One of the world's leading scientists explains why—and how—the search for intelligent life beyond Earth should be expanded. Fifty years ago, a young astronomer named Frank Drake first pointed a radio telescope at nearby stars in the hope of picking up a signal from an alien civilization. Thus began one of the boldest scientific projects in history, the Search for Extraterrestrial Intelligence (SETI). After a half-century of scanning the skies, however, astronomers have little to report but an eerie silence—eerie because many scientists are convinced that the universe is teeming with life. Physicist and astrobiologist Paul Davies has been closely involved with SETI for three decades and chairs the SETI Post-Detection Taskgroup, charged with deciding what to do if we're suddenly confronted with evidence of alien intelligence. He believes the search so far has fallen into an anthropocentric trap—assuming that an alien species will look, think, and behave much like us. In this provocative book Davies refocuses the search, challenging existing ideas of what form an alien intelligence might take, how it might try to communicate with us, and how we should respond if it does.

Isaac Asimov concludes that we are not alone! Using the most up-to-date astronomical research as the backdrop for speculation, Asimov confronts the possibilities of other-worldly life head-on in Extraterrestrial Civilizations. In what will surely become one of the most provocative books ever written on the possibilities of life elsewhere in the universe, the incomparable Isaac Asimov provides chilling, hopeful, and exciting new insights. Here is astounding speculation about where the next giant step for mankind will take us. . . . Praise for Extraterrestrial Civilizations “[Isaac] Asimov holds our attention as he builds a meticulous case. We are not alone. It’s just a matter of time until we know for sure.”—Miami Herald "Intriguing"—Publishers Weekly

E.T., the Extraterrestrial E.T.: The Extra-Terrestrial From Concept to ClassicThe Illustrated Story of the Film and Filmmakers  
E.T. is the movie that created one of the most recognized icons of the twentieth century, and has become the enduring classic about a remarkable friendship between a boy and an alien visitor. And this is the only book that tells the story of how the movie was conceived and made. Here are stories from director Steven Spielberg, writer Melissa Mathison, producer Kathleen Kennedy, child stars Henry Thomas and Drew Barrymore, and members of the crew. Spielberg and Mathison tell us how E.T. evolved from Spielberg's concept into Mathison's screenplay. We learn about the mechanics of how the alien was made to walk, talk, eat, and phone home. We go on the set to discover, firsthand, how the most memorable scenes were filmed, including the scene of the boys flying over the moon and the good-bye scene that had us in tears. Lavishly illustrated, with full-color stills and behind-the-scenes photographs, E.T. The Extra-Terrestrial from Concept to Classic includes the complete screenplay, as well as excerpts from the reviews and feature stories that appeared when the film was first released in 1982. Here is a book that puts you in the director's chair during the making of one of the most extraordinary films ever created.

Celebrate the fortieth anniversary of Steven Spielberg's sci-fi classic Close Encounters of the Third Kind with this fully authorized behind-the-scenes book exploring the creation, production, and legacy of this iconic film. Created in conjunction with Sony Pictures and Amblin Entertainment, Close Encounters of the Third Kind: The Visual History details the complete creative journey behind the making of the film and examines its cultural impact. Featuring rare and never-before-seen imagery from the archives, the book brings together a stunning collection of on-set photography, concept art, storyboards, and more to create a visual narrative of the film's journey to the big screen. It also features a wealth of insightful commentary from every key player involved in the film, from the acclaimed director himself to the film's stars and the key department heads who brought Spielberg's vision to life. Special inserts and interactive elements include script pages, call lists, concept sketches, and more. Comprehensive, compelling, and filled with unseen treasures, Close Encounters of the Third Kind: The Ultimate Visual History is a fitting tribute to one of history's most iconic films.

