Named for Alexander Caulfield Anderson, the chief trader for the Hudson's Bay Company at Fort Nisqually, Anderson Island has an early history of brick making, logging, farming, and fishing. Johnson's Landing, on the north end of the island, was the site where mosquito fleet steamships could refuel and purchase lumber for delivery as far south as San Francisco. The first permanent settlers on the island arrived from Denmark in the early 1870s, with others of Scandinavian descent coming shortly thereafter. The southernmost island in Washington State's Puget Sound, accessible only by boat or ferry from Steilacoom, Anderson Island boasts two freshwater lakes, two marinas, and a golf course. Bucolic Anderson Island received national press coverage in 2005 when the flower fairy anonymously left floral bouquets on doorsteps, a practice that continues to this day.

Public relations and the media are in a time of major change. The rise of social media, altered media platforms, evolving legislative environments and new models of communication have altered not only the working environments of public relations and the news and entertainment media, but also many aspects of how these industries work together. *Media Relations* provides a practical and thorough introduction to media work in this changing environment. Based on a solid understanding of media culture and theory, Jane Johnston shows how to steer a path between the technical and human elements of media relations. She drills down into the different types of media, analysing their applications, strengths and weaknesses, and shows how to target your message to the right media outlets, whether national television, community radio, celebrity magazines or influential blogs. This second edition has been

revised throughout and includes new case studies, and new chapters on digital and social media, media campaigns, and legal and ethical considerations. 'Media Relations: Issues and Strategies is written in an engaging, easy to understand style. It provides excellent examples and cases of media relations.' - *Global Media Journal*

This book continues first one of the same authors "Adaptive Image Processing Algorithms for Printing" and presents methods and software solutions for copying and scanning various types of documents by conventional office equipment, offering techniques for correction of distortions and enhancement of scanned documents; techniques for automatic cropping and de-skew; approaches for segmentation of text and picture regions; documents classifiers; approach for vectorization of symbols by approximation of their contour by curves; methods for optimal compression of scanned documents, algorithm for stitching parts of large originals; copy-protection methods by microprinting and embedding of hidden information to hardcopy; algorithmic approach for toner saving. In addition, method for integral printing is considered. Described techniques operate in automatic mode thanks to machine learning or ingenious heuristics. Most the techniques presented have a low computational complexity and memory consumption due to they were designed for firmware of embedded systems or software drivers. The book reflects the authors' practical experience in algorithm development for industrial R & D.
