In my 40-plus years in construction, one of the best improvements to estimating is the development of construction estimating software programs. The individual who insists on doing estimates longhand is open to errors. Doing estimates by hand is slow, out of date, inefficient and an irresponsible use of time.

Estimating Construction Costs, Fifth Edition
Yet the truth is there is no universal
ultimate guide to construction cost
estimating. The reason is simple. The best
estimating you can do for your construction
company depends on the following:
Efficient, accurate processes and tools; The
construction project for which the cost
estimate is to be made; Your cost estimating
experience and judgment
