A riveting account of the Saint  
Bartholomew's Day Massacre,

its origins, and its aftermath, this volume by Barbara B. Diefendorf introduces students to the most notorious episode in France's sixteenth century civil and religious wars and an event of lasting historical importance. The murder of thousands of French Protestants by Catholics in August 1572 influenced not only the subsequent course of France's civil wars and state building, but also patterns of international alliance and long-standing cultural values across Europe. The book begins with an introduction that explores the political and religious context for the massacre and

traces the course of the massacre and its aftermath. The featured documents offer a rich array of sources on the conflict — including royal edicts, popular songs, polemics, eyewitness accounts, memoirs, paintings, and engravings — to enable students to explore the massacre, the nature of church-state relations, the moral responsibility of secular and religious authorities, and the origins and consequences of religious persecution and intolerance in this period. Useful pedagogic aids include headnotes and gloss notes to the documents, a list of major

figures, a chronology of key events, questions for consideration, a selected bibliography, and an index. The St. Bartholomew's Day Massacre Simon and Schuster "The Early Reformation" provides an overview of the European world during the late-15th and early-16th centuries. From Columbus's discovery of the New World to the years of religious wars, the Reformation was a period of restless exploration and often bloody protest.

---

The Protestant Reformation, the life of Martin Luther, the English Reformation, and the Italian Wars are among the events vividly described in this richly illustrated text.

Challenging review questions encourage meaningful reflection and historical analysis. A unit test and answer key are included.

The creator of the hit podcast series *Tides of History* and *Fall of Rome* explores the four explosive decades between

1490 and 1530, bringing to life the dramatic and deeply human story of how the West was reborn. In the bestselling tradition of *The Swerve* and *A Distant Mirror*, *The Verge* tells the story of a period that marked a decisive turning point for both European and world history. Here, author Patrick Wyman examines two complementary and contradictory sides of the same historical coin: the world-altering implications of the developments of printed mass media, extreme taxation, exploitative globalization, humanistic learning, gunpowder warfare, and mass religious conflict in the long

term, and their intensely disruptive consequences in the short-term. As told through the lives of ten real people--from famous figures like Christopher Columbus and wealthy banker Jakob Fugger to a ruthless small-time merchant and a one-armed mercenary captain--*The Verge* illustrates how their lives, and the times in which they lived, set the stage for an unprecedented globalized future. Over an intense forty-year period, the seeds for the so-called "Great Divergence" between Western Europe and the rest of the globe would be planted. From Columbus's voyage across the Atlantic to Martin Luther's sparking the

Protestant Reformation, the foundations of our own, recognizably modern world came into being. For the past 500 years, historians, economists, and the policy-oriented have argued which of these individual developments best explains the West's rise from backwater periphery to global dominance. As *The Verge* presents it, however, the answer is far more nuanced.

The Praise of Folly Twelve  
We know the Renaissance as a key moment in the history of Europe. It saw the rise of court and urban cultures, witnessed the first global voyages of discovery and the emergence of the Reformation and the Counter Reformation. Indeed, it started with the invention of linear perspective, oil painting and moveable type. All these developments were significant in terms of sensory knowledge and the sensory practices of the everyday. Does the Renaissance stand for the 'ascendancy of the eye'? What happened to the sensory

extremes which the famous Dutch historian Johan Huizinga still perceived in the fifteenth century? Did they simply disappear, or is there another history to be told: one of a surprising continuity, of the 'lower' senses – those of taste, smell and touch – hardly losing ground, neither in their daily prevalence nor in the cultural significance attached to them? This volume, assembling ten outstanding specialists, seeks to answer all these questions while offering a lively and sensational portrait of the period. The *Cultural History of the Senses* set delves into the

---

sensory foundations of Western civilization, taking a comprehensive period-by-period approach which provides a broad understanding of the life of the senses from antiquity to the modern day. Each of the volumes explores the following topics: The Social Life of the Senses; Urban Sensations; The Senses in the Marketplace; The Senses in Religion; The Senses in Philosophy and Science; Medicine and the Senses; The Senses in Literature; The Senses in Art; and Sensory Media. Superbly illustrated, this six-volume set is the most authoritative and comprehensive historical survey of the senses available. KS3 History: Renaissance, Revolution and Reformation: Britain 1509-1745 Macmillan Higher Education Eliezer Segal offers an overview of the Protestant Reformation, which took place in Europe during the 16th century. Segal highlights the social and political factors, the central beliefs of Protestantism, and the Roman Catholic Counter-Reformation. Houghton Mifflin Harcourt  
This highly original book opens up the almost entirely neglected area of the black African presence in Western Europe during the Renaissance. Covering history, literature, art history and anthropology, it investigates a whole range of black African experience and representation across Renaissance Europe, from various types of slavery to black musicians and dancers,

---

from real and symbolic Africans at court to the views of the Catholic Church, and from writers of African descent to Black African criminality. Their findings demonstrate the variety and complexity of black African life in fifteenth and sixteenth-century Europe, and how it was affected by firmly held preconceptions relating to the African continent and its inhabitants, reinforced by Renaissance ideas and conditions. Of enormous importance both for European and American

history, this book mixes empirical material and theoretical approaches, and addresses such issues as stereotypes, changing black African identity, and cultural representation in art and literature.

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante's encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch

created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early
