Eleven years later, Lexi returns home after two years away

#### Twelve Years a Slave Etta Mae's Worst Bad-Luck Day

Between 1450 and 1750 thousands of people – most of them women – were accused, prosecuted and executed for the crime of witchcraft. The witch-hunt was not a single event; it comprised thousands of individual prosecutions, each shaped by the religious and social dimensions of the particular area as well as political and legal factors. Brian Levack sorts through the proliferation of theories to provide a coherent introduction to the subject, as well as contributing to the scholarly debate. The book: Examines why witchcraft prosecutions took place, how many trials and victims there were, and why witch-hunting eventually came to an end. Explores the beliefs of both

---

educated and illiterate people regarding witchcraft. Uses regional and local studies to give a more detailed analysis of the chronological and geographical distribution of witch-trials. Emphasises the legal context of witchcraft prosecutions. Illuminates the social, economic and political history of early modern Europe, and in particular the position of women within it. In this fully updated third edition of his exceptional study, Levack incorporates the vast amount of literature that has emerged since the last edition. He substantially extends his consideration of the decline of the witch-hunt and goes further in his exploration of witch-hunting after the trials, especially in contemporary Africa. New illustrations vividly depict beliefs about witchcraft in early modern Europe.

#### Miss Julia Paints the Town Penguin

In 1996 physicist Alan Sokal published an essay in *Social Text*--an influential academic journal of cultural studies--touting the deep similarities between quantum gravitational theory and postmodern philosophy. Soon thereafter, the essay was revealed as a brilliant parody, a catalog of nonsense written in the cutting-edge but impenetrable lingo of postmodern theorists. The event sparked a furious debate in academic circles and made the headlines of newspapers in the U.S. and abroad. Now in *Fashionable Nonsense: Postmodern Intellectuals' Abuse of Science*, Sokal and his fellow physicist Jean Bricmont expand from where the hoax left off. In a delightfully witty and clear voice, the two thoughtfully and thoroughly dismantle the pseudo-scientific writings of some of the most fashionable French and American intellectuals. More generally, they challenge the widespread notion that scientific theories are mere "narrations" or social

constructions.

Introducing a theory of workplace dignity into the field of management studies, this innovative new book presents an alternative paradigm based on principles of human dignity which is integrated into a theoretical approach to the topic. The author addresses and analyses the causes and consequences of the dominant political-economic paradigm within management studies. Further, it presents a theoretical alternative which can

---

constitute a foundation for a new way of thinking about organisations, management, and leadership. Dignity in the Workplace offers scholars ideas for how research in the field of management studies may be enriched by a dignity-paradigm, and goes further to explore the role of a dignity-paradigm in the function of HR-managers and organisational leaders.
