In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

"This book is about the people I met as I crisscrossed Australia by train and plane and L-plated car: the undefeated dreamers and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up." As anyone who's ever read Mark Dapin's column and features in Good Weekend knows, he's an immensely funny, acute and vivid observer of Australian life. In *Strange Country*, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other.

This volume brings together insights on the interactions between environmental change and human security in the Middle East and Africa. These regions face particular challenges in relation to environmental degradation, the decline of natural resources and consequent risks to current and future human security. The chapters provide topical analysis from a range of disciplines on the theory, discourse, policy and practice of responding to global environmental change and threats to human security. Case studies from Morocco, Tunisia, Egypt, Turkey, Iraq and Syria provide empirical evidence, with a focus section dedicated to the critical issue of water resources and water security in the region. The contributions demonstrate above all that the risks posed to human security arise through multiple and interconnected processes operating across diverse spatial and temporal scales. The complexity of these processes requires new ways of thinking and intervening. As a contribution, the current volume provides engaging insights from theory and practice for those seeking to address the challenges of environmental change.

Atlas at War! collects fifty hard-hitting stories from Atlas Comics, the company that became Marvel Comics and published more war titles than anyone in the industry between the years 1951 and

1960. Comics historian Dr. Michael J. Vassallo has chosen the best of the best, many of which are coming back into print for the first time, from sixteen different Atlas war titles and featuring the artwork of twenty different artists--giants of the genre, including Russ Heath, John Severin, Bernie Krigstein, Joe Maneely, Jerry Robinson, Steve Ditko, and Jack Kirby. Each page has been meticulously restored from its first printing by comic art restorer Allan Harvey. Atlas at War! covers the brutal pre-code period where graphic depictions of war action were rendered by artists who were World War II veterans themselves, as well as the post-code period, where code restrictions forced creators to tell stories without graphic violence but produced some of the most beautiful comic art of the genre. In addition to the artists, stories cover all aspects of war--from famous campaigns, weaponry, and personal soldier stories to political topics, Nazi atrocities, and even one story tinged with pre-code horror! Often overlooked in favor of its competitors, Atlas at War! will finally show that Atlas' war titles were second to no one.

Processes of multi-scalar regional urbanization are occurring worldwide. Such processes are clearly distinguishable from those of the nineteenth and twentieth centuries due to the shifting concepts of both the city and the metropolis. International literature highlights how what we have historically associated with the idea of cities has long been subjected to consistent reconfiguration, which involves stressing some of the typical features of the idea of "cityness". Post-Metropolitan Territories: Looking for a New Urbanity is the product of a research project funded by the Italian Ministry for Education, Universities and Research (MIUR). It constitutes a thorough overview of a country that is one of Europe's most diverse in terms of regional development and performance: Italy. This book brings together case studies of a number of Italian cities and their hinterlands and looks at new forms of urbanization, exploring themes of sustainability, industrialization, de-industrialization, governance, city planning and quality of life. This volume will be of great interest to academics and students who study regional development, economic geography and urban studies, as well as civil servants and policymakers in the field of spatial planning, urban policy, territorial policies and governance.

"There are cynics who say that a party platform is something that no one bothers to read and it doesn't very often amount to much. Whether it is different this time than it has ever been before, I believe the Republican Party has a platform that is a banner of bold, unmistakable colors, with no pastel shades." -Ronald Reagan, 1976 Republican National Convention When Ronald Reagan was called to the podium by President Ford during the 1976 Republican National Convention, he had no prepared remarks. But the unrehearsed speech he gave that night is still regarded as one of the most moving speeches of his political career. The reason he was able to give such a powerful speech on a moment's notice was that he was proclaiming the core principles of his heart and soul, which he had been teaching and preaching for years. The New Reagan Revolution reveals new insights into the life, thoughts, and actions of the man who changed the world during the 1980s. The challenges and threats we face today are eerily similar to the conditions in the world before the beginning of the Reagan era. The good news is that we already know what works. Ronald Reagan has given us the blueprint. This book is not merely a diagnosis of our nation's ills, but a prescription to heal our nation, rooted in the words and principles of Ronald Reagan. In these pages, you'll find a plan for returning America to its former greatness, soundness, and prosperity. It's the plan Ronald Reagan developed over years of study, observation, and reflection. It's a plan he announced to the nation, straight from his heart, one summer evening during America's 200th year. It's the plan he put into action during his eight years in office as the most effective president of the 20th century, and it is the plan we can use today to help return America to its former greatness, soundness, and prosperity.
