Core Principles and Applications McGraw-Hill Education

Essentials of Financial Management is a paperback edition of an Open Access e-textbook suitable for students with

limited knowledge of finance and financial markets. It answers the main questions of a corporate entity, such as how businesses finance their activities, how they select projects to invest in, the distribution of net cash flow and, of increasing importance, how businesses manage price risk relating to cost of goods sold or a decline in revenue. In providing invaluable guidance to finance, management and business students, Essentials of Financial Management employs two main philosophies: that finance is a real-life subject and that finance is a numerical subject, which is why this brilliant e-textbook contains real world examples as well as numerous Excel spreadsheet solutions for students to download and use.

CFIN John Wiley & Sons

Essentials of Corporate Finance, 5/e by Ross, Westerfield, and Jordan is written to convey the most important concepts and principles of corporate finance at a level that is approachable for a wide audience. The authors retain their modern approach to finance, but have distilled the subject down to the essential topics in 18 chapters. They believe that understanding the "why" is just as important, if not more so, than understanding the "how," especially in an introductory course. Three basic themes emerge as their central focus: 1. An emphasis on intuition -- separate and explain the principles at work on a common sense, intuitive level before launching into specifics. Underlying ideas are discussed first in general terms, then followed by specific examples that illustrate in more concrete terms how a financial manager might proceed in a given situation. 2. A unified valuation approach -- Net Present Value is treated as the basic concept underlying corporate finance. Every subject the authors cover is firmly rooted in valuation, and care is taken to explain how decisions have valuation effects. 3. A managerial focus -- Students learn that financial management concerns management. The role of financial manager as decision maker is emphasized and they stress the need for managerial input and judgment.
