instructions on setting up and operating [the] Epson printer.-Introd.
Epson Elite 200
More than sixty years ago revolutionary technology was seized from a Nazi slave labor laboratory in central Europe and consigned by the Government to the Forbidden List to be kept secret forever. But forever is a long time. Recently, Deputy Assistant Secretary of Defense, Daniel Rivers, stumbled across the material and plotted to make a fortune from its release. Rivers' scheme was discovered and everyone relaxed when he was quietly silenced with a commitment to the Wheaton Fields Psychiatric Clinic. Relaxed,

that is, until it was discovered that a copy of the startling data was missing. Now competing forces are plotting to recover the revolutionary discovery. In the middle of this free-for-all is Dr. Steven Westbrook, the new Medical Director at the Wheaton Fields Hospital. On Westbrook's second day as Medical Director he's confronted with Daniel Rivers' murder which is soon followed by a puzzling series of events as the battle to find and exploit the missing technology becomes increasing more lethal and draws Westbrook ever deeper into its web.
