*Building Academic Vocabulary* Richard d Irwin

Dave Ramsey explains those scriptural guidelines for handling money.

*Essentials of Economics* McGraw-Hill Education

When it comes to the hard work of reconstructing our schools into places where every student has the opportunity to succeed, Mirko Chardin and Katie Novak are absolutely convinced that teachers should serve as our primary architects. And by “teachers” they mean legions of teachers working in close collaboration. After all, it’s teachers who design students’ learning experiences, who build student relationships . . . who ultimately have the power to change the trajectory of our students’ lives. *Equity by Design* is intended to serve as a blueprint for teachers to alter the all-too-predictable outcomes for our historically under-served students. A first of its kind resource, the book makes the critical link between social justice and Universal Design for Learning (UDL) so that we can equip students (and teachers, too) with the will, skill, and collective capacity to enact positive change. Inside you’ll find:

Concrete strategies for designing and delivering a culturally responsive, sustainable, and equitable framework for all students Rich examples, case studies, and implementation spotlights of educators, students (including Parkland survivors), and programs that have embraced a social justice imperative Evidence-based application of best practices for UDL to create more inclusive and equitable classrooms A flexible format to facilitate use with individual teachers, teacher teams, and as the basis for whole-school implementation “Every student,” Mirko and Katie insist, “deserves the opportunity to be successful regardless of their zip code, the color of their skin, the language they speak, their sexual and/or gender identity, and whether or not they have a disability.” Consider *Equity by Design* a critical first step forward in providing that all-important opportunity. “Our calling is to drop our egos, commit to removing barriers, and treat our learners with the unequivocal respect and dignity they deserve.” ~Mirko Chardin and Katie Novak

*Principles of Macroeconomics, Fifth Edition* Stylus Publishing, LLC.

How appropriate for today and for the future are the policies and practices of higher education that largely assume a norm of traditional-age students with minimal on-campus, or no, work commitments? Despite the fact that work is a fundamental part of life for nearly half of all undergraduate students – with a substantial number of “traditional” dependent undergraduates in employment, and working independent undergraduates averaging 34.5 hours per week – little attention has been given to how working influences the integration and engagement experiences of students who

---

work, especially those who work full-time, or how the benefits and costs of working differ between traditional age-students and adult students. The high, and increasing, prevalence and intensity of working among both dependent and independent students raises a number of important questions for public policymakers, college administrators, faculty, academic advisors, student services and financial aid staff, and institutional and educational researchers, including: Why do so many college students work so many hours? What are the characteristics of undergraduates who work? What are the implications of working for students' educational experiences and outcomes? And, how can public and institutional policymakers promote the educational success of undergraduate students who work? This book offers the most complete and comprehensive conceptualization of the "working college student" available. It provides a multi-faceted picture of the characteristics, experiences, and challenges of working college students and a more complete understanding of the heterogeneity underlying the label "undergraduates who work" and the implications of working for undergraduate students' educational experiences and outcomes. The volume stresses the importance of recognizing the value and contribution of adult learners to higher education, and takes issue with the appropriateness of the term "non-traditional" itself, both because of the prevalence of this group, and because it allows higher education institutions to avoid considering changes that will meet the needs of this population, including changes in course offerings, course scheduling, financial aid, and pedagogy.

*Things Fall Apart* Saddleback Educational

## Publishing

Krugman's Economics for AP® second edition is designed to be easy to read and easy to use. This book is your ultimate tool for success in the AP® Economics course and Exam. The text combines the successful storytelling, vivid examples, and clear explanations of Paul Krugman and Robin Wells with the AP® expertise of Margaret Ray and David Anderson. New First-time Homeowners Springer Science & Business Media

Discover ways to empower students to build confidence in sharing their learning, becoming more responsible digital citizens and evolving into classroom creators. In researching the top skills students need to succeed in the future, author Rachelle Dene Poth identified the following: ability to communicate, work in teams, think creatively, problem-solve and design. This book shows educators how to help students develop these essential skills through authentic, real-world learning experiences, building a pathway for the future of learning and work. In *Chart a New Course*, educators will get the tools they need to design more purposeful learning experiences to drive student engagement and motivation, promote creativity in learning, model risk-taking and build classroom culture. Readers will discover how these activities can be woven into instruction rather than layered on existing curriculum, with ideas for getting started; suggestions in response to the statement, "If you're doing this, try this instead;" and lessons learned along the way. The book will:

- Foster authentic learning through integration of digital tools and emerging trends.
- Serve as a resource for emerging educators and those with varying levels of tech experience, helping them explore the use of different digital tools and

---

concepts to prepare students for the future. • Offer clear examples and narratives from students and other educators who have implemented some of the tools discussed, focusing on themes of empowered learning, innovative design and student choice. • Explore risks taken, failures experienced and fun in working through the challenges, illustrating ways to weave established and emerging topics into curriculum. This accessible resource opens up a variety of learning experiences for students and illustrates how to implement different technologies into multiple content areas and grade levels.

