I Can't Do That, Yet Apress

Twenty years ago I set out to photograph children all around the world. My first trip was to the south of India. I started in the province of Tamil Nadu, first living in a Church Women Centre in the city of Chennai, then in Mugaiyur, a small village. For six months I took pictures and had conversations with roommates, guides, and members of the families who had taken me in as a guest. I had very many questions, as did they. After children, the main subject was always love. Everything I heard from them

and saw around me there filled me with both surprise and doubt, but above all with admiration. I admired their courage and faith. Their arranged marriages were a fascinating mystery to me. One way to understand arranged marriages was to make portraits. I photographed women and men various ages, engaged or planned couples and married couples.

The first practical guide to linking business strategy with the art and science of user experience and online design. With fewer and fewer companies vying for the attention of online consumers, it is becoming increasingly clear that the big winners in the E-business arena are those that practice customer-centric design. While there are a multitude of good books on the art and science of user interface and website design, until *Built For Use*, there were none that focused on user experience from the corporate strategist's and marketing manager's perspectives. Drawing upon her work as a user-experience strategist for numerous Fortune 1,000 firms, Karen Donoghue explores the dynamics of business strategy and user experience in a concise, jargon-free manner for nontechnical managers. With the help of fascinating and instructive before-and-after case studies, she helps managers become fluent in the language of user-experience; identifies user-experience and design strategy best practices; explains how to determine what customers want; and much more.
