Essentials of Corporate Finance, 5/e by Ross, Westerfield, and Jordan is written to convey the most important concepts and principles of corporate finance at a level that is approachable for a wide audience. The authors retain their modern approach to finance, but have distilled the subject down to the essential topics in 18 chapters. They believe that understanding the "why" is just as

---

important, if not more so, than understanding the "how," especially in an introductory course. Three basic themes emerge as their central focus: 1. An emphasis on intuition -- separate and explain the principles at work on a common sense, intuitive level before launching into specifics. Underlying ideas are discussed first in general terms, then followed by specific examples that illustrate in more concrete terms how a financial manager might proceed in a given situation. 2. A unified valuation approach -- Net Present Value is treated as the basic concept underlying corporate finance. Every subject the authors cover is firmly rooted in valuation, and care is taken to explain how decisions have valuation effects. 3. A managerial focus -- Students learn that financial management concerns management. The role of financial manager as decision maker is emphasized and they stress the need for managerial input and judgment.

**NATIONAL BESTSELLER** From the former Governor of the Bank of Canada, a far-seeing guide to the powerful economic forces that will shape the decades ahead. The economic ground is shifting beneath our feet. The world is becoming more volatile, and people are understandably worried about their financial futures. In this urgent and accessible guide to the crises and opportunities that lie ahead, economist and former Governor of the Bank of Canada Stephen Poloz maps out the powerful tectonic forces that are shaping our future, and the ideas that will allow us to master them. These forces include an aging workforce, mounting debt, and rising income inequality. Technological advances, too, are adding to the pressure, putting people out of work, and climate change is forcing a transition to a lower-carbon economy. It is no surprise that people are feeling

uncertain. The implications of these tectonic tensions will cascade throughout every dimension of our lives—the job market, the housing market, the investment climate, as well as government and central bank policy, and the role of the corporation within society. The pandemic has added momentum to many of them. Poloz skillfully argues that past crises, from the Victorian Depression in the late 1800s to the more recent downturn in 2008, give a hint of what is in store for us in the decades ahead. Unlike the purely destructive power of earthquakes, the upheaval that is sure to come in the decades ahead will offer unexpected opportunities for renewal and growth. Filled with takeaways for employers, investors, and policymakers, as well as families discussing jobs and mortgage renewals around the kitchen table, *The Next Age of Uncertainty* is an indispensable guide for those navigating the fault lines of the risky world ahead.

Canadian Financial Accounting Cases, 3rd edition has been developed to bridge the gap between the foundational concepts and the real world. Students are introduced to the case study methodology for financial accounting, which focuses on identifying the issue, understanding implications, developing alternatives, and making recommendations. Students must also be able to understand the overall financial reporting landscape and the overall impact of the individual accounting issues. The cases range from introductory level to advanced level and can be used as assignments, exams, or for in-class discussions. The cases have been developed using IFRS (Part I), ASPE (Part II) or ASNPO (Part III) as the accounting frameworks, providing students with exposure to many different types of organizational structures, and have been linked to the CPA Competency Map. Instructors are provided with detailed teaching notes and marking keys that will assist in guiding the class discussions and assessments.
