Child Car Seat Safety Standards

Everyone who has children knows just how easily they can get hurt. Each year, for example, approximately 9,000 infants suffer injuries related to their high chairs. Thousands more are poisoned by common household substances. In total, more than 25 million children are injured annually, and more than 12,000 kids under the age of 14 succumb to their injuries. What makes these incidents even more tragic is that they can be prevented--if only parents knew how. Well, now they will. Written by an emergency physician, *Child Safe* is a practical parenting book that will help keep babies and young children out of trouble. It will help parents recognize the dangers to kids and provide concrete ways of preventing specific injuries. *Child Safe* is the most complete, organized, and parent-friendly child-safety book ever written for the general public. It addresses the most pressing safety issues from birth to age 14, issues that change dramatically as a child grows up. This invaluable guide for parents, grandparents, teachers, childcare workers, and baby-sitters has the information to prevent millions of childhood injuries. Dr. Mark Brandenburg, with his years of experience, shows how to keep your "child safe."

Specifications for the Development of a Child Safety Seat Program

Written by the nation's foremost consumer expert, this authoritative guide provides the most thorough and accessible coverage of the year's new trucks, vans, and 4x4s. For each of the 64 new models, a full-page entry provides a summary of the vehicle, a photo, and ratings for fuel economy, preventive maintenance costs, customer satisfaction and more.

Protecting Our Own
