This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

This practical coursebook introduces all the basics of semantics in a simple, step-by-step fashion. Each unit includes short sections of explanation with examples, followed by stimulating practice exercises to complete in the book. Feedback and comment sections follow each exercise to enable students to monitor their progress. No previous background in semantics is assumed, as students begin by discovering the value and fascination of the subject and then move through all key topics in the field, including sense and reference, simple logic, word meaning and interpersonal meaning. New study guides and exercises have been added to the end of each unit to help reinforce and test learning. A completely new unit on non-literal language and metaphor, plus updates throughout the text significantly expand the scope of the original edition to bring it up-to-date with modern teaching of semantics for introductory courses in linguistics as well as intermediate students.

Eve has a problem with clutter. Too much stuff and too easily acquired, it confronts her in every corner and on every surface in her house. When she pledges to tackle the worst offender, her horror of a "Hell Room," she anticipates finally being able to throw away all of the unnecessary things she can't bring herself to part with: her fifth-grade report card, dried-up art supplies, an old vinyl raincoat. But what Eve discovers isn't just old CDs and outdated clothing, but a fierce desire within herself to hold on to her identity. Our things represent our memories, our history, a million tiny reference points in our lives. If we throw our stuff in the trash, where does that leave us? And if we don't...how do we know what's really important? Everyone has their own Hell Room, and Eve's battle with her clutter, along with her eventual self-clarity, encourages everyone to dig into their past to declutter their future. Year of No Clutter is a deeply inspiring—and frequently hilarious — examination of why we keep stuff in

From the Pulitzer Prize – winning author of All the Light We Cannot See, perhaps the most bestselling and beloved literary fiction of our time, comes a triumph of imagination and

compassion, a soaring novel about children on the cusp of adulthood in a broken world, who find resilience, hope, and story. The heroes of Cloud Cuckoo Land are trying to figure out the world around them: Anna and Omeir, on opposite sides of the formidable city walls during the 1453 siege of Constantinople; teenage idealist Seymour in an attack on a public library in present day Idaho; and Konstance, on an interstellar ship bound for an exoplanet, decades from now. Like Marie-Laure and Werner in All the Light We Cannot See, Anna, Omeir, Seymour, and Konstance are dreamers and outsiders who find resourcefulness and hope in the midst of peril. An ancient text—the story of Aethon, who longs to be turned into a bird so that he can fly to a utopian paradise in the sky—provides solace and mystery to these unforgettable characters. Doerr has created a tapestry of times and places that reflects our vast interconnectedness—with other species, with each other, with those who lived before us and those who will be here after we ’ re gone. Dedicated to “ the librarians then, now, and in the years to come, ” Cloud Cuckoo Land is a hauntingly beautiful and redemptive novel about stewardship—of the book, of the Earth, of the human heart. Advanced aerial mobility is a newly emerging industry that aims to develop and operate new air vehicles potentially capable of safe, reliable, and low-noise vertical flight. The world has seen a recent increase in the adoption of electric vertical lift aircraft for urban, suburban and rural operations. These new innovations and technologies change the way that we move cargo and people, affecting industries across the economy. These changes will challenge today's airspace monitoring systems and regulatory environment. The U.S. government and its regulatory agencies need technical guidance to facilitate the development of these technologies, and to create the regulatory framework to foster the growth of this vertical flight industry to the benefit of the aviation industry. Advancing Aerial Mobility evaluates the potential benefits and challenges associated with this emerging industry. This report provides recommendations that seek to foster an environment in which the nation can maintain its leading position in developing, deploying, and embracing these new technologies. This publication presents a national vision for advanced aerial mobility, market evolution, and safety and security management.

The Delphi Method Cambridge University Press

William Blake thought that John Milton had been betrayed by both his commentators and his illustrators, and he set out to recover Milton's vision, particularly in Paradise Lost, from the misguided academic and Augustan misinterpretation to which it had been subjected. The Moment of Explosion: Blake and the Illustration of Milton is the first detailed. analysis of all of Blake's illustrations for Milton's poetry. Blake explicitly believed he was correcting errors that Milton wanted corrected, and he felt that his illustration was interpretive criticism in its highest sense, a re-vision that would broadcast Milton's revolutionary ethic afresh. Stephen C. Behrendt blends a close reading of Blake and Milton with meticulous and provocative examination of the illustrations of Blake, his predecessors, and his contemporaries. The focus on visual art as criticism establishes the book as a major essay on the interaction of the arts within and across cultural periods. Fifty-four black-and-white illustrations document that radical, Romantic assault by Blake on tradition in the name of tradition. The highlight of the book is Blake's two sets of Paradise Lost illustrations, reproduced here in twenty-four color plates?Blake's final statements on Paradise Lost and the culmination of his aesthetic and critical development. This beautiful book presents a wealth of illustration previously scattered or inaccessible. It will be of major interest to students of Blake, Milton, Romanticism, art history, and the history of ideas.
