Ethics: Inventing Right and Wrong. This title presents an insight into moral skepticism of the 20th century. The author argues that our every-day moral codes are an 'error theory' based on the presumption of moral facts which, he persuasively argues, don't exist. His refutation of such facts is based on their metaphysical 'queerness' and the observation of cultural relativity.

J. L. Mackie, Ethics: Inventing Right and Wrong, Penguin 1977. Some thinkers hold that moral principles can be deduced from reason and introspection, while others hold that moral principles can be deduced from a careful examination of the varieties of human behavior observed across space and through time.

**J. L. Mackie - Ethics~ Inventing Right and Wrong ...**

Mackie's book provides some interesting arguments for the overall thesis that there are no objective values in Ethics, but that we can and should invent a consistent and commonly shared set of ethical principles (hence the sub-title inventing right and wrong) - ie this shared basis has no objective truth outside of the minds of human beings, but that does not mean we cannot have a common approach.

**Ethics: Inventing Right and Wrong - Wikipedia**

In the first place, his theory is not subjectivist: it is not claiming that we ought to do whatever we feel is right. Further, it is not emotivist: while the emotivist says a moral judgment is merely an expression of the utterer's feelings, Mackie thinks that moral judgments legitimately attempt to, and fail to, explain reality.
