Transportation
(EITRT2013)-Volume I Routledge
The Dynamics of Managing
Diversity was one of the first books
to respond to growing academic
coverage of the topic of diversity
management at degree level. This
fourth edition has been fully
updated to reflect new working
practices, statistical information

and developments in equality and diversity law, as well as including new case studies and analysis of current and emerging areas of debate in the UK and across Europe. Diversity management is a term that covers not only race, disability and sex discrimination, but also broader issues such as individual and cultural differences. The Dynamics of Managing Diversity, fourth edition, provides HR and business managers of the future with the legal information and research findings to enable them to develop meaningful diversity policies in their organizations. This new edition offers:

- Coverage of topical areas such as female representation on executive boards, religious diversity, and economic migration following EU enlargement
- Multiple analytical perspectives, such as socio-legal and feminist approaches, to provide rich insights to the subject matter
- Practical case studies to illustrate the real-life issues in a local, international and organizational context

Kirton and Greene present the subject of diversity management in a logical and

structured manner, beginning each chapter with aims and objectives, and ending with discussion questions, making this book the perfect support resource for those teaching or studying in the field of equality and diversity.

Understanding the context for agriculture for nutrition research

Intl Food Policy Res Inst Ethics in communication and media has arguably reached a pivotal stage of maturity in the last decade, moving from disparate lines of inquiry to a theory-driven, interdisciplinary field presenting normative frameworks and philosophical explications for communicative practices. The intent of this volume is to present this maturation, to reflect the vibrant state of ethics theorizing and to illuminate promising pathways for future research.

Springer Nature

All over the world countries face the challenge of inadequate social security coverage for workers without an employment contact. In countries of the global south, this phenomenon is a natural consequence of large informal economies.

Countries in the global north increasingly witness the same issue, due to growing labour market flexibility (flex contracts, dependent self-employment, digitization of labour). In this book authors from both hemispheres exchange insights, experiments and practices with the intention

of finding better ways to deal with the social security challenges facing workers.

FAO has supported member countries to carry out their national agricultural censuses since 1945, through the development and dissemination of international standards, concepts, definitions and methodologies as well as technical assistance. In 2015, FAO published Volume 1 of the World Programme for the Census of Agriculture 2020 (WCA 2020) “ Programme, concepts and definitions ” , the tenth decennial programme that provides guidelines for implementation of national agricultural censuses in the 2016-2025 decade. Volume 1 deals with the methodological and conceptual aspects of the census of agriculture. In addition to the use of international standards, the

proper conduct of an agricultural census also depends on adequate planning, implementation, use of resources and quality assurance throughout all stages of the census. In light of this, Volume 2 of WCA 2020 “ Operational guidelines ” has been designed to guide national census practitioners responsible for conducting the agricultural census. It deals with the practical steps involved in actually conducting an agricultural census in the field. Volume 2 is a revised and updated edition of “ Conducting Agricultural Censuses and Surveys ” , published by FAO in 1996. The revision is opportune not only in view of the recent publication of the new census programme and methodology but also in view of the substantial changes witnessed in the census technological environment over the last two decades. The availability of

digital, mobile and more affordable tools for data capture, geo-positioning, remote sensing imaging, digital archiving and online dissemination have provided new cost-effective alternatives to traditional ways of conducting the agricultural census.

Cereal Grains DEStech Publications, Inc
The 2013 Global Hunger Index (GHI), which reflects data from the period 2008 – 2012, shows that global hunger has improved since 1990, falling by one-third. Despite the progress made, the level of hunger in the world remains serious, with 870 million people going hungry, according to estimates by the Food and Agriculture Organization of the United Nations. The policy recommendations in this report offer a path forward for the international development, humanitarian, and donor

communities; for country-level policymakers in food-insecure countries; and for development and humanitarian practitioners.

Social Protection in East Africa Harnessing the Future Springer

This volume examines the concept of global social policy architectures and its emergence across issues and through time.

