"Sheppard passes on ... knowledge on developing a consistent workflow, sizing and sharpening images properly, making black-and-white and panoramic prints, and much more."--Publisher description.

Adobe Photoshop Elements 3.0 John Wiley & Sons

From the folks behind the software, this book's step-by-step, project-based lessons, complemented by review questions at the end of each chapter and a CD filled with lesson and media files, will have readers editing, organizing, sharing, and storing all of their digital images in no time.

EPSON, MX Printer User's Manual, Type 3 and GRAFTRAX Plus McGraw-Hill

This guide is for the vast majority of picture-takers who want to ensure they can easily find, share, and keep safe those valuable photographic memories. We have attempted to keep it simple, affordable and achievable. Most readers will be able to get started using existing software tools on their home computers. We emphasize that managing an image collection actually starts even before you press the shutter button. We embrace both digital backup and the printed image as valid 'storage media'. This is not a learned treatise on archiving, workflow enhancement strategies and digital asset management best practice, but a simple guide 'for the rest of us' on how to bring a little order to the chaos that is the average 21st Century photo collection. We hope it works for you!

The printers' manual Lark Books

The purpose of this book is to illustrate the magnificence of the fables semiconductor ecosystem, and to give credit where credit is due. We trace the history of the semiconductor industry from both a technical and business perspective. We argue that the development of the fables business model was a key enabler of the growth in semiconductors since the mid-1980s. Because business models, as much as the technology, are what keep us thrilled with new gadgets year after year, we focus on the evolution of the electronics business. We also invited key players in the industry to contribute chapters. These "In Their Own Words" chapters allow the heavyweights of the industry to tell their corporate history for themselves, focusing on the industry developments (both in technology and business models) that made them successful, and how they in turn drive the further evolution of the semiconductor industry.

Peter Seibel interviews 15 of the most interesting computer programmers alive today in *Coders at Work*, offering a companion volume to Apress's highly acclaimed best-seller *Founders at Work* by Jessica Livingston. As the words "at work" suggest, Peter Seibel focuses on how his interviewees tackle the day-to-day work of programming, while revealing much more, like how they became great programmers, how they recognize programming talent in others, and what kinds of problems they find most interesting. Hundreds of people have suggested names of programmers to interview on the *Coders at Work* web site: www.codersatwork.com. The complete list was 284 names. Having digested everyone's feedback, we selected 15 folks who've been kind enough to agree to be interviewed: Frances Allen: Pioneer in optimizing compilers, first woman to win the Turing Award (2006) and first female IBM fellow Joe Armstrong: Inventor of Erlang Joshua Bloch: Author of the Java collections framework, now at Google Bernie Cosell: One of the main software guys behind the original ARPANET IMPs and a master debugger Douglas Crockford: JSON founder, JavaScript architect at Yahoo! L. Peter Deutsch: Author of Ghostscript, implementer of Smalltalk-80 at Xerox PARC and Lisp 1.5 on PDP-1 Brendan Eich: Inventor of JavaScript, CTO of the Mozilla Corporation Brad Fitzpatrick: Writer of LiveJournal, OpenID, memcached, and Perlbal Dan Ingalls: Smalltalk implementor and designer Simon Peyton Jones: Coinventor of Haskell and lead designer of Glasgow Haskell Compiler Donald Knuth: Author of *The Art of Computer Programming* and creator of TeX Peter Norvig: Director of Research at Google and author of the standard text on AI Guy Steele: Coinventor of Scheme and part of the Common Lisp Gang of Five, currently working on Fortress Ken Thompson: Inventor of UNIX Jamie Zawinski: Author of XEmacs and early Netscape/Mozilla hacker
