This volume brings together a set of classic essays on early rabbinic history and culture, seven of which have been translated into English especially for this publication. The studies are presented in three sections according to theme: (1) sources, methods and meaning; (2) tradition and self-invention; and (3) rabbinic contexts. The first section contains essays that made a pioneering contribution to the identification of sources for the historical and cultural study of the rabbinic period, articulated methodologies for the study of rabbinic history and culture, or have addressed historical topics that continue to engage scholars to the present day. The second section contains pioneering contributions to our understanding of the culture of the sages whose sources we deploy for the purposes of historical reconstruction, contributions which grappled with the historical and cultural riddle and rhythm of the rabbis' emergence to authority, or pierced the veil of their self-presentation. The essays in the third section made fundamental importance to our understanding of the broader cultural contexts of rabbinic sources, identified patterns of rabbinic participation in prevailing cultural systems, or sought to define with greater precision the social location of the

rabbinic class within Jewish society of late antiquity. The volume is introduced by a new essay from the editor, summarizing the field and contextualizing the reprinted papers. About the series Classic Essays in Jewish History (Series Editor: Kenneth Stow) The 6000 year history of the Jewish peoples, their faith and their culture is a subject of enormous importance, not only to the rapidly growing body of students of Jewish studies itself, but also to those working in the fields of Byzantine, eastern Christian, Islamic, Mediterranean and European history. Classic Essays in Jewish History is a library reference collection that makes available the most important articles and research papers on the development of Jewish communities across Europe and the Middle East. By reprinting together in chronologically-themed volumes material from a widespread range of sources, many difficult to access, especially those drawn from sources that may never be digitized, this series constitutes a major new resource for libraries and scholars. The articles are selected not only for their current role in breaking new ground, but also for their place as seminal contributions to the formation of the field, and their utility in providing access to the subject for students and specialists in other fields. A number

of articles not previously published in English will be specially translated for this series. Classic Essays in Jewish History provides comprehensive coverage of its subject. Each volume in the series focuses on a particular time-period and is edited by an authority on that field. The collection is planned to consist of 10 thematically ordered volumes, each containing a specially-written introduction to the subject, a bibliographical guide, and an index. All volumes are hardcover and printed on acid-free paper, to suit library needs. Subjects covered include: The Biblical Period The Second Temple Period The Development of Jewish Culture in Spain Jewish Communities in Medieval Central Europe Jews in Medieval England and France Jews in Renaissance Europe Jews in Early Modern Europe Jews under Medieval Islam Jews in the Ottoman Empire and North Africa

Print and Politics Routledge
Edited by Janet Hoskins,
Fragments from Forests and
Libraries is a compilation of
important articles by Valerio
Valeri, a scholar whose
research ranged from the
rainforests of the island of
Seram to European archives
and libraries. Along with
nine essays previously
published in English, the
book contains a number of
studies translated for the first
time and one unpublished
work. This book is part of
the Ritual Studies
Monograph Series, edited by

Pamela J. Stewart and Andrew Strathern, Department of Anthropology, University of Pittsburgh. "Throughout, the writing is scholarly, steeped in an unusually extensive knowledge of European history and philosophy, which Valeri often brings to bear in unexpected and illuminating ways on the complexities of Huaulu life....This will be a most useful text in undergraduate and postgraduate courses in anthropology, not least because, in its independence

of thought, broad range of interests, and its refusal to specialize narrowly, it sets an example we all should try to emulate." -- Simon Harrison, The Journal of The Royal Anthropological Institute, September 2003
The English Catalogue of Books ... Springer Science & Business Media
"Contains 50 essays with analysis from successful Ivy League applicants, tips on how to select the best topic, what Ivy League admission officers want to see in your essay, 25 mistakes that guarantee failure and tips from Ivy League students on how to

write a successful essay"--
Catalog of Copyright Entries. Third Series Oak Ridge, Tenn. : Oak Ridge National Laboratory
One of my favorite quotes is from a letter of Charles Darwin (1887): "I have long discovered that geologists never read each other's works, and that the only object in writing a book is proof of earnestness, and that you do not form your opinions without undergoing labour of some kind. " It is not clear if this private opinion of Darwin was one that he held to be absolutely true, or was one of those opinions that, as with most of us, coincides with our

"bad days," but is replaced with a more optimistic view on our "good days." I hold the sense of the statement to be true in general, but not with regard to scientists never reading each other's work. Even if that were true however, the present essay would still have been written as a proof of earnestness. This essay outlines my personal view of how nonlinear mathematics may be of value in formulating models outside the physical sciences. This perspective has developed over a number of years during which time I have repeatedly been amazed at how an "accepted" model would fail to faithfully

characterize the full range of available data because of its implicit or explicit dependence on linear concepts. This essay is intended to demonstrate how linear ideas have come to dominate and therefore limit a scientist's ability to understand any given class of phenomena. Reconciliation Discourse Handbook of Automated Essay Evaluation This is a history of trade unions in the New Zealand printing industry. It begins in the early 1860's when the first unions of typographical workers were formed in Dunedin and Wellington. Putting Research to Work in Quality Improvement and

