Reaching net zero emissions will not be the end of the climate struggle, but only the end of the beginning. For centuries thereafter, temperatures will remain elevated; climate damages will continue to accrue and sea levels will continue to rise. Even the urgent and utterly essential task of reaching net zero cannot be achieved rapidly by emissions reductions alone. To hasten net zero and minimize climate damages thereafter, we will also need massive carbon removal and storage. We may even need to reduce incoming solar radiation in order to lower unacceptably high temperatures. Such unproven and potentially risky climate interventions raise mind-blowing questions of governance and ethics. Pandora's Toolbox offers readers an accessible and authoritative introduction to both the hopes and hazards of some of humanity's most controversial technologies, which may nevertheless provide the key to saving our world.

This volume offers unique perspectives on how to engage in methods of inquiry in Political Science. Applying the debate in the field over the validity of qualitative methods, the authors illustrate how various methodological approaches are both rigorous and empirically rich. Each of the chapters consists of a particular methodological approach that offers useful insight into pressing political problems important for policy and for theory building. Drawing upon both positivist and interpretive approaches, the chapters illustrate how to engage in qualitative research involving case studies, content analysis and ethnography, each outlining the "doing" part of research. The volume is theoretically, thematically and geographically diverse, important for students and scholars across the field.

[Authenticity in the Preservation of Historical Wooden Architecture - Problems and Challenges](#) Revell

Historical wooden architecture is one of the most unique types of heritage built. Built from organic material, wooden buildings remain in harmony with the natural environment and fascinate future generations with its special charm. Because of its uniqueness, wooden buildings reflect the richness of traditional building solutions developed in different parts of the world. At the same time, this type of building contains the spiritual values ??that were important to those who built these architectural structures. The main topics of 'Authenticity in Preserving Historical Wooden Architecture - Problems and Challenges' are: (i) The method of protection and preservation of wooden buildings as a form of specific historical interpretation; (ii) The question of reconstruction and translocation of a wooden historical building with regard to the level of authenticity; (iii) The analysis of the essence of historical changes and the methods for maintaining and displaying wooden structures in relation to the requirements that determine their historical and architectural authenticity. Showing a variety of aspects of authenticity of wooden buildings, all demonstrated by specific examples (case studies), 'Authenticity in Preserving Historical Wooden Architecture - Problems and Challenges' presents practical implementations of theoretical findings. Hence, the book contributes to the understanding of wooden architectural heritage from a new perspective. The book will be of particular interest to academics and professionals interested in or involved in the preservation of built wooden heritage.

Bills pile up. Savings accounts go down. Marriages go south. Pandemics rage. Work goes off the rails. Stress goes off the charts. Suddenly, you feel powerless to calm life's chaos. It's all too much to take on by yourself. But pastor and bestselling author Max Lucado has great news for you--Help Is Here. Now more than ever, we're all weary from the loads we carry and the challenges we face. We have questions we cannot answer and problems we cannot solve. We'd hoped that life would be an invigorating adventure or an inspiring journey. We never expected to grow so tired so quickly. But Max teaches us that we can find fresh strength and purpose in the power of the Holy Spirit. The Bible makes more than a hundred references to the Holy Spirit, and Jesus says more about the Spirit than he does about the church, marriage, finances, and the future. But do we really know the Spirit? In *Help Is Here*, Max will give you the tools and encouragement you need to: Learn who the Spirit is and how the Spirit can help Become joyful, enthusiastic, and empowered as you draw closer to God Confidently take on any difficulty with the power of the Spirit Discover your unique gifts and purpose to further God's kingdom Help Is Here reminds us that our Good Shepherd doesn't just feed us; he leads us. He does more than correct us; he directs us. God keeps us on track--and best of all, he's commissioned the Holy Spirit to guide us down the winding roads of life, wherever they may lead us. No more walking this path alone. No more carrying weight you were not intended to bear. It's time for you to enjoy the presence of the Holy Spirit and experience the vigorous life he offers. You can rest easy knowing that Help Is Here. [Bringing Out the Best in Yourself at Work](#) Springer

This book commemorates the 70th birthday of Eugene Morozov, the noted Russian observational oceanographer. It contains many contributions reflecting his fields of interest, including but not limited to tidal internal waves, ocean circulation, deep ocean currents, and Arctic oceanography. Special attention is paid to studies on internal waves and especially those on tidal internal waves in the Global Ocean. These papers describe the most important open problems concerning experimental studies of internal waves and their theoretical, numerical, and laboratory modeling. Further contributions investigate the physics of surface waves and their interaction with internal waves. Here, the focus is on describing interaction processes between internal waves and deep currents in the ocean, especially currents of Antarctic Bottom Water in abyssal fractures. They also touch on the problem of oceanic circulation and related processes in fjords, including those occurring under sea ice. Given its breadth of coverage, the book will appeal to anyone interested in a survey of ocean dynamics, ranging from historic perspectives to modern research topics.

