EVE Online is a socially complex, science-fiction-themed universe simulation and massively multiplayer online game (MMOG) first released in 2003. Notorious for its colossal battles and ruthless player culture, it has hundreds of thousands of players today. In this fascinating book, scholars, players, and EVE's developer (CCP Games) examine the intricate world of EVEOnline--providing authentic accounts of lived experience within a game with more than a decade of history and millions of "real" dollars behind it. Internet Spaceships Are Serious Business features contributions from outstanding EVE Online players, such as The Mittani, an infamous member of the game's community, as well as academics from around the globe. They cover a wide range of subjects: the game's technicalities and its difficulty; its projection of humanity's future in space; the configuration of its unique, single-server game world; the global nature of warfare in its "nullsec" territory (and how EVE players have formed a global concept of time); stereotypes of Russian players; espionage play; in-game memorials to Vile Rat (aka U.S. State Department official Sean Smith, murdered in the 2012 Benghazi attack); its gendered playing experience; and CCP Games' relationship with players; and its history and legacy. Internet Spaceships Are Serious Business is a must for EVE Online players interested in a broad perspective on their all-consuming game. Eve's Guide is a personal growth guide that is inspired by positive psychology. The practical tips and exercises taught in this guide can be used to guide women who want to start their personal growth journey (and just started becoming aware of self belief), be in control of their thoughts and have positive relationships. It will have a major impact on how you think, how you act and how you live. Tamara Alzayat studied positive psychology and did tons of research on self motivation for 2 years and is now eager to share everything that has worked for her in her personal development journey through this easily readable guide. "2 years ago, I was someone that had a low self belief (didn't look it at all BTW, I was pretty good at acting confident) and lacked strength. I wanted to be internally better and stronger but I had no idea how. It wasn't until I was talking to a friend that had recently recovered from cancer and saw how she wanted to live life like she values it so much, that I realized that life is too precious for us to take for granted and live like we are on autopilot. I wanted to be internally better/stronger, more driven, self empowered and give myself the chance to even believe that I can live my dreams that seemed impossible at the time. I started studying positive psychology, started obsessing over human behavior, manifesting self belief, positive thoughts and how to form meaningful relationships."

As games grow ever-more ubiquitous in our culture and communities, they have become popular staples in public library collections and are increasing in prominence in academic ones. Many librarians, especially those who are not themselves gamers or are only acquainted with a handful of games, are ill-prepared to successfully advise patrons who use games. This book provides the tools to help adult and youth services librarians to better understand the gaming landscape and better serve gamers in discovery of new games—whether they are new to gaming or seasoned players—through advisory services. This book maps all types of games—board, roleplaying, digital, and virtual reality—providing all the information needed to understand and appropriately recommend games to library users. Organized by game type, hundreds of descriptions offer not only bibliographic information (title, publication date, series, and format/platform), but genre classifications, target age ranges for players, notes on gameplay and user behavior type, and short descriptions of the game's basic premise and appeals.

In a thought-provoking collection of essays and profiles, 30 contributors explore what may instead be a rise in rhetorical activity, an upsurge due in part to the sudden blurring of the traditional roles of creator and audience in participatory media. This collection explores topics too often overlooked by traditional academic scholarship, though critical to an exploration of rhetoric and popular culture, including fan fiction, reality television, blogging, online role-playing games, and Fantasy Football. Both scholarly and engaging, this text draws rhetorical studies into the digital age.
