An all-encompassing guide to skeptical thinking from podcast host and academic neurologist at Yale University School of Medicine Steven Novella and his SGU co-hosts, which Richard Wiseman calls "the perfect primer for anyone who wants to separate fact from fiction." It is intimidating to realize that we live in a world overflowing with misinformation, bias, myths, deception, and flawed knowledge. There really are no ultimate authority figures-no one has the secret, and there is no place to look up the definitive answers to our questions (not even Google). Luckily, The Skeptic's Guide to the Universe is your map through this maze of modern life. Here Dr. Steven Novella-along with Bob Novella, Cara Santa Maria, Jay Novella, and Evan Bernstein-will explain the tenets of skeptical thinking and debunk some of the biggest scientific myths, fallacies, and conspiracy theories-from anti-vaccines to homeopathy, UFO sightings to N- rays. You'll learn the difference between science and pseudoscience, essential critical thinking skills, ways to discuss conspiracy theories with that crazy co- worker of yours, and how to combat sloppy reasoning, bad arguments, and superstitious thinking. So are you ready to join them on an epic scientific quest, one that has taken us from huddling in dark caves to setting foot on the moon? (Yes, we really did that.) DON'T PANIC! With The Skeptic's Guide to the Universe, we can do this together. "Thorough, informative, and enlightening, The Skeptic's Guide to the Universe inoculates you against the frailties and shortcomings of human cognition. If this book does not become required reading for us all, we may well see modern civilization unravel before our eyes." -- Neil deGrasse Tyson "In this age of real and fake information, your ability to reason, to think in scientifically skeptical fashion, is the most important skill you can have. Read The Skeptics' Guide Universe; get better at reasoning. And if this claim about the importance of reason is wrong, The Skeptics' Guide will help you figure that out, too." -- Bill Nye

Battlestar Galactica: The Unofficial TV Show Companion Green Nebula

Popular culture often champions freedom as the fundamentally American way of life and celebrates the virtues of independence and self-reliance. But film and television have also explored the tension between freedom and other core values, such as order and political stability. What may look like healthy, productive, and creative freedom from one point of view may look like chaos, anarchy, and a source of destructive conflict from another. Film and television continually pose the question: Can Americans deal with their problems on their own, or must they rely on political elites to manage their lives? In this groundbreaking work, Paul A. Cantor explores the ways in which television shows such as Star Trek, The X-Files, South Park, and Deadwood and films such as The Aviator and Mars Attacks! have portrayed both top-down and bottom-up models of order. Drawing on the works of John Locke, Adam Smith, Alexis de Tocqueville, and other proponents of freedom, Cantor contrasts the classical liberal vision of America—particularly its emphasis on the virtues of spontaneous order—with the Marxist understanding of the "culture industry" and the Hobbesian model of absolute state control. The Invisible Hand in Popular Culture concludes with a discussion of the impact of 9/11 on film and television, and the new anxieties emerging in contemporary alien-invasion narratives: the fear of a global technocracy that seeks to destroy the nuclear family, religious faith, local government, and other traditional bulwarks against the absolute state.

Television Westerns Episode Guide The Take2 Guide to Lost

Are aliens visiting Earth, right now, even as you ’ re reading this? For a long-time, best-selling science fiction author Stephen Hunt believed - as you might do - that UFOs and the chance extraterrestrials are presently calling on Earth was a load of... (let ’ s keep this family-friendly), complete old nonsense! What was it that changed his mind? Interestingly, not his encounter with an alien probe in 2001. He wrote that off as a council pollution-monitoring drone - even though the first commercial drone wasn ’ t used until 2006. No, it was the New York Times ’ s article revealing that the Pentagon had been running, and denying the existence of, a top-secret alien-hunting program so covert it had to

change the word ‘ UFO ’ to ‘ UAP ’ just to escape the stigma created by the CIA around the term. This feature came with confirmed videos of the latest U.S. navy fighter jets being made to look like paper planes by anti-gravity effect vehicles. Craft racing at mind-boggling speeds that would turn human pilots into meat-paste. Since then, Stephen has been exploring deep down this rabbit hole. Now, in his very first non-fiction book, he brings you the results of his strange voyage of exploration, seeking the answers to such eye-opening questions as... - Has the U.S. government (a) lost its mind, or (b) are they really trying to back-engineer crashed alien craft wreckage? - What is the connection between UFOs/UAPs and high strangeness (portals, ghosts, Bigfoot)? - Given there are between 100 and 400 billion star systems in our Milky Way Galaxy, where the heck is everyone else? Is humanity truly that unique? The only machine-using species? - What does the U.S. government know that we don ’ t? - Are UFO witnesses and whistle-blowers influenced by popular science fiction entertainment, or are our media companies dropping approved UFO/alien bread-crumbs? - Is this new wave of official U.S.-sanctioned UFO openness a prelude to something shocking coming our planet ’ s way? Revelations so improbable, they ’ ll change humanity forever? Stephen Hunt examines this fascinating and astonishing universe through the eyes of a science fiction author, drawing the parallels between our sci-fictions, and what just might be a bizarre classified reality of actual alien-derived sci-facts.