Internet Studies Routledge

Despite the importance of social protection, today more than 70 percent of the world's population still has no or limited access to comprehensive social protection. Coverage in rural areas, where about 80 percent of the world's poor live, is even lower. Achieving an effective extension of the coverage of social protection benefits and services to the rural population is a key challenge which must be addressed in order to achieve SDG 1.3. "Implement nationally appropriate social protection systems and measures

for all, including floors, and by 2030 achieve substantial coverage of the poor and the vulnerable". This will require bridging gaps and removing existing barriers that limit the access of rural populations to social protection. Extending social protection for all is core to the work of the Food and Agriculture Organization of the United Nations (FAO) and the International Labour Organization (ILO). The present paper lays out the specific profiles, risks and vulnerabilities of rural populations and explores options to extend social protection coverage to them.

This UN Women 's flagship report shows that, all too often, women 's economic and social rights are held back, because they are forced to fit into a ' man 's world '. But, it is possible to move beyond the status quo, to picture a world where economies are built with women 's rights at their heart. It is being published as the international community comes together to define a transformative post-2015 development agenda, and coincides with the 20th anniversary commemoration of the landmark Fourth World Conference on Women in Beijing, China which set out a comprehensive agenda to advance gender equality. This publication brings together human rights and economic policymaking, and provides the key elements for a far-reaching new policy agenda that can transform economies and make women 's rights a reality. Through solid in-depth analysis and data, this evidence-based report provides key recommendations on moving towards an economy that truly

works for women, for the benefit of all.

Cultures of Care in Aging OECD Publishing

This book considers the lessons learnt so far from the emergence of the Internet and the development of the field of Internet studies, whilst also considering possible directions for the future. Examining broad media theories and emerging theorisations around the Internet specifically, it explores the possibility of the development of an Internet theory in the future. A comprehensive overview of the field, Internet Studies considers key issues of social importance that the study of the Internet draws upon, such as the role of the Internet in civic participation and democratisation, the development of virtual communities, digital divides and social inequality, as well as Internet governance and policy control. At the same

time, it examines the role of the Internet in social research and the development of highly interdisciplinary and rapidly developing Internet research. Hence, this volume maps key areas of certainty and uncertainty in the field of Internet studies and, as such, it will be of interest to scholars and students of media and communication, sociology and social research methods.

The Conversational Interface Food & Agriculture Org.

We use data from 52 countries on child stunting, poverty, determinants of food security, environmental health, and quality of maternal and child care to carry out a cluster analysis of country typologies. The purpose is to identify where agriculture-led interventions might address binding constraints to progress in improving nutrition

outcomes and to identify how existing research on the links between agriculture and nutrition in particular country contexts may or may not be representative.

The Dynamics of Managing Diversity Walter de Gruyter GmbH & Co KG

This paper examines labor diversification in Ethiopia, focusing on youth, and explores current conditions that youth face in both the agricultural and non-farm labor markets. Using data from the Ethiopia Socioeconomic Survey (ESS) and the National Labor Force Survey (NLFS), we explore current trends in labor diversification, along with youth non-farm engagement in rural and small towns. We find that youth (ages 25 to 34 years) have a greater probability of working in non-farm

enterprises compared to mature individuals (age 35-64). However, wage labor opportunities remain scant in rural Ethiopia. The majority of individuals working in non-farm employment are engaged in small-scale trade activities. Social Security Outside the Realm of the Employment Contract Cambridge University Press

The value of personal data has traditionally been understood in ethical terms as a safeguard for personality rights such as human dignity and privacy. However, we have entered an era where personal data are mined, traded and monetized in the process of creating added value - often in terms of free services including efficient search, support for social networking and personalized communications. This volume investigates whether the economic value of personal data can be realized without compromising privacy, fairness and contextual integrity. It brings

scholars and scientists from the disciplines of computer science, law and social science together with policymakers, engineers and entrepreneurs with practical experience of implementing personal data management. The resulting collection will be of interest to anyone concerned about privacy in our digital age, especially those working in the field of personal information management, whether academics, policymakers, or those working in the private sector.

The future of food and agriculture: Trends and challenges Food & Agriculture Org.

