence. It describes common instructional strategies often found in schools despite having little evidence to support their effectiveness. In addition, the book identifies eight key evidence-based teaching practices that can be directly implemented by classroom teachers, reviews the theoretical and research base of each of these strategies, and provides

guidelines for special and general education teachers on how to apply them most effectively, with links to video examples of their use in classrooms. The text also examines common barriers to the use of evidence-based practices in schools. It explores implications for teacher education, focusing on training educators to identify and implement evidence-based strategies effectively, avoiding those lacking evidence, even if they are popular in schools. Essential Evidence-Based Teaching Strategies is a must-have resource for researchers, professionals, and graduate students in educational psychology, child and school psychology, and social work who are interested in learning about and implementing effective teaching methods that improve student engagement and academic achievement, strengthen social-emotional learning, and reduce school dropout rates.

In 2011, Showtime premiered *Shameless*, a comedy-drama about the audacious behaviors of the Gallaghers, a white, working-class family living in Chicago’s South Side. In 2020, the series headed into the production of its eleventh and final season, making it the longest-running original scripted program in Showtime’s history. *Shameless* explores topics such as poverty, alcoholism, teen pregnancy, and mental illness. The series has been credited with “reinventing working-class TV” and for humanizing groups that are typically “othered” or simply laughed at. However, others have critiqued the show for relying on and promoting stereotypes, and for the cavalier ways in which it portrays controversial social issues like rape and abortion. *Shameless Sociology: Critical Perspectives on a Popular Television Series* offers a critical eye toward topics such as gentrification, pregnancy and abortion, racial and gender inequality, and homophobia, and illustrates the ways in which *Shameless* sometimes confronts and topples stereotypes, yet, at other times, serves to reinforce and perpetuate them. Given the broad appeal of the show and the diverse topics it covers, this book will appeal to the general public, as well as researchers of media, culture, and social inequalities, and undergraduate and graduate students at institutions of higher education.

Chicago has long struggled with racial residential segregation, high rates of poverty, and deepening class stratification, and it can be a challenging place for adolescents to grow up. *Unequal City* examines the ways in which Chicago’s most vulnerable residents navigate their neighborhoods, life opportunities, and encounters with the law. In this pioneering analysis of the intersection of race, place, and opportunity, sociologist and criminal justice expert Carla Shedd illuminates how schools either reinforce or ameliorate the social inequalities that shape the worlds of these adolescents. Shedd draws from an array of data and in-depth interviews with Chicago youth to offer new insight into this understudied group. Focusing on four public high schools with differing student bodies, Shedd reveals how the predominantly low-income African American students at one school encounter obstacles their more affluent, white counterparts on the other side of the city do not face. Teens often travel long distances to attend school which, due to Chicago’s segregated and highly unequal neighborhoods, can involve crossing class, race, and gang lines. As Shedd explains, the disadvantaged teens who traverse these boundaries daily develop a keen “perception of injustice,” or the recognition that their economic and educational opportunities are restricted by their place in the social hierarchy. Adolescents’ worldviews are also influenced by encounters with law enforcement while traveling to school and during school hours. Shedd tracks the rise of metal detectors, surveillance cameras, and pat-downs at certain Chicago schools. Along with police procedures like stop-and-frisk, these prison-like practices lead to distrust of authority and feelings of powerlessness among the adolescents who experience mistreatment either firsthand or vicariously. Shedd finds that the racial composition of the student body profoundly shapes students’ perceptions of injustice. The more diverse a school is, the more likely its students of color will recognize whether they are subject to discriminatory treatment. By contrast, African American and Hispanic youth whose schools and neighborhoods are both highly segregated and highly policed are less likely to understand their individual and group disadvantage due to their lack of exposure to youth of differing backgrounds.

*Reconceptualizing Curriculum, Literacy, and Learning for School-Age Mothers* offers a portrait of classroom literacy practices and learning opportunities that are provided for school-age mothers in two different schools. Through a series of case studies of school sites, teachers, and students, this

book presents evidence of how these at-risk students use literacy in complex ways in the classroom and in their everyday lives. Attuned to the struggle for school-age mothers' access to meaningful and challenging curriculum in public schools, as well as to the relative dearth of scholarly research on the topic, this volume demonstrates how educators can rethink the issue of schooling for this population of students.