### **Your Money, Your Goals** Lampo

This latest volume in the World Yearbook of Education series examines the global education industry both in OECD\* countries as well as developing countries, and presents the works of scholars based in different parts of the world who have significantly contributed to this area of research. Focusing on the areas of cross-over in public-private partnerships in education, WYBE 2016 critically examines the actors and factors that have propelled the global rise of the education industry. Split into three key sections, Part I explores how education agendas are shaped; Part II considers the private financing of education and the export of school improvements to professional consultancies; and Part III analyses new market niches, such as low-fee private schooling and for-profit education provisions. The book draws upon case studies of many global organizations, including: The Bill and Melinda Gates Foundation Pearson Affordable Learning Fund Bridge International Academies Teach for All Omega Schools Co-edited by three internationally renowned scholars, Antoni Verger, Christopher Lubienski and Gita Steiner-Khamsi, WYBE 2016 will be a valuable resource for researchers, graduates and policy makers who are interested in the global education industry. \*Convention on the Organisation for Economic Co-operation and Development.

### Microeconomics Irwin Professional Pub

"Provide an approachable, superbly written

introduction to economics that allows all types of students to quickly grasp economic concepts and build a strong foundation with Mankiw's popular Principles of economics, 8E. Essential Foundations of Economics, Student Value Edition Macmillan Higher Education

The market leading undergraduate investments textbook, *Essentials of Investments*, 8e by Bodie, Kane and Marcus, emphasizes asset allocation while presenting the practical applications of investment theory. The authors have eliminated unnecessary mathematical detail and concentrate on the intuition and insights that will be useful to practitioners throughout their careers as new ideas and challenges emerge from the financial marketplace. The eighth edition has been fully updated to reflect the recent financial crisis and includes a new chapter on Hedge Funds.

**Eureka Math, A Story of Units, Grade 5, Module 1** Krugman's Economics for AP® (High School)

*Fundamentals of Corporate Finance* was designed and developed for a first course in business or corporate finance, for both finance majors and non-majors alike. The text is nearly self-contained in terms of background or prerequisites, assuming some familiarity with basic algebra and accounting concepts, while still reviewing important accounting principles very early on. The organization of this text has been developed to give instructors the flexibility they need. The best-selling text has three basic themes that are the central focus of the book: 1) An emphasis on intuition: the

authors separate and explain the principles at work on a common sense, intuitive level before launching into any specifics. 2) A unified valuation approach: net present value (NPV) is treated as the basic concept underlying corporate finance. 3) A managerial focus: the authors emphasize the role of the financial manager as a decision maker, and they stress the need for managerial input and judgment.

**National Educational Technology Standards for Students** Corwin Press

*Foundations of Macroeconomics* Prentice Hall

With an easy-to-understand writing style, ESSENTIALS OF ECONOMICS is the most popular and widely used economics textbook in college Economics classes. Author Greg Mankiw has created a textbook that's accessible to everyone, particularly students encountering economics for the first time -- emphasizing real-life scenarios and engaging facts on the economy and its fundamental principles.

Understanding the Working College Student

SAGE Publishing India

College students are particularly vulnerable to making poor financial decisions. One method of addressing personal finances and financial stress among students of higher education is through university based financial education programs. Student Financial Literacy: Program Development presents effective strategies to assist in the implementation or the enhancement of a program as a tool to improve students' educational experience and financial well-being. It presents the key components of financial education programs designed to address the growing concerns associated with high levels of debt and low levels of financial literacy among college students. "Student Financial Literacy: Campus-Based Program Development is packed with financial education and counseling information and guidance. It was very difficult to write this review as I wanted to share ALL the excellent direction this book provides... The editors and contributing authors have developed an excellent resource for not only those interested in developing or enhancing a campus-based financial education program but also for anyone involved in financial education, counseling, and planning." -Rebecca J. Travnichek, Family Financial Education Specialist, University of Missouri Extension  
*Journal of Financial Counseling and Planning*
