Since 1986 Information Technology has extended its borders still further into virtually every human activity. This book covers technical, social, political and management aspects of Information Technology in tutorial jargon-free style. It includes major new developments in the fields of Image Processing, Desktop Publishing, Multimedia, High Definition Television, Expert Systems, Satellite Systems, Speech Recognition and many others. Volume I contains chapters covering Information Systems and Information and Library Science, while Volume II contains chapters covering Applied Technology and Social and Political issues plus 11 chapters by guest authors about a variety of subjects. Identical Acknowledgement, Abbreviations and Acronyms, Glossary and Index sections are included in both volumes. Students, specialists and managers who need to find comprehensive coverage of a diverse subject in one place will find this book invaluable.