Ever wonder what the unaired episodes of situation comedies that disappeared quickly from the air were about? Curious about those comedy series such as *Rewind*, *The Grubbs*, and *The Ortegas* that the Fox network announced for its fall schedule but that never premiered? Did you know that stars like Bradley Cooper, Michelle Williams, and Brad Pitt made some of their earliest appearances on short-lived sitcoms? *Forgotten Laughs: An Episode Guide to 150 TV Sitcoms You Probably Never Saw* contains answers to these questions as well as others about quickly-canceled, never-aired, and short-run situation comedies. Published for the first time are episode descriptions for these forgotten shows. This reference book contains the most complete descriptions of sitcoms such as the quickly-canceled *Doc Corkle*, *Co-Ed Fever*, and *Black Tie Affair*, the never-aired *Misconceptions*, *The Singles Table*, and *Snip*, as well as short-run comedies like *Fathers and Sons* and *Free Country* and over 140 more. Most episode descriptions were culled from the archives of the Library of Congress, the Paley Center, and the UCLA TV script collection. In addition, *Forgotten Laughs* also includes insights from many producers, directors, and writers who worked on these little-known shows.

'A treasure trove of advice that will stay with readers long after they turn the last page.' Angie Asimus, Channel Seven  
Before long, mental illnesses will be the most prominent, if not the most common, ailments suffered by Australians. One in four young people suffer some form of mental illness during their school years. In an average classroom of thirty school students, seven will manifest a psychological condition such as depression. Only two of those seven will seek help, while the other five will continue their daily routine without the benefit of any aid whatsoever. But students – and those who care for them – can and do have the capacity to take proactive steps to live a more holistic life while in school, so as to ensure not only academic success, but also to emerge as more rounded and balanced people. In *The Wellness Doctrines for High School Students*, lawyer and author Jerome Doraisamy tackles head on the stresses that confront young people today, providing sound knowledge based on his own experiences and advice from experts in the field, as well as safe, practical solutions. Down-to-earth, reassuring and sane, *The Wellness Doctrines for High School Students* is the essential go-to manual for teens. 'High school should be the best time in a teenager's life. But, the reality is, for some kids it's a bloody nightmare. This book is full of proper advice about dealing with the big stuff, not sweating the small stuff ... and nailing it by graduation day.' From energy and water resources to natural disasters, and from changing climatic patterns to the evolution of the Earth's deep interior, geoscience research affects people's lives in many ways and on many levels. This book offers a stimulating cross-disciplinary perspective on the important relationship between geoscience research and outreach activities for schools and for the general public. The contributors – academics, research scientists,

science educators and outreach program educators – describe and evaluate outreach programs from around the world. A section entitled *Field-based Approaches* includes a chapter describing an initiative to engage Alaskan communities and students in research, and another on problem-based learning in the field setting. The *Online Approaches* section discusses ways to connect students and scientists using online forums; use of the web and social media, including the United Nations University and its experience with the design of a web magazine featuring geoscience research; and video clips on marine geoscience created by students and scientists. The section on *Workshop and Laboratory-based Approaches* includes a chapter on teaching geochronology to high school students, and another describing an extracurricular school activity program on meteorology. The *Program Design* section presents chapters on *Integrating Geoscience Research in Primary and Secondary Education*, on ways to bridge research with science education at the high school level, and on use of online geoscience data from the Great Lakes. The concluding section, *Promoting Research-enhanced Outreach*, offers chapters on *Geoscience Outreach Education with the local community* by a leading research-intensive university, and on the use of research to promote action in Earth science professional development for schoolteachers. *Geoscience Research and Outreach: Schools and Public Engagement* will benefit geoscience researchers who wish to promote their work beyond academia. It offers guidance to those seeking research funding from agencies, which increasingly request detailed plans for outreach activities in research proposals. Policymakers, educators and scientists working in museums, learned societies and public organizations who wish to widen participation will also find this book useful. Together with the companion volume *Geoscience Research and Education: Teaching at Universities*, this book showcases the key role that geoscience research plays in a wide spectrum of educational settings.
