This book, *Addiction to Recovery: Unlocking Your Potential*, is an accumulation of existential realization, many resources, years of recovery, education, insights, and years working in the field of addiction, with all adepts in the goal of personal transformation from addiction to recovery. This is an integrative approach to living in wellness of recovery. I vacated my own mind through deep personal process, my own form of meditation, and this book came about. My hope is this book unlocks the potential that advances new insight into the recovery process for each individual by reframing the

process in such a way that the right interpretation by the reader will help recovery click into place. What we need to celebrate in recovery is the self-discovery of the individual. I offer my carefully considered overviews and assessments on the best-known treatments (theories) connected to recovery. I have provided a new outlook as a guide for the unwary who had failed at recovery in the past and those just coming into recovery for the first time. I count myself among the autodidacts, the self-taught perpetual student fueled by a passion for new answers and a sense of mission.

Power of Positive Attitude**
Nicholas Mag

What is it to want something? Or, as philosophers might ask, what is a desire? The idea that we explain and evaluate actions with essential reference to what people want is compelling, as it speaks to common-sense ideas that our wants lie at the heart of our decision-making. Yet our wants seem to have a competitor: our beliefs about what we ought to do. Such normative beliefs alone may often suffice to explain our actions. To try and resolve this tension, this book defends "desire as belief", the view that desires are just a special subset of our normative beliefs. This view entitles us to accept orthodox models of human motivation and rationality that explain those things with reference to desire, while also making room for our normative beliefs to play a role in those domains. This view also tells us to diverge from the orthodox view on which desires themselves can never be right or wrong. Rather, according to desire-as-belief, our desires can themselves be assessed for their accuracy, and they are wrong when they misrepresent normative features of the world. Hume says that it is not contrary to reason to prefer the destruction of the whole world to the

scratching of your finger, but he is wrong: it is foolish to prefer the destruction of the whole world to the scratching of your finger, precisely because this preference misrepresents the relative worth of these things. This book mounts an engaging and comprehensive defence of these ideas.

EDUCATION ARE NOT THE SAME THING! Too often, the words "school" & "education" are used synonymously, and this causes massive confusion. The Possibilities of constructive thought are so fascinating, its daily use so practical, that the demand for its better understanding is constantly growing. The thoughts here presented belong to whom? I wish I might tell you, but truly, I do not know. Aside from the many quotations I have given, thought after thought has appeared, fairly insisting that it be used. As each thought came, I wrote it down for the purpose of putting in concise form the information by so many desired. If there be such things as original thoughts, some of these may be so named. But how can one be sure? With my mind equipped with a New Thought wireless, I may have caught and appropriated ideas that someone else was sending; or, from the reading of Epictetus, Emerson, Allen, Brown, Huckel, Hudson, Fletcher, Miltitz; Mulford, Marden, Towne, Larson, Randall, Sears and others, my subconscious mind may have absorbed and given

back to me the thoughts of these good writers and able teachers At any rate should I find that I am a mental pirate, I shall not grieve, for I will know that only because I desired so intensely to help others that which I needed came to me as a proof of the law. With all these great minds aiding me, I am certain one will find in this book the help one needs; and I believe it can be referred to, from time to time, with benefit. I feel positive it may be used to help others, as I have endeavored to help, in the work of replacing instead of repressing; of changing the old form of pessimistic thought for the new one of health, prosperity and happiness.

WHAT IS THE STORY GRID? The Story

Grid is a tool developed by editor Shawn Coyne to analyze stories and provide helpful editorial comments. It's like a CT Scan that takes a photo of the global story and tells the editor or writer what is working, what is not, and what must be done to make what works better and fix what's not. The Story Grid breaks down the component parts of stories to identify the problems. And finding the problems in a story is almost as difficult as the writing of the story itself (maybe even more difficult). The Story Grid is a tool with many applications: 1. It will tell a writer if a Story ?works? or ?doesn't work. 2. It pinpoints story problems but does not emotionally abuse the writer, revealing exactly where a Story (not the person creating the Story'the Story) has failed. 3. It will tell the writer the specific work necessary to fix that Story's problems. 4. It is a tool to re-envision and resuscitate a seemingly irredeemable pile of paper stuck in an attic drawer. 5. It is a tool that can inspire an original creation.

First published in 1926, 'The Richest Man in Babylon' is an inspirational classic that

is celebrated as the greatest of books on finances by George S. Clason, an American author. Clason was a successful businessman who founded the Clason Map Company of Denver, Colorado, and published the first road atlas of the United States and Canada. This book was initially a prominent series of pamphlets on thrift and financial success, using parables set in ancient Babylon, written by Clason, and circulated in large quantities by banks and insurance companies and later became familiar to millions. It is a timeless classic, revealing the secrets to making money and keeping it. It reveals the secrets to wealth, providing priceless guidance, advice, unforgettable parables, financial problem-solving tools, and invaluable information

which will get you on your way to prosperity. This book is an essential read for all who want to attain financial well-being. The parables are told by a fictional Babylonian character called Arkad, a poor scribe who evolved as the richest man in Babylon. Incorporated in Arkad's advice are the 'Seven Cures' (or how to generate money and wealth), and the 'Five Laws of Gold' (or how to protect and invest wealth). An essence of Arkad's advice is around 'paying yourself first', 'living within your means', 'investing in what you know', the importance of 'long-term saving', and 'homeownership'. This delicious novel revolves around a classic love triangle: two men and one woman. She is English, they are French and American. The Frenchman is married, the American is not. None of this makes any difference. The woman—elusive, unreliable, a classic femme fatale—flits back and forth between her two lovers, driving them both mad. Lapeyre's subtle, graceful, yet compulsively readable narrative shows us the folly of men who fall helplessly in love with women they don't understand. Its theme is universal and its humor is sly. It is the perfect introduction in English to this brilliant writer's work.
