**different types of tissue function in ... - Yahoo Answers UK**  
Favorite Answer Simple epithelial tissue is only one layer. so if it looks like its one layer then it is simple. Stratified usually has a clear layer around the opening (which is a defining...  
connective tissue? | Yahoo Answers

- A recent study showed that when people used a cell phone for 50 minutes, brain tissues on the same side of the head as the phone ’ s antenna metabolized more glucose than did tissues on the opposite side of the brain
- Children and teenagers are five times more likely to get brain cancer if they use mobile phones

Epithelial Tissue Yahoo Answers  
Unlike epithelial tissue, connective tissue typically has cells scattered throughout an extracellular matrix. In vertebrates, the most common type of connective tissue is loose connective tissue. It holds organs in place and attaches epithelial tissue to other underlying tissues.  
what is the function of a keratinized ... - Yahoo Answers  
When you consider that the respiratory system includes the tip of your nose, it includes all the tissues. But we can still find all the tissues when we just look at the lungs. The four tissues of the human body are connective, muscle, nervous, and epithelial. Epithelial is found at the site of gas exchange at the alveoli.