*E.T. and Me* Berkley  
Steven Spielberg's classic sci-fi story of interplanetary friendship makes a perfect picture book for the whole family. When E.T. the Extra-Terrestrial was released in theaters back in 1982, its bittersweet story enchanted millions and the film surpassed Star Wars to become the highest-grossing movie of all time. Now the cinematic blockbuster is transformed into an illustrated storybook, with colorful, adorable drawings by Kim Smith. Here is a story you can't help but love: After E.T. is stranded on Earth, he takes refuge with Elliott, a boy in need of a friend. Together they find a way to help E.T. get back home. Along the way, both child and alien learn important lessons about courage, friendship, and the power of imagination. This is the perfect read-along story for children, their parents, and E.T. fans across the universe.

A Friend for E.T. MIT Press  
Get your family talking about adoption with the ultimate collection of films to help the whole family to explore their feelings in a fun and safe way. With a film for each week of the year, Addison Cooper has compiled the best movies, new and old, for family-

friendly viewing. Among those featured are Finding Dory, Frozen, Paddington, Teenage Mutant Ninja Turtles, Kung Fu Panda, Star Wars, Divergent, The Blind Side and I am Sam. Carefully selected, the movies included will help families to comfortably talk about important adoption-related topics. They are accompanied by descriptions of the themes and ideas to get the conversations started. Helping all members of the family to explore both the pain and joy of adoption, they cover a range of issues which can arise such as culture, identity, control, and reunification. With something for everyone - from kids, to teens, to grown-ups - this is a must-have for all adoptive families.

A boy discovers an extraterrestrial botanist in his mother's vegetable patch, and helps him return to his planet, 3 million light years away.

*Extraterrestrial* Clarkson Potter

Now, at last, we see where E.T. comes from -- who he really is and what his own distant world is like. Return with him to the Green Planet, whose inhabitants are the supreme masters of all growing things in the galaxy. Wander through their immense enchanted gardens, to which E.T. has returned, with Gertie's geranium, a fondness for junk food, and an all-consuming love for the earthling Elliott and his family. But things on Earth have changed since E.T. left. Elliott has begun to notice the opposite sex, and his cherished memories of E.T. are losing ground to thoughts of a girl in his class who wears a rhinestone ponytail clip. More important, he seems to have forgotten E.T.'s teachings of gentleness and peace. He is about to become the most terrible thing of all, observes E.T. from three million light years away. He is about to become -- Man.

*E.T., the Extra-Terrestrial* Clarkson Potter

If we send a message into space, will extraterrestrial beings receive it? Will they understand? The endlessly fascinating question of whether we are alone in the universe has always been accompanied by another, more complicated one: if there is extraterrestrial life, how would we communicate with it? In this book, Daniel Oberhaus leads readers on a quest for extraterrestrial communication. Exploring Earthlings' various attempts to reach out to non-Earthlings over the centuries, he poses some not entirely answerable questions: If we send a message into space, will extraterrestrial beings receive it? Will they understand? What languages will they (and we) speak? Is there not only a universal grammar (as Noam Chomsky has posited), but also a grammar of the universe? Oberhaus describes, among other things, a late-nineteenth-century idea to communicate with Martians via Morse code and mirrors; the emergence in the twentieth century of SETI (the search for extraterrestrial intelligence), CETI (communication with extraterrestrial intelligence), and finally METI (messaging extraterrestrial intelligence); the one-way space voyage of Ella, an artificial intelligence agent that can play cards, tell fortunes, and recite poetry; and the launching of a theremin concert for aliens. He considers media used in attempts at extraterrestrial communication, from microwave systems to plaques on spacecrafts to formal logic, and discusses attempts to formulate a language for our message, including the Astraglossa and two generations of Lincos (lingua cosmica). The chosen medium for interstellar communication reveals much about the technological sophistication of the civilization that sends it, Oberhaus observes, but even more interesting is the information embedded in the message itself. In Extraterrestrial Languages, he considers how philosophy, linguistics, mathematics, science, and art have informed the design or limited the effectiveness of our interstellar messaging.