Quality Assurance U OF M MUSEUM ANTHRO ARCHAEOLOGY "A groundbreaking study of gay history in New Zealand, this book explores the period of intense lobbying and opposition leading up to the passing of the Homosexual Law Reform Bill in 1986, which decriminalized sexual acts between males. Based on 22 interviews with important participants in the debates as well as extensive archival research, this is a major contribution not only to the international literature on the history of homosexuality but

also to the understanding of New Zealand society in the later 20th century."

This study of the writings of Japanese travelers to China from 1862 to 1945 serves both as a window onto changing Japanese images of China and as a vivid account of Sino-Japanese interactions over

nearly a century. The year 1862 saw the lifting of the Tokugawa shogunate's ban of over two centuries on overseas contacts, and Japanese travelers were able to resume contact with China, which had begun some fifteen hundred years before.

Through the centuries, China had exerted a profound influence on the development of Japanese culture, and what began as a wish to adopt the latest, most developed political and cultural achievements of China - assumed to be the most advanced country on earth -- later became an effort to understand the essence of Japan

by defining its difference from China. This book is based upon some five hundred accounts of travel in China by Japanese, only a handful of which have previously been available in Western literature.

Oxbow Books

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a

number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community.

The benefits of improving and regulating the forensic science disciplines are clear: assisting

law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a

vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Strengthening Forensic Science in the United States Victoria University Press Collection of essays on sociology, causation, and pragmatic considerations by one of the leading social scientists of the past half-century. Now republished in quality ebook format with active TOC, linked notes, and proper presentation for ereaders and apps.

This directory is part of a six-volume set that provides data on over 36,000 European companies. Focusing on the United Kingdom, it provides information such as: address, phone and fax numbers, e-mail and Web addresses, listings of a company's activities, parents, subsidiaries and agents, brands and trademarks and financial information for 2001 and 2002.

The Literature of Travel in the Japanese Rediscovery of China,

1862-1945 Springer

This volume is a research monograph analysing the South African Truth and Reconciliation Commission (TRC) from an ethnographic/linguistic point of view. The central proposition of this book is that the TRC can be regarded as a mechanism that leads to the hegemony of specific discourses, thus exercising power. The analysis illustrates how, through a certain type of reconciliation discourse constructed at the TRC hearings, a reconciliation-oriented reality took shape in post-TRC South Africa. Basically, the study points to the long-term implications a truth commission can exert on a traumatised post-conflict society.

The book is unique on several levels: TRC discourse is explored in-depth on the basis of personal stories from TRC testifiers; a combination of Poststructuralist and Critical Discourse Analysis approaches form the theoretical foundations; and an extensive bibliography provides an impressive database of TRC publications.

The general academic progression, and particularly research engagement, of postgraduate students is characterized by various

problems such as high dropout rates, longer completion times, low graduation rates, and high repetition or retake rates. This means that there are far fewer students pursuing postgraduate studies at tertiary institutions and universities than there are at the lower levels of education. Yet, there is growing demand for postgraduate education given its strong projected association with socioeconomic transformation at national and international levels

among developed and developing countries alike. Postgraduate Research Engagement in Low Resource Settings sets out to garner strategies for fostering efficiency of research conduct among the students and faculty so as to enhance high quality output for the envisaged personal, societal, national, and international socioeconomic transformation. Covering a range of topics such as intellectual property, mental health, and quality assurance, this book is ideal for research

supervisors, higher education faculty, librarians, educators, administrators, researchers, academicians, and students. The 50 + 1 rule: What to consider before buying a football club Wm. B. Eerdmans Publishing This book discusses Hong Kong ' s use of onscreen marking (OSM) in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive, coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their

experience of the validation process, demonstrating how high-stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

Science and Pseudoscience in Social Work Practice

Supercollege LLC

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer.

In particular, writing for a peer-reviewed scientific or engineering journal requires

learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published. Accelerated Public Works Program, Directory of Approved Projects as of University of Hawaii Press Cultural Psychology of Recursivity illustrates how recursivity, often neglected in the social sciences, can be

an important concept for illuminating meaning-making processes. Recursivity is a fascinating though abstract concept with a wide array of often incompatible definitions. Rooted in mathematics and linguistics, this book brings recursion and recursive processes to the foreground of psychological processes. One unifying claim among the diverse chapters in this book is that recursion and recursive processes are at the core of complex social and psychological processes.

