"We have been marked as traitors." A mere shadow in the family tree, little could Eliza have realized the way in which her fifth great-grandmother, Maria Catrina, would step from the shadows of her husband's life to reveal the true price paid for loyalty. The unrivaled beauty and abundance of the Mohawk Valley, engulfed in the fight for liberty, forced the Eamers to choose between the freedom sought by many and their loyalty to the king. The impossible choice, once made, compelled them to abandon the land they loved and the hope that they would find peace amongst their once-loved neighbours, friends...and family. Fleeing his

impending arrest, Peter leaves Maria Catrina with their young children, telling her she must make her way north to the safety of the king's lands in Quebec. Their exodus through the wild, untamed Adirondack Mountains reveals the darkness of men's hearts and the lengths to which a mother will go to safeguard her precious ones. Inspired by true events.

Wild plots and quicksilver wit characterize the plays of Georges Feydeau. Called the greatest master of French comedy since Moliere by admirers such as Kenneth Tynan, Feydeau reflects the lusty tradition of the French bedroom farce as well as the tough exorbitant humor later to find full expression in the theater of the absurd. The plays offered in this volume represent the major stages of Feydeau's career. The one-act *Wood and Viewed* was his first comedy, written in 1880. On the *Marry-go-Wrong* shows Feydeau on the way to becoming a master of mad imbroglio, a talent that he demonstrates in *Not by Bed Alone*. *Going to Pot* is a one-act play of conjugal strife of

the emotional intensity that marked his work toward the end of his career.

The idea behind Options Math for Traders + Website is to help retail option traders understand some of the basic tenants and enduring relationships of options, and option math, that professional and institutional traders rely on every day. This book skillfully highlights those strategies that are inherently superior from an option math point of view and explains what drives that superiority while also examining why some strategies are inherently inferior. The book also has a companion Website, which includes links to those sites that can scan for the best strategies discussed in the book. Explains, in a non-technical manner, the mathematical properties of options so that traders can better select the right options strategy for their market outlook Companion Website contains timely tools that allow you to continue to learn in a hands-on fashion long after closing the book Written by top options expert Scott Nations Most independent traders have an imperfect understanding of the math behind options pricing. With Options Math for Traders + Website as your guide, you'll gain valuable lessons in this area and discover how this information can improve your trading performance.

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. A collection of insanely funny texts between parents and kids, When Parents Text is a surprisingly affecting window into the complicated time when parents aren ' t ready to let go, and kids aren ' t ready to be let go. The parents are well-meaning but hopeless, silly and a little

corny, and befuddled by the technology. The kids are bewildered yet patient: the perfect straight man. And the authors, two recent college graduates, Lauren Kaelin and Sophia Fraioli, have an unerring editorial instinct to select the funniest, sweetest, quirkiest, most-telling exchanges. There ' s the revelatory: Mom: My fingers are saying words. This is amazing. The virtual scolding:Dad: I will deal with your sassy behavior when I get home. Meanwhile have some fiber. The autofill-challenged: Mom: dig up some tadpoles on ur way homo. Me: ummm, what? Mom: It autocorrected me. I mean to say dig up some tadpoles on ur way homo. (4 minutes later) Mom: PICK UP SOME TAMPONS ON YOUR WAY HOME. The manically inappropriate:Mom: Woo Hoo—Ruth died, you know Uncle Lyman ' s wife, BUT I have your Braves tickets and check on the table!! And the downright inexplicable:Dad: You could poop your pants in the yankee candle store and no one would know. Launched as a website just last year, www.whenparentstext.com is a phenomenon. It receives 300,000 to 500,000 page views a day, with features in The Huffington Post, Entertainment Weekly, College Humor, and more. Do you know what will happen to your digital "stuff" when you die?No? Rest assured, you are not alone. This increasingly important but relatively unknown subject involves what happens to all of your accounts, social media, emails, photos, and documents and how you will be remembered in your online afterlife. This book will let you take control of your online afterlife and ensure that your important digital assets are treated according to your wishes. Given that the average person spends close to seven hours per day online it's a must-read for everyone. Death: of course it's not an easy subject for any of us. Indeed, there are few subjects more difficult to discuss or imagine than death. It's like we'd rather talk about anything else than the one universal experience we all share. But it's now one that also needs to be addressed in the digital age. Digital Legacy: Take Control Of Your Online Afterlife provides both the context of how we got here but also the right guidance to move forward with your planning today. Authored by two tech executives (also former Googlers) and founders of the digital-legacy platform GoodTrust -- Daniel Sieberg and Rikard Steiber, CEO and founder of GoodTrust -- the book outlines the pitfalls, challenges and opportunities that are important for all of us to tackle.

Learning to Learn for Life 3

Twenty years ago I set out to photograph children all around the world. My first trip was to the south of India. I started in the province of Tamil Nadu, first living in a Church Women Centre in the city of Chennai, then in Mugaiyur, a small village. For six months I took pictures and had conversations with roommates, guides, and members of the families who had taken me in as a guest. I had very many questions, as did they. After children, the main subject was

always love. Everything I heard from them and saw around me there filled me with both surprise and doubt, but above all with admiration. I admired their courage and faith. Their arranged marriages were a fascinating mystery to me. One way to understand arranged marriages was to make portraits. I photographed women and men various ages, engaged or planned couples and married couples.
