Leadership Roles and Management Functions in Nursing Jones & Bartlett Publishers
The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly

complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020,

and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Concepts and Practice F.A. Davis Nursing Leadership and Management, Third Canadian Edition, is designed to help students and beginning nurses develop the knowledge and skills to lead and manage nursing care delivery in the 21st century. The nursing shortage and fiscal realities are pressuring health care organizations to require nurses to

do more with less and to adapt quickly to change. Recommendations for the health care profession highlight the need for nurses to be educated in a broader way, including education in the areas of interprofessional teamwork, integration, population-based health care, evidence-based practice, informatics, ethics, quality improvement, culture, spirituality, and change, to name just a few. This text addresses many of these topics, along with others, to prepare the beginning nurse leader and manager to successfully function in the modern health care system.