This book is intended to help satisfy an urgent requirement for up-to date comprehensive texts at graduate and senior undergraduate levels on the subjects in non-destructive testing (NDT). The subject matter here is confined to electrical and magnetic methods, with emphasis on the widely used eddy current and magnetic flux leakage methods (including particle inspection), but proper attention is paid to other techniques, such as microwave and AC field applications, which are rapidly growing in importance. Theoretical analyses relating to the various methods are discussed and the depths of presentation are often governed by whether or not the information is readily available elsewhere. Thus, for example, a considerable amount of space is devoted to eddy current theory at what the author considers to be a reasonable standard and not, as usually experienced, in either a too elementary manner or at a level appreciated only by a postgraduate theoretical physicist. The inclusion of the introductory chapter is intended to acquaint the reader with some of the philosophy of NDT and to compare, briefly, the relative performances of the more important methods of testing.

What woman doesn't love cute shoes? Rhonda Rhea's not afraid to admit her obsession with them--or to use this "shallow" addiction as a basis for a book! *High Heels in High Places* is a biblical journey for women who want to go deeper in their spiritual lives, but also want fall-off-your-high-heels laughter along the way. Using Colossians 1:9-12 as a springboard, Rhonda takes women on a fun adventure infused with practical spiritual truth about what it means to walk worthy before God. This unique and hilarious exploration is perfect for the "shoe overachiever" in all of us. It makes a great gift for the woman who has it all (and just doesn't have enough closet space to store it), or can be an enlightening small group resource.

This eBook edition of "The Higher Learning in America" has been formatted to the highest digital standards and adjusted for readability on all devices. Thorstein Veblen (1857-1929) was an American economist and sociologist. He is well known as a witty critic of capitalism. Veblen is famous for the idea of "conspicuous consumption." Conspicuous consumption, along with "conspicuous leisure," is performed to demonstrate wealth or mark social status. Veblen explains the concept in his best-known book, *The Theory of the Leisure Class*. Within the history of economic thought, Veblen is considered the leader of the institutional economics movement. Veblen's distinction between "institutions" and "technology" is still called the Veblenian dichotomy

by contemporary economists. In the beginning of his academic career Veblen had difficulties obtaining a university position, whether because he was discriminated for being Norwegian, or openly identified as an agnostic. These difficulties later inspired him to write *The Higher Learning in America*. In this book he claimed that true academic values were sacrificed by universities in favor of their own self-interest and profitability.

"The criminalization of dissent, and possible threats to civil liberties posed by this criminalization, have become central issues of debate within liberal democracies, particularly in relation to discussions of political violence and the role of law in protests. *Law against Liberty* provides significant commentary on the criminalization of political movements and dissent within (neo)liberal democracies in the contemporary context. The criminalization of dissent has been a common feature of neo-liberal governance in the current period of capitalist globalization. It has accompanied various structural adjustment and free trade policies as the required force to impose such programs on unwilling publics. Police violence has been a constant feature of alternative globalization demonstrations. Examples of escalating state attacks on opponents of global capital include tear gas attacks, use of rubber bullets and concussion grenades, illegal searches and seizures, surveillance and beatings of arrestees, and, most severely, the deaths of people at the hands of police as in Genoa and England. At the same time demonstrators have developed new repertoires of protest practice, including acts of violence and combat. Yet these engagements of escalation (as police and protesters adapt to each other's actions) have been understudied and undertheorized in recent social science works. Most works on the criminalization of dissent focus on a specific national context. Those that offer multinational examples tend to be earlier works that predate the Seattle protests of 1999, a watershed event in the development of alternative globalization movements and struggles. Based on contributions from engaged scholars, many of whom have direct, first-hand experience in the protests that they analyze, this book offers the most extensive and diverse examination of dissent and its criminalization in contemporary liberal democracies."--Publisher.