Proceedings of the 2013 International Conference on Electrical and Information Technologies for Rail Transportation (EITRT2013) collects the latest research in this field, including a wealth of state-of-the-art research theories and applications in intelligent computing, information processing, communication technology, automatic control, etc. The objective of the proceedings is to provide a major

interdisciplinary forum for researchers, engineers, academics and industrial professionals to present the most innovative research on and developments in the field of rail transportation electrical and information technologies. Contributing authors from academia, industry and the government also offer inside views of new, interdisciplinary solutions. Limin Jia is a professor at Beijing Jiaotong University and Chief Scientist at the State Key Lab of Rail Traffic Control and Safety. Employment Protection Legislation in Emerging Economies John Wiley & Sons This book derives from a symposium held at Cornell University in April 2014. The symposium explored development financing, which has become an important area of policy discussion in Africa and other developing areas in recent years. Using multifaceted and multidisciplinary analytical approaches, it considers the

role of the banking system, the stock market, credit access, external aid, and sovereign wealth funds in the evolving development finance architecture. Further, the volume looks at China ' s role as an aid donor, the impact of BRICs partnerships in South Africa, the role of NEPAD in mobilizing resources for infrastructure development, and the links between law, trade, and regional integration. The study concurs with previous analyses that greater access to credit by the poor represents the most effective way of fighting poverty and raising the standards of living in Africa. Cornell ' s Institute for African Development and the African Development Bank were cosponsors of the 2014 symposium. 2013 International Conference on Electrical, Control and Automation Engineering(ECAE2013) Edward Elgar Publishing

As economic crises, growing inequality and climate change prompt a global debate on the meaning and trajectory of development, increasing attention is focusing on 'social and solidarity economy' as a distinctive approach to sustainable and rights-based development. While we are beginning to understand what social and solidarity economy is, what it promises and how it differs from 'business as usual', we know far less about whether it can really move beyond its fringe status in many countries and regions. Under what conditions can social and solidarity economy scale up and scale out - that is, expand in terms of the growth of social and solidarity economy organizations and enterprises, or spread horizontally within given territories? Bringing together leading researchers, blending theoretical and empirical analysis, and drawing on experiences and

case studies from multiple countries and regions, this volume addresses these questions. In so doing, it aims to inform a broad constituency of development actors, including scholars, practitioners, activists and policy makers.

Digital Enlightenment Yearbook 2013 United Nations

This book provides a comprehensive introduction to the conversational interface, which is becoming the main mode of interaction with virtual personal assistants, smart devices, various types of wearable, and social robots. The book consists of four parts. Part I presents the background to conversational interfaces, examining past and present work on spoken language interaction with computers. Part II covers the various technologies that are required to build a conversational interface along with practical chapters and exercises using open source tools. Part III looks at interactions with smart devices, wearables, and robots, and discusses the role of

emotion and personality in the conversational interface. Part IV examines methods for evaluating conversational interfaces and discusses future directions.

Extending social protection to rural populations Intl Food Policy Res Inst

These proceedings represent the work of authors at the 13th European Conference on e-Government (ECEG 2013). The Conference this year is hosted by the University of Insubria in Como, Italy. The Conference Chair is Professor Walter Castelnovo and the Programme Chair is Professor Elena Ferrari, both are from the Department of Theoretical and Applied Sciences at the University of Insubria. The opening keynote address is given by Dr Gianluca Misuraca from the European Commission, Joint Research Centre, Institute for Prospective

Technological Studies, Seville, Spain and Gianluca is addressing the topic "eGovernment: Past, Present & Future: A policy-research perspective for renewing governance in the digital age." The second day of the conference is opened by Dr Antonio Cordella from the London School of Economics, London, UK, who will talk about "Public value creation: the new challenge for e-government policies." ECEG brings together, researchers, Government officials and practitioners in the area of e-Government from around the world. Participants are able to share their research findings and explore the latest developments and trends in the field which can then be disseminated to the wider community. With an initial submission of 153

abstracts, after the double blind, peer review process there are papers published in these Conference Proceedings from 40 countries including Australia, Austria, Belgium, Brazil, Canada, China, Costa Rica, Croatia, Denmark, Egypt, Germany, Greece, India, Iran, Iraq, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malaysia, Netherlands, New Zealand, Norway, Pakistan, Poland, Romania, Russia, Saudi Arabia, Serbia, Slovenia, South Africa, Spain, Sweden, Switzerland, Taiwan, Thailand, Turkey, UK and USA. This will ensure a very interesting two days.
