Health Care Reform Harper Collins

This title takes a calendrical approach to illuminating the history of Latinos and life in the United States and adds more value than a simple "this day in history" through primary source excerpts and resources for further research. Latino/a history has been relatively slow in gaining recognition despite the population's rich and varied history. Engaging and informative, *Latino History Day by Day: A Reference Guide to Events* will help address that oversight. Much more than just a "this-day-in-history" list, the guide describes important events in Latino/a history, augmenting many entries with a brief excerpt from a primary document. All entries include two annotated books and websites as key resources for follow up. The day-to-day reference is organized by the

365 days of the year with each day drawing from events that span several hundred years of Latino/a history, from Mexican Americans to Puerto Ricans to Cuban Americans. With this guide in hand, teachers will be able to more easily incorporate Latino/a history into their classes. Students will find the book an easy-to-use guide to the Latino/a past and an ideal starting place for research.

Manchild in the Promised Land is indeed one of the most remarkable autobiographies of our time. This thinly fictionalized account of Claude Brown's childhood as a hardened, streetwise criminal trying to survive the toughest streets of Harlem has been heralded as the definitive account of everyday life for the first generation of African Americans raised in the Northern ghettos of the 1940s and 1950s. When the book was first published in 1965, it was praised for its realistic portrayal

of Harlem - the children, young people, hardworking parents; the hustlers, drug dealers, prostitutes, and numbers runners; the police; the violence, sex, and humour. The book continues to resonate generations later, not only because of its fierce and dignified anger, not only because the struggles of urban youth are as deeply felt today as they were in Brown's time, but also because the book is affirmative and inspiring. Here is the story about the one who "made it," the boy who kept landing on his feet and became a man.

In this remarkable sequel to his *Films of the Seventies: A Social History*, William J. Palmer examines more than three hundred films as texts that represent, revise, parody, comment upon, and generate discussion about major events, issues, and social trends of the eighties. Palmer defines the dialectic between film art and social history, taking as his theoretical model the "holograph of history" that

originated from the New Historicist theories of Hayden White and Dominick LaCapra. Combining the interests and methodologies of social history and film criticism, Palmer contends that film is a socially conscious interpreter and commentator upon the issues of contemporary social history. In the eighties, such issues included the war in Vietnam, the preservation of the American farm, terrorism, nuclear holocaust, changes in Soviet-American relations, neoconservative feminism, and yuppies. Among the films Palmer examines are *Platoon*, *The Killing Fields*, *The River*, *Out of Africa*, *Little Drummer Girl*, *Kiss of the Spiderwoman*, *Silkwood*, *The Day After*, *Red Dawn*, *Moscow on the Hudson*, *Troop Beverly Hills*, and *Fatal Attraction*. Utilizing the principles of New Historicism, Palmer demonstrates that film can analyze and critique history as well as present it.

The Colors covers the past three decades of the American art scene, a period during which the prevailing artistic fashion has shifted as often as the focus of the Whitney Biennial, when art and money, talent and celebrity have often been confused. During this period, figures such as Julian Schnabel, Jeff Koons, and Keith Haring have crossed over from the rarefied world of high art into popular culture, and art dealers, like Hollywood power agents, have often claimed as much attention as those they represented. Anthony Haden-Guest has moved within this world, known the players, and delivers here an authoritative and deliciously inside account. Focusing on the lives and personalities of the art world's main players,

and with a sure critical component, Haden-Guest gives us vivid portraits of the period's key artists as they strive to fulfill their ambitions. He does justice as well to the machinations of those who have come to control the larger drama -- the dealers, collectors, and museum curators. Filled with incredible anecdotes, dramatically told stories, and subtle critical assessments, True Colors tells the story of the art world that we have never heard before.

Throughout the twentieth century, African Americans challenged segregation at amusement parks, swimming pools, and skating rinks not only in pursuit of pleasure but as part of a wider struggle for racial equality. Well before the Montgomery bus boycott, mothers led their children into segregated amusement parks, teenagers congregated at forbidden swimming pools, and church groups picnicked at white-only parks.

But too often white mobs attacked those who dared to transgress racial norms. In *Race, Riots, and Roller Coasters*, Victoria W. Wolcott tells the story of this battle for access to leisure space in cities all over the United States. Contradicting the nostalgic image of urban leisure venues as democratic spaces, Wolcott reveals that racial segregation was crucial to their appeal. Parks, pools, and playgrounds offered city dwellers room to exercise, relax, and escape urban cares. These gathering spots also gave young people the opportunity to mingle, flirt, and

dance. As cities grew privatized within a more diverse, these decade of social forms of fun desegregation. prompted white Wolcott's book tracks insistence on the decline of the racially exclusive urban amusement park recreation. The Pacific Dairy Review

This book reviews the concept, contemporary research efforts and the implementation of Integrated Water Resources Management (IWRM). The IWRM concept was established as an international guiding water management paradigm

in the early 1990ies and has become a vital approach to solving the problems associated with the topic of water. The book summarizes fourteen comprehensive IWRM research projects with worldwide coverage and analyses their motivations, settings, approaches and implementation of results. Aiming to be an up-to-date interdisciplinary scientific reference, this book provides a comprehensive theoretical and empirical analysis of contemporary IWRM research, examples of science based implementations and a synthesis of the lessons learnt. It concludes with some

major future
challenges, the
solving of which will
