Jones/George, *Essentials of Contemporary Management* is the concise edition of the market bestselling textbook by the same author team. Jones and George are dedicated to the challenge of "Making It Real" for students. The authors present management in a way that makes its relevance obvious even to students who might lack exposure to a "real-life" management context. This is accomplished thru a diverse set of examples, and the unique, and most popular feature of the text, the "Manager as a Person" Chapter 2. This chapter discusses managers as real people with their own personalities, strengths, weaknesses, opportunities,

and problems and this theme is carried thru the remaining chapters. This text also discusses the importance of management competencies--the specific set of skills, abilities, and experiences that gives one manager the ability to perform at a higher level than another in a specific context. The themes of diversity, ethics, globalization, and information technology are integrated throughout.

This reader-friendly book attempts to comprehend all the scattered and diverse understandings of Contemporary Management Thought in a systematic and structured manner into a nutshell. It will enable the reader to take a leap jump to the current frontiers of the turbulent and dynamic business world today. The first chapter comprises an in-depth analysis of the four parameters that govern modern business; Uncertainty, Ambiguity, Paradox and Chaos. Despite the fact that business executives fear and resent to deal with such realities, exponential financial gains can be made within very short periods by exploring the enormous business potential and emerging opportunities associated with them. The second chapter deals with the significance of knowledge

in modern management with numerous value additions, supplemented by examples. The third chapter on Paradigms, a buzzword in modern management, encapsulates all the existing concepts with a new philosophical interpretation. Also, it highlights the missed opportunities owing to paradigm shifts and paradigm blindness and the need to redefine the corporate mission from an end-user perspective, rather than from the conventional end-user perspective. The fourth chapter identifies a global process error and summarizes the entire industrial revolution from a strategy evolution and transformation perspective.
