Estimate the Sum
Calculator by
Rounding to Nearest
10, 100 or 1000.
Estimate the sum
calculator is a pre-
algebra tool to
find the actual &
estimated sum for
the given addends
by rounding off to
the nearest ten,
hundred & thousand.
Just supply the
addends, this

calculator rounds
the addends to the
nearest 10, 100 &
1000 and performs
the addition.
*Estimation Worksheets - Math
Worksheets 4 Kids*
Estimate products by rounding
the first factor to the nearest
ten then multiplying. Learn
math the fun way with our free
educational games! With
animation, music, and lots of
fun- kids can enjoy practicing
math and increase their math
skills and math memory.

Estimating Sums And Differences With

Students learn to estimate a sum or difference by first rounding each number to the place specified in the problem. For example, to estimate $4,909 + 3,217$ by rounding each number to the nearest thousand, first round 4,909 up to 5,000, and round 3,217 down to 3,000, then add $5,000 + 3,000$ to get 8,000.

Estimate the Sum Calculator
- getcalc.com

Here is a collection of our

printable worksheets for topic Estimation: Sums and Differences of chapter Addition and Subtraction in section Whole Numbers and Operations.. A brief description of the worksheets is on each of the worksheet widgets. Click on the images to view, download, or print them.

Estimating - Sums, Differences, Products & Quotients • ABCya!

Soccer Math: Estimating is a fun way for kids to practice estimating sums, differences, products and quotients. There

are different levels of difficulty in each exercise making the game appropriate for a variety of students and grades.

This free PowerPoint game is designed to give your students practice with estimating sums and estimating differences.

This is another free resource for teachers from The Curriculum Corner.

Estimating Sums & Differences Worksheets

Improve your math knowledge with free questions in "Estimate sums and differences: word problems" and thousands of other math skills.

Estimate Sums & Differences of Whole Numbers: StudyJams ...

For example, the standard practice for estimating sums and differences of fractions for grammar school students seems to be rounding to the closest $\frac{1}{2}$ by rounding to 0, $\frac{1}{2}$ or 1. This works well through a calculator such as if you are adding $\frac{3}{8} +$

$\frac{11}{16}$. $\frac{3}{8}$ is closest to $\frac{1}{2}$ and $\frac{11}{16}$ is less than $\frac{3}{4}$ so it is also closest to $\frac{1}{2}$.
