For security reasons,
using parallel writing
tasks within or across

administrations is
common practice in
large-scale language
testing. Lack of task
comparability would
result in unjustified

performance and
consequently
jeopardize test
validity and fairness.
Thus, it is crucial
for test developers to
gather empirical
evidence from
different aspects to

substantiate the fairness argument that scores are consistent and score-based decisions are impartial across parallel tasks. Despite many studies hitherto on writing task comparability, those addressing picture-prompt writing tasks in an integrated manner have remained quite underexplored. Therefore, this book investigates the comparability of five writing tasks with picture prompts randomly assigned across testing occasions in an in-house English proficiency test (EPT) of a comprehensive university from three perspectives—the scores, the texts, and the raters and test takers. Results show that task difficulty is not comparable

either in terms of some lexical, syntactic and content features elicited or as judged by raters and test takers, which could be related with topic familiarity and conceptual clarity of the picture prompt. Yet, overall task comparability is achieved in not only final scores but also score distribution and classification accuracy. The findings support the fairness argument for EPT writing and provide theoretical, practical and methodological implications.

Three words describe the treatise in your hands: passion, experience, and depth. It is one thing to write a theory and quite

another to adduce gems of wisdom from a calling that was lived in numerous settings, explored over decades, and then studied; such is the case for Dr. Norahs Executive Performance. The book includes lessons from a doctoral study on executive performance in Uganda. It presents a framework of eight critical pillars of executive performance and a model for generating intrinsic motivation to perform. It confirms that performance is mostly about leadership, sociocultural beliefs, and performers attitudes. More importantly, it presents practical ideas about leadership that appropriately addresses sociocultural and mind-set challenges to unlock performance among Ugandan executives. In here

are invaluable thoughts, nuggets, and incredible wisdom for business owners, organization leaders, and executives who are looking for ideas to enhance organizational performance in an African setting. Indeed, Executive Performance is a collectors piece.

The growing impacts of economic activities and climate change on the conditions of rivers throughout the world, require a new, integrated approach towards river basin management, an approach that can also cope with an uncertain future. In this volume, leading European scientists and representatives of major stakeholder groups present risk-informed management as this new approach, as developed in the European Commission-funded project RISKBASE. It aims to improve the ecological

quality of river basins and thus to sustain the goods and services they provide for the benefit of society. Risk-informed management involves the integrated application of three key-principles: · Being well informed · Managing adaptively · Pursuing a participatory approach The authors explain and underpin these principles in detail, offer inspiring examples from practice and connect them to the implementation of the European Water Framework Directive (WFD). This book is intended for scientists, consultants and practitioners concerned about river basins, world-wide, as well as the drafters and implementers of the WFD River Basin Management Plans.

Language tests play pivotal roles in education, research on

learning, and gate-keeping decisions. The central concern for language testing professionals is how to investigate whether or not tests are appropriate for their intended purposes. This book introduces an argument-based validity framework to help with the design of research that investigates the validity of language test interpretation and use. The book presents the principal concepts and technical terms, then shows how they can be implemented successfully in practice through a variety of validation studies. It also demonstrates how argument-based validity intersects with

technology in language testing research and highlights the use of validity argument for identifying research questions and interpreting the results of validation research. Use of the framework helps researchers in language testing to communicate clearly and consistently about technical issues with each other and with researchers of other types of tests.

This open-access book addresses latest Sino-German results of the joint research efforts within Major Water Program of the Chinese Government supported by German research funding. The Major Water Program aims at the restoration of polluted water environments and sustainable management of water resources in China. The joint BMBF-CLIENT project SINOWATER deals with three most significant and strongest polluted Chinese waters, the river

Liao and the Dian-lake as well as Tai-lake in the area of the metropolises Shenyang, Kunming and Suzhou, respectively. The project was conducted by the Research Institute for Water and Waste Management at RWTH Aachen (FiW) e.V., Bavarian State Ministry of the Environment and Consumer Protection, Technical University of Munich, RWTH Aachen University, German and Chinese companies (Martin Membrane Systems AG, Steinhardt GmbH Wassertechnik, GuHong, JT-elektronik, bluemetric, Huawang Water, EVU Group, Atemis GmbH, i+f process GmbH) in close cooperation with Chinese Academy of Environmental Sciences, Tongji University, and the Dianchi Lake Management Authorities.

Overall, the joint Sino-German research project SINOWATER provided solutions for the improvement of the water quality in the mentioned water bodies as well as development and optimization of Good Water Governance. These objectives could be achieved through the implementation of innovative German water technologies and the optimization of water management elements in the fields of industrial and municipal wastewater treatment as well as river and shallow lake management.

Prenatal and Postnatal Care

Situate pregnancy in the emotional and physical life of the whole person with this bestselling guide

Prenatal and postnatal care are important and dynamic areas in healthcare research and practice. The needs of the childbearing person before and after birth are complex and intensely personal, combining significant physiological impact with broader emotional needs. In order to supply optimal care, providers must account not only for physiological factors, but also for cultural, social, experiential, and psychological ones. Prenatal and Postnatal Care takes a holistic, person-centered approach to prenatal and

postnatal care. Emphasizing the pregnant person and their unique needs, this book presents prenatal and postnatal care as foundational care for a healthy start to family life. This accessible, comprehensive book provides unique knowledge and skills to practitioners so that they can make a positive difference to the people they serve. Readers of the third edition of *Prenatal and Postnatal Care* will also find: New chapters covering health equity, ethics in perinatal care, exercise, and more. All chapters updated to reflect evidence concerning health disparities and inequities. Concrete ways for clinicians to disrupt the systems of harm and exclusion that can mediate care at every level. *Prenatal and Postnatal Care* is

essential for midwives, nurse practitioners, physician assistants, and other healthcare providers who work with childbearing people.
