In calculus, a limit is the value that a function (or sequence) "approaches" as the input (or index) "approaches" some value. Limits are essential to calculus (and mathematical analysis in general) and are used to define continuity, derivatives, and integrals.. The concept of a limit of a sequence is further generalized to the concept of a limit of a topological net, and is closely related to ...

The fundamental theorem of calculus is a theorem that links the concept of differentiating a function with the concept of integrating a function.. The first part of the theorem, sometimes called the first fundamental theorem of calculus, states that one of the antiderivatives (also called indefinite integral), say F , of some function f may be obtained as the integral of f with a variable bound ...

Course Description. Math 210 is the third and the final part of our standard three-semester calculus sequence. The distinct feature of this part of the course is its focus on the multi-dimensional analysis, as opposed to one-dimensional analysis that you learned in Math 180 (Calculus I) and Math 181 (Calculus II).
