The Bridgewater Canal is distinguished as England's first canal and its development marked the beginning of a transport revolution that provided a crucial foundation for industrial and commercial development in England. Since its completion in 1765, the canal has been regularly used by commercial and passenger traffic; it was one if the major routes of the North West that helped Manchester to develop as a centre of trade and industry in the 19th century. In The Duke's Cut: The Bridgewater Canal, Cyril J. Wood recounts the fascinating history of the Bridgewater canal from its conception and construction to its subsequent successes including its use as a leisure waterway today. His detailed commentary is complemented by his descriptive guide to cruising the canal and valuable navigational information. Illustrated with more than 150 images, this comprehensive history and guide will appeal to local historians and canal enthusiasts alike.

This book presents the anatomical systems that take part in the scientific and clinical study of emotional functions and neuropsychiatric disorders. It discusses the limbic system—the cortical and subcortical structures in the human brain involved in emotion, motivation, and emotional association with memory—at length and how this is no longer a useful guide to the study of psychiatric disorders. The book provides an understanding of brain anatomy, with an emphasis on the new anatomical framework which has emerged during the last quarter century. The goal is to help the reader develop an understanding of the gross anatomical organization of the human forebrain. The book also includes an enlightening DVD describing the basic surface anatomy of the cerebral hemispheres, coronal and horizontal sections, and blunt dissection of the forebrain with special attention to clinical-anatomical correlations of interest to psychiatrists. * A re-evaluation of brain anatomy, with an emphasis on the new anatomical framework which has emerged during the last quarter century * A compellingly expanded conceptualization of Broca's famous limbic lobe * Clinical and basic science boxes highlighting specific concepts, structures, or neuronal circuits from a clinical perspective * DVD illustrating dissection of the human brain by one of the world's masters

'You will perform miracles and cast out demons and evil spirits in my name,' said the Lord to layman Jerry Leonard. At first, Jerry refused because he knew that people are persecuted in that type of ministry. But the Lord persisted, and Jerry relented, and That's No Problem For The Lord! is his story of healing and deliverance. The Lord has used Jerry in many miraculous ways, and Jerry posits that he can and will use anyone who is a willing vessel. Every time someone comes to Jerry for prayer, he proclaims, 'That's No Problem For The Lord,' and this book proves that it truly isn't.

The signature creation of cartoonist Roger Langridge, Fred the Clown is the thinking man's idiot. Fred has an eye for the ladies, as well as several other organs, but the only part of themselves they're willing to share with him is a carefully placed kneecap. Fred the Clown's misadventures are a curious balance of bleakness and joyful absurdism; the universe may dump on Fred from a great height, but he never gives up. More often than not, they involve the pursuit of a lady—any lady will do, it seems, but bearded ladies are at the top of the list. Disappointment seems inevitable, and it usually is; yet, almost despite himself, Langridge will occasionally give Fred a happy ending out of nowhere... p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 13.9px Arial; color: #424242}

Presented for the first time in English, this volume brings together twelve notable interviews and conversations with Henri Cartier-Bresson carried out between 1951 and 1998. While many of us are acquainted with his images, there are so few texts available by Cartier-Bresson on his photographic process. These verbal, primary accounts capture the spirit of the master photographer and serve as a lasting document of his life and work, which has inspired generations of photographers and artists. Here, Cartier-Bresson speaks passionately, with metaphors and similes, about the world and photography. A man of principles shaped by the evolving eras of the twentieth century, his major influences included Surrealism, European politics of the 1930s and '40s, the Second World War, and his experiences with Magnum as cofounder and reporter. This book illuminates his thoughts, personality, and reflections on a seminal career. In his own words: [Photography] is a way of questioning the world and questioning yourself at the same time. . . . It entails a discipline. For me, freedom is a basic frame of reference, and inside that frame are all the possible variations. Everything, everything, everything. But it is within a frame. The important thing is the sense of limit. And visually, it is the sense of form. Form is important. The structure of things. The space.
