History that doesn't suck: Smart, crude, and hilariously relevant to modern life. Those who don't know history are doomed to repeat it. Too bad it's usually boring as sh*t. Enter The Captain, the ultimate storyteller who brings history to life (and to your life) in this hilarious, intelligent, brutally honest, and crude compendium to events that happened before any of us were born. The entries in this compulsively readable book bridge past and present with topics like getting ghosted, handling haters, and why dog owners rule (sorry, cat people). Along the way you'll get a glimpse of Edith Wharton's sex life, dating rituals in Ancient Greece, catfishing in 500 BC, medieval flirting techniques, and squad goals from Catherine the Great. You'll learn why losing yourself in a relationship will make you crazy--like Joanna of Castile, who went from accomplished badass to Joanna the Mad after obsessing over a guy known as Philip the Handsome. You'll discover how Resting Bitch Face has been embraced throughout history (so wear it proudly). And you'll see why it's never a good idea to f*ck with powerful women--from pirate queens to diehard suffragettes to Cleo-f*cking-patra. People in the past were just like us--so learn from life's losers and emulate the badasses. The Captain shows you how.

These days, Richmond is a city of winter balls and garden parties on soft summer evenings, a city of private clubs where white-haired old gentlemen, with their martinis or mint juleps in hand, still genuflect in front of portraits of Robert E. Lee. But it's also a city of brutal crime scenes and drug corners. It's a city of world-class ad agencies and law firms, a city of the FFV (First Families of Virginia) and a city of immigrants - from India, Vietnam and Africa to Massachusetts, New York and New Jersey.

Dinosaur Activity Book for Kids Seed Savers Exchange

Winner of the American Horticultural Society Award for Excellence In Garden Book Publishing Winner of the Silver Medal for Best Reference from the Garden Writer's Association Filled with advice for the home gardener and the more seasoned horticulturist alike, The Seed Garden: The Art and Practice of Seed Saving provides straightforward instruction on collecting seed that is true-to-type and ready for sowing in next year's garden. In this comprehensive book, Seed Savers Exchange, one of the foremost American authorities on the subject, and the Organic Seed Alliance bring together decades of knowledge to demystify the time-honored tradition of saving the seed of more than seventy-five coveted vegetable and herb crops—from heirloom tomatoes and long-favored varieties of beans, lettuces, and cabbages to centuries-old varieties of peppers and grains. With clear instructions, lush photographs, and easy-to-comprehend profiles on individual vegetable crops, this book not only teaches us how to go about conserving these important varieties for future generations and for planting out in next year's garden, it also provides a deeper understanding of the importance of saving these genetically valuable varieties of vegetables that have evolved over the centuries through careful selection by farmers and home gardeners. Through simple lessons and master classes on crop selection, pollination, roguing, and the processes of harvesting and storing seeds, this book ensures that these time-honored traditions can continue. Many of these vegetable varieties are treasured for traits that are singular to their strain, whether that is a resistance to disease, an ability to grow well in a region for which that crop is not typically well suited, resistance to early bolting, or simply because it is a great-tasting variety. In an age of genetically modified crops and hybrid seed, a growing appreciation for saving seeds of these time-tested, open-pollinated cultivars has found a new audience from home vegetable gardeners and cooks to restaurant chefs and local farmers. Whether interested in simply saving seeds for home use or working to conserve rare varieties of beloved squashes and tomatoes, this book provides a deeper understanding of the art, the science, and the joy of saving seeds.