Recursion is bound up with the notion of re-turning, re-examining, re-reflecting and circling back, and these processes allow for human beings to simultaneously distance themselves from the here-and-now settings (by imaging the past and future) while being immersed in them. The objective of this book is not simply to celebrate the complexity of human living, but to extend the notion of recursion, recursivity and recursive processes into the realm of social and psychological

processes beyond the arenas in which these ideas have currently thrived. Cultural Psychology of Recursivity shows that in spite of the difficulty in defining recursivity, self-referencing (looping), transformation (generativity), complexity, and holism constitute its core characteristics and provide the basis for which authors in this book explore and elaborate this concept. Still, each contribution has its own unique take on recursivity and how it is applied to their phenomenon of investigation.

Chapters in this book examine how recursive processes are related to and basic aspects of play and ritual, imitation, identity exploration, managing stigma, and commemorative practices. This book is intended for psychologists, sociologists, and mathematicians. Use of the book in post-graduate and graduate level of university teaching is expected in seminar format teaching occasions. The eight papers presented here provide a useful introduction to medieval broadcloth, and an up-to-date synthesis of current research. The word broadcloth is nowadays used as an overall term for the woven textiles mass-produced and exported all over Europe. It was first produced in Flanders as a luxurious cloth from the 11th century and throughout the medieval period. Broadcloth is the English term, Laken in Flemish, Tuch in German, Drap in French, Klæde in the

Scandinavian languages and Verka archaeological textiles excavated in the Baltic, Finland and Poland. Chapters six and seven (Camilla Luise Dahl and Kathrine Vestergård Pedersen) concern the problems of combining the terminology from the written sources with archaeological textiles. The last chapter reports on an ongoing reconstruction project; at the open air museum in Eindhoven, Holland, Anton Reurink has tried to recreate a medieval broadcloth based on written and historical sources. During the last few years he has reconstructed the tool for preparing and spinning wool, and a group of spinners has produced a yarn of the right quality. He subsequently wove approximately

in Finish. As the concept of broadcloth has deriving from the written sources it cannot directly be identified in the archaeological textiles and therefore the topic of medieval broadcloth is very suitable as an interdisciplinary theme. The first chapter (John Munro) presents an introduction to the subject and takes the reader through the manufacturing and economic importance of the medieval broadcloth as a luxury item. Chapter two (Carsten Jahnke) describes trade in the Baltic Sea area, detailing production standards, shipping and prices. Chapters three, four and five (Heini Kirjavainen, Riina Rammo and Jerzy Maik) deal with

20 metres of cloth and conducted the first experiment with foot-fulling.

Pseudoscience in Child and Adolescent Psychotherapy
Stanford University Press

Wonhyo (617-686) is the dominant figure in the history of Korean Buddhism and one of the most influential thinkers in the Korean philosophical tradition. Koreans know Wonhyo in his various roles as Buddhist mystic, miracle worker, social iconoclast, religious proselytist, and cultural hero. Above all else,

Wonhyo was an innovative thinker and prolific writer, whose works cover the gamut of Indian and Sinitic Buddhist materials: Some one hundred treatises and commentaries are attributed to him, twenty-three of which are extant today. Wonhyo's importance is not limited to the peninsula, however. His writings were widely read in China and Japan, and his influence on the overall development of East Asian Mahayana thought is significant, particularly in relation to the Huayan,

Chan, and Pure Land schools. In *Cultivating Original Enlightenment*, the first volume in *The International Association of Wonhyo Studies' Collected Works of Wonhyo* series, Robert E. Buswell Jr. translates Wonhyo's longest and culminating work, the *Exposition of the Vajrasamādhi-Sūtra* (Kumgang Sammaegyong Non). Wonhyo here brings to bear all the tools acquired throughout a lifetime of scholarship and meditation to the explication of a scripture

that has a startling connection to the Korean Buddhist tradition. In his treatise, Wonhyo examines the crucial question of how enlightenment can be turned from a tantalizing prospect into a palpable reality that manifests itself in all activities.

A Practical Guide to Dissertation and Thesis Writing Routledge
For the most part, those who teach writing and administer writing programs do not conduct research on writing. Perhaps more significantly, they do not often read the research done by others because effective reading

of articles on empirical research requires special knowledge and abilities. By and large, those responsible for maintaining and improving writing instruction cannot -- without further training -- access work that could help them carry out their responsibilities more effectively. This book is designed as a text in graduate programs that offer instruction in rhetoric and composition. Its primary educational purposes are: * to provide models and critical methods designed to improve the reading of scientific discourse * to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric.

Aiming to cultivate new attitudes toward empirical research, this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies. The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities, rather that methods extend the power of humanist researchers trying to solve the problems of their discipline.
